THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 6 — MATHS · HARD LEVEL CHAPTER TEST SET 1

Chapter 8: **Playing with Constructions** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Two circles have radii 11 cm and 6 cm and their centres are 17 cm apart. The circles: 1

(a) touch externally **(b)** touch internally

(c) one lies inside the other **(d)** do not touch (separate)

2. A rectangle's diagonal is 12 cm. The perimeter of triangle AOB where OA = OB = 6 cm and AB = 8 cm is (cm): 1

(a) 20 **(b)** 21 **(c)** 26 **(d)** 19

3. A circle of radius 3 cm is drawn. A square of side equal to the diameter is drawn around it. The area of the square (cm^2) is: 1

(a) 33 **(b)** 42 **(c)** 36 **(d)** 39

4. Two circles of equal radius 4 cm touch externally. The distance from the outer end of one to the outer end of the other along the line of centres (cm): 1

(a) 16 **(b)** 12 **(c)** 20 **(d)** 24

5. In rectangle ABCD, AC = BD = 8 cm. If O is the intersection, the sum OA + OB + OC + OD (cm) is: 1

(a) 24 **(b)** 16 **(c)** 12 **(d)** 20

6. Three circles of radius 3 cm are drawn in a triangle arrangement, each touching the other two. The triangle joining the centres has perimeter (cm): 1

(a) 18 **(b)** 21 **(c)** 15 **(d)** 27

7. An isosceles triangle OAB with OA = OB has $\angle AOB = 40^\circ$. Each base angle (degrees) is: 1

(a) 65 **(b)** 70 **(c)** 80 **(d)** 75

8. The diameter of the circle that exactly fits inside a square of side 10 cm is (cm): 1

(a) 11 **(b)** 9 **(c)** 15 **(d)** 10

9. Two circles have radii 13 cm and 5 cm and their centres are 8 cm apart. The circles: 1

(a) touch internally **(b)** touch externally

(c) one lies inside the other **(d)** do not touch (separate)

10. A rectangle's diagonal is 18 cm. The perimeter of triangle AOB where OA = OB = 9 cm and AB = 12 cm is (cm): 1

(a) 31 **(b)** 29 **(c)** 39 **(d)** 30

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. Circles with radii 10 cm and 6 cm have centres 12 cm apart. Find the range of values of d for which they intersect at two points, and say what this case is. 2

12. A rectangle has diagonal intersection O with $\angle AOB = 35^\circ$. Find all four angles at O. 2

13. A square ABCD of side 10 cm has diagonals meeting at O. Find the area of triangle AOB and the sum of areas of the four triangles. 2

14. Circles with radii 9 cm and 5 cm have centres 15 cm apart. Find the range of values of d for which they intersect at two points, and say what this case is. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Four circles of radius 3 cm are placed at the corners of a square so that adjacent circles touch. Find the side of the square joining centres and its area. 3

16. Two concentric circles have radii 4 cm and 9 cm. A chord of the outer circle touches the inner one. Explain why the longest chord of the outer circle is 18 cm and find the width of the ring. Also find the diameter of the inner circle. 3

17. In rectangle ABCD, AB = 10 cm, BC = 6 cm. The diagonals meet at O. If M is the midpoint of AB and N is the midpoint of BC, find BM and BN, and the perimeter and area of the rectangle MBNO, where O is the centre. 3

OR

Four circles of radius 4 cm are placed at the corners of a square so that adjacent circles touch. Find the side of the square joining centres and its area. 3

18. Two concentric circles have radii 5 cm and 12 cm. A chord of the outer circle touches the inner one. Explain why the longest chord of the outer circle is 24 cm and find the width of the ring. Also find the diameter of the inner circle. 3

OR

In rectangle ABCD, AB = 14 cm, BC = 8 cm. The diagonals meet at O. If M is the midpoint of AB and N is the midpoint of BC, find BM and BN, and the perimeter and area of the rectangle MBNO, where O is the centre. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Describe the construction of a rectangle with diagonal 10 cm and one side 6 cm (you may use a compass for arcs). Find the other side if it is 8 cm, check using the property that the half-diagonal is 5 cm, and find the perimeter. 5

OR

A designer draws 5 identical circles of radius 3 cm in a row, each touching the next. Find the total length of the row and the distance between the centres of the first and the last circle. How many circles of this size fit exactly in a strip 42 cm long? 5

20. Describe the construction of a rectangle with diagonal 34 cm and one side 16 cm (you may use a compass for arcs). Find the other side if it is 30 cm, check using the property that the half-diagonal is 17 cm, and find the perimeter. 5

OR

A designer draws 6 identical circles of radius 4 cm in a row, each touching the next. Find the total length of the row and the distance between the centres of the first and the last circle. How many circles of this size fit exactly in a strip 64 cm long? 5

END OF QUESTION PAPER — Total: 40 Marks
