Mistakes to avoid:

- Using area units (cm^2) for perimeter or linear units (cm) for area.
- Forgetting the $\frac{1}{2}$ in the area of a triangle.
- Using the sloping side instead of the perpendicular height in the triangle area.
- Writing $P = l + b$ for a rectangle (it needs $2(l + b)$) or $A = 2(l + b)$.
- Mixing units: multiplying metres by centimetres without converting first.
- Using area when the question is about fencing (perimeter) and the reverse for paving or tiling.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
