ANSWER KEY & MARKING SCHEME SET 1

Chapter 7: **Fractions** | Class 6 Maths | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** 8	The number below the line.
2	**(b)** $\frac{5}{7}$	Add the numerators; keep the denominator.
3	**(c)** $\frac{5}{11}$	Subtract the numerators; keep the denominator.
4	**(a)** 8	Multiply the numerator by 4 too.
5	**(d)** 36	Divide 48 by 4 and multiply by 3.
6	**(b)** $\frac{7}{3}$	2×3+1 = 7, so the fraction is 7 over 3.
7	**(c)** 9	The number below the line.
8	**(b)** $\frac{9}{11}$	Add the numerators; keep the denominator.
9	**(b)** $\frac{6}{13}$	Subtract the numerators; keep the denominator.
10	**(c)** 9	Multiply the numerator by 3 too.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Denominators are equal (1); $\frac{5}{9}$ (1).	1+1
12	$17 \div 5$ gives quotient 3, remainder 2 (1); $3\frac{2}{5}$ (1).	1+1
13	HCF of 12 and 18 is 6 (1); $\frac{2}{3}$ (1).	1+1
14	Denominators are equal (1); $\frac{9}{13}$ (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Multiply numerator and denominator by 2, 3, 4 (1); $2/6$, $3/9$, $4/12$ (2).	1+2
16	Equal denominators: compare numerators (1); $\frac{5}{11} < \frac{8}{11}$ (1); Greater: $\frac{8}{11}$ (1).	1+1+1
17	36 divided by 3 is 12 (1); Multiply by 2: $12 \times 2 = 24$ (1); State the answer (1).	1+1+1
	OR: Multiply numerator and denominator by 2, 3, 4 (1); $4/10$, $6/15$, $8/20$ (2).	1+2
18	Equal denominators: compare numerators (1); $\frac{9}{13} > \frac{4}{13}$ (1); Greater: $\frac{9}{13}$ (1).	1+1+1
	OR: 45 divided by 5 is 9 (1); Multiply by 3: $9 \times 3 = 27$ (1); State the answer (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Used =\frac{2}{5}×20 = 8 m (1); Left $= 20 - 8 = 12$ m (1); Used + left = total (1); State the units (2).	1+1+1+2
	OR: Add the numerators: $3 + 4 + 5 = 12$ (1); Sum $= \frac{12}{7}$ (1); As a mixed number: $1\frac{5}{7}$ (1); Reduce if possible (2).	1+1+1+2
20	Used =\frac{3}{8}×40 = 15 m (1); Left $= 40 - 15 = 25$ m (1); Used + left = total (1); State the units (2).	1+1+1+2
	OR: Add the numerators: $5 + 6 + 7 = 18$ (1); Sum $= \frac{18}{9}$ (1); As a mixed number: 2 (1); Reduce if possible (2).	1+1+1+2

Mistakes to avoid:

- Adding the denominators as well: $\frac{1}{5} + \frac{2}{5} = \frac{3}{7}$ is wrong; the answer is $\frac{3}{5}$.
- Adding numerators and denominators of unlike fractions directly, e.g. $\frac{1}{2} + \frac{1}{3} = \frac{2}{5}$.
- Changing only the numerator or only the denominator when making an equivalent fraction.
- Converting $2\frac{1}{2}$ to $\frac{3}{2}$ instead of $\frac{2\times2+1}{2} = \frac{5}{2}$.
- Comparing fractions by denominators only: a bigger denominator with the same numerator makes the fraction *smaller*.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
