CLASS 6 — SCIENCE · FORMULA SHEET

Chapter 6: **Materials Around Us** | Quick revision, one page

Materials

- Material: the substance an object is made of.
- Natural: cotton, wood, wool. Man-made: plastic, nylon.
- Group materials by properties like hardness, lustre, solubility and transparency.

Transparency of light

- Transparent: light passes fully (clear glass, air, water).
- Translucent: light passes partly (tracing paper, frosted glass).
- Opaque: no light passes (wood, metal, brick).

Solubility

- Soluble: dissolves in water (salt, sugar).
- Insoluble: does not dissolve (sand, chalk, oil).
- Oil and water do not mix; oil floats as a layer.

Metals and non-metals

- Metals: lustre, hard, good conductors of heat and electricity.
- Non-metals: wood, plastic and rubber are poor conductors.
- Good conductor: copper. Insulator: plastic, rubber, wood.
