CLASS 6 — SCIENCE · FORMULA SHEET

Chapter 10: **Living Creatures: Exploring their Characteristics** | Quick revision, one page

Characteristics of living things

- Need food and water.
- Breathe (respire): take in oxygen, give out carbon dioxide.
- Grow.
- Respond to stimuli.
- Reproduce.
- Remove waste (excretion).
- Move (animals visibly, plants slowly).

Stimulus and response

- Stimulus: a change in surroundings (touch, light, sound).
- Response: the reaction of the living thing.
- Touch-me-not leaves fold on touch; shoots bend towards light.

Breathing in different organisms

- Humans: lungs. Fish: gills.
- Earthworm: moist skin.
- Plants: tiny pores (stomata) in leaves.

Living and non-living

- Living: plants, animals, birds, insects.
- Non-living: stones, chairs, cars, water.
- Movement alone does not mean that a thing is alive.
