THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 6 — SCIENCE · HARD LEVEL CHAPTER TEST SET 3

Chapter 1: **The Wonderful World of Science** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Which statement about technology is correct? 1

(a) It can have both benefits and harmful effects
(b) It is unrelated to science
(c) It is always harmful
(d) It is always harmless

2. Which of the following shows the correct sequence of science in action? 1

(a) test, sharing, question, result
(b) sharing, question, conclusion, result
(c) result, hypothesis, question, sharing
(d) question, hypothesis, test, result, conclusion, sharing

3. Why are conclusions in science called tentative? 1

(a) they are guesses **(b)** nobody checks them
(c) new evidence can change them **(d)** they are always wrong

4. The invention of the microscope led to which discovery? 1

(a) gravity **(b)** planets
(c) electricity **(d)** cells and microbes

5. In which situation is a model useful in science? 1

(a) to replace all experiments
(b) to hide data
(c) to avoid thinking
(d) to represent things too large or small to handle, like the solar system

6. Why are replicable experiments valuable? 1

(a) they are costly **(b)** they are secret
(c) others can get the same result **(d)** they avoid data

7. Which of these does NOT require a hypothesis? 1

(a) testing whether salt dissolves faster in hot water
(b) measuring your height
(c) testing whether fertiliser aids growth
(d) testing whether light affects sprouting

8. Which one is a limitation of the scientific method? 1

(a) it can only answer questions that can be tested
(b) it cannot ask questions
(c) it uses evidence
(d) it needs observation

9. **Assertion (A):** A microscope is used to study very tiny things like the cells of an onion peel. 1
Reason (R): A microscope makes very small objects look larger.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

10. **Assertion (A):** Botany is the study of plants. 1
Reason (R): Astronomy is the study of stars, planets and space.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. What is the role of peer review or discussion in science? 2

12. Explain why 'Chocolate is the best food' is not a scientific statement. 2

13. Why must a conclusion not go beyond the data? 2

14. Why do scientists use units like metres and kilograms across the world? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. A hypothesis states 'Metals expand on heating'. Suggest an observation that would reject it. 3

16. How does the use of a table and a graph help in analysing results? 3

17. How does measuring the mass of dry and soaked seeds help in finding how much water they absorbed? 3

OR

How can science help in solving the problem of drinking water shortage? Give three ways. 3

18. Suppose a result differs greatly from all others. What would a careful scientist do? 3

OR

Why must apparatus be cleaned before the experiment? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. **Case study.** At a science exhibition in Pune, Meera saw a stall showing a sample of pond water under a microscope, another stall showing the Moon through a telescope, and a third stall showing a stethoscope and a thermometer. The guide said each tool helps us find out things that our eyes alone cannot. 5
(i) Which instrument helps to see tiny living things in pond water?
(ii) Which instrument shows distant objects like the Moon?
(iii) Name the branch of science that studies stars and planets.
(iv) Why do scientists need instruments instead of depending only on their senses?

20. Describe the full process by which a scientific discovery becomes accepted knowledge. 5

OR

Plan an investigation into how the amount of light affects the growth of bean seedlings, including controls, measurements and safety. 5

END OF QUESTION PAPER — Total: 40 Marks
