- Mixing up creepers and climbers: creepers spread on the ground, climbers go up a support.
- Writing that tap roots go with parallel venation; tap root usually goes with **reticulate** venation, fibrous with parallel.
- Confusing **habitat** (the place) with **adaptation** (the feature).
- Saying a camel stores water in its hump; the hump stores fat.
- Thinking venation means the roots; it is the pattern of veins in the **leaf**.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
