ANSWER KEY & MARKING SCHEME SET 1

Chapter 2: **Diversity in the Living World** | Class 6 Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** pumpkin: creeper	Pumpkin has a weak stem that spreads.
2	**(a)** crocodile	Crocodiles live both in water and land.
3	**(d)** herb, shrub, tree	Herbs are smallest.
4	**(a)** herb	Soft stems and low height.
5	**(d)** to reduce heat loss	Insulation.
6	**(c)** classification	It helps to organise.
7	**(a)** shrub	Characteristic of a shrub.
8	**(a)** thick fleshy stem and spiny leaves	Reduces water loss.
9	**(c)** the name given by a person	Names are labels not features.
10	**(b)** fibrous roots	Parallel venation goes with fibrous roots.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	To reduce loss of water (1); The green stem makes the food (1).	1+1
12	Scales protect the body (1); Scales help the body to move smoothly through water (1).	1+1
13	Hold the soil firmly (1); Prevent soil erosion (1).	1+1
14	Camouflage in snow helps hunting (1); Thick fur keeps them warm (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Lotus: water (1); Cactus: desert (1); Pine: mountain (1).	1+1+1
16	Gills (1); Fins and tail (1); Streamlined body (1).	1+1+1
17	Help in flight (1); Keep the body warm (1); Streamline the body (1).	1+1+1
	OR: Mango has tap root (1); Reticulate leaf venation (1); It is a tree (1).	1+1+1
18	Little water (1); Very hot days (1); Poor soil (1).	1+1+1
	OR: They swim using fins (1); Water supports the body (1); Legs would increase water resistance (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Camel: hump and broad feet (1); Fish: gills and fins (1); Bird: wings and light bones (1); Polar bear: thick fur and fat (1); Each helps survival in its habitat (1).	1+1+1+1+1
	OR: Groups give protection, e.g. deer (1); Group hunting, e.g. wolves (1); Some animals live alone, e.g. tiger (1); Need large territory (1); Depends on food and safety (1).	1+1+1+1+1
20	Mango: net venation (1); Mango: tap root (1); Grass: parallel venation (1); Grass: fibrous roots (1); Reason: different groups of plants (1).	1+1+1+1+1
	OR: No food production (1); No oxygen release (1); Herbivores would starve (1); Carnivores would starve next (1); Life would end (1).	1+1+1+1+1

Mistakes to avoid:

- Calling any small plant a herb; a shrub is also small but has a **hard stem** branching near the base.
- Mixing up creepers and climbers: creepers spread on the ground, climbers go up a support.
- Writing that tap roots go with parallel venation; tap root usually goes with **reticulate** venation, fibrous with parallel.
- Confusing **habitat** (the place) with **adaptation** (the feature).
- Saying a camel stores water in its hump; the hump stores fat.
- Thinking venation means the roots; it is the pattern of veins in the **leaf**.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 2: **Diversity in the Living World** | Class 6 Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** small or reduced	They absorb water directly.
2	**(d)** crow and bat	Both feed their young on milk.
3	**(c)** reticulate venation	Tap root goes with reticulate.
4	**(b)** long and flexible	Long stalks bring leaves to the surface.
5	**(d)** pumpkin	Rose bears flowers.
6	**(a)** camel: desert	Camels live in deserts.
7	**(b)** fins	Fins.
8	**(a)** maize	Ferns do not bear flowers.
9	**(a)** monkey	Monkeys have grasping hands and tails.
10	**(c)** so it can breathe while the body is under water	It stays hidden.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	They push against water while swimming (1); The skin between the toes increases the surface that pushes the water (1).	1+1
12	They make their own food (1); Animals depend on them (1).	1+1
13	Herbivores have broad flat teeth for grinding (1); Carnivores have sharp canines for tearing (1).	1+1
14	It stores fat (1); Fat gives energy when food is scarce (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Herbivores: flat teeth, plants, cow (1); Carnivores: sharp canines, flesh, lion (1); Omnivores have both types of teeth (1).	1+1+1
16	Camouflage, e.g. chameleon (1); Running away, e.g. deer (1); Hard shell, e.g. tortoise (1).	1+1+1
17	Each habitat gives suitable food and shelter (1); Fish need water (1); Camels need dry desert (1).	1+1+1
	OR: Sparrow: short beak for seeds (1); Duck: flat beak and webbed feet (1); Eagle: hooked beak and sharp claws (1).	1+1+1
18	Roots go deep (1); Reach water deep underground (1); Hold plant firmly (1).	1+1+1
	OR: Food from plants and animals (1); Medicines from herbs (1); Materials like wood and wool (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Food: herbivore (cow) (1); Food: carnivore (lion) (1); Habitat: aquatic (fish) (1); Habitat: terrestrial (dog) (1); Habitat: aerial (crow) (1).	1+1+1+1+1
	OR: Fish: scales, moves with fins (1); Bird: feathers, moves with wings (1); Snake: scales, moves without legs (1); Body covering protects the animal (1); Movement suits the habitat (1).	1+1+1+1+1
20	Desert: thick stem, spines (1); Water: floating leaves, long stalks (1); Mountain: conical shape, needle leaves (1); All reduce loss or damage (1); Suited to conditions (1).	1+1+1+1+1
	OR: Tree: strong grip, tail (1); Tree: monkey, squirrel (1); Burrow: strong claws (1); Burrow: rabbit, rat (1); Safe shelter (1).	1+1+1+1+1

Mistakes to avoid:

- Calling any small plant a herb; a shrub is also small but has a **hard stem** branching near the base.
- Mixing up creepers and climbers: creepers spread on the ground, climbers go up a support.
- Writing that tap roots go with parallel venation; tap root usually goes with **reticulate** venation, fibrous with parallel.
- Confusing **habitat** (the place) with **adaptation** (the feature).
- Saying a camel stores water in its hump; the hump stores fat.

- Thinking venation means the roots; it is the pattern of veins in the **leaf**.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 2: **Diversity in the Living World** | Class 6 Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(c)** aquatic plants	E.g. lotus.
2	**(c)** webbed feet	Webbed feet push water.
3	**(b)** goat and rabbit	Both feed on plants.
4	**(b)** leopard	Leopards are carnivores.
5	**(a)** tearing flesh	Hawks are birds of prey.
6	**(a)** carnivore	Canines tear flesh.
7	**(d)** hide from enemies	Camouflage.
8	**(a)** food	Beaks are adapted to food.
9	**(a)** cow	Used for grinding plants.
10	**(b)** insects	Insects have six legs.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Forests offer more food and shelter (1); Desert conditions are harsh (1).	1+1
12	Their stems are weak (1); They use tendrils or hooks to climb up (1).	1+1
13	Mango: reticulate (1); Grass: parallel (1).	1+1
14	To study similarity and difference (1); To identify them easily (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Long flexible body (1); Muscles help it to slither (1); Scales grip the ground (1).	1+1+1
16	Banyan: thick and woody trunk (1); Rose: thinner, branches from base (1); Banyan is a tree, rose a shrub (1).	1+1+1
17	Parallel venation and fibrous roots: grass-like (1); Net venation and tap root: mango-like (1); Leaf and root features go together (1).	1+1+1
	OR: Trees have thick trunk and are tall (1); Herbs are small and soft (1); Trees give wood and shade (1).	1+1+1
18	Climbers use support (1); Creepers spread on ground (1); Examples: pea, pumpkin (1).	1+1+1
	OR: Blending with surroundings (1); Chameleon changes colour (1); Stick insect looks like a twig (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	A: tree like mango or neem (1); B: herb or grass (1); A: tap root with reticulate venation (1); B: fibrous root with parallel venation (1); Different groups (1).	1+1+1+1+1
	OR: Food crops (1); Medicinal plants (1); Wool and silk (1); Pollinators like bees (1); Balance in nature (1).	1+1+1+1+1
20	Root: absorption and anchorage (1); Stem: support (1); Leaf: food making (1); Flower: reproduction (1); Fruit: protects seeds (1).	1+1+1+1+1
	OR: Pond: lotus, hydrilla (1); Pond: fish, frog (1); Forest: trees, shrubs (1); Forest: deer, tiger (1); Different conditions support different life (1).	1+1+1+1+1

Mistakes to avoid:

- Calling any small plant a herb; a shrub is also small but has a **hard stem** branching near the base.
- Mixing up creepers and climbers: creepers spread on the ground, climbers go up a support.
- Writing that tap roots go with parallel venation; tap root usually goes with **reticulate** venation, fibrous with parallel.
- Confusing **habitat** (the place) with **adaptation** (the feature).
- Saying a camel stores water in its hump; the hump stores fat.
- Thinking venation means the roots; it is the pattern of veins in the **leaf**.
