THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 6 — SCIENCE · HARD LEVEL CHAPTER TEST SET 1

Chapter 2: **Diversity in the Living World** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A scientist finds a plant with parallel veins, fibrous roots and a soft stem. Which is most probable? 1

(a) a rose bush **(b)** a grass **(c)** a mango tree **(d)** a peepal tree

2. Which of the following is a correct inference about a tiger's eyes in front of the face? 1

(a) helps to swim **(b)** helps judge distance for hunting
(c) helps fly **(d)** helps see all sides

3. In a forest, if all insects vanish, what is most likely to happen? 1

(a) forest will grow faster **(b)** animals will grow bigger
(c) many plants will fail to pollinate **(d)** all plants will grow faster

4. An animal with webbed feet, lungs and moist skin that lives near ponds and jumps on land is most likely a: 1

(a) lion **(b)** camel **(c)** frog **(d)** crow

5. Why do prey animals like deer have eyes on the sides of the head? 1

(a) wide field of view to spot predators **(b)** to dig
(c) to swim **(d)** to see only forward

6. A jungle has more kinds of organisms than a desert because: 1

(a) it has no plants **(b)** it provides more food, water and shelter
(c) it is colder **(d)** it has no animals

7. Which statement explains why camels have broad feet? 1

(a) to climb **(b)** to dig for water
(c) to avoid sinking in sand **(d)** to swim

8. Which behaviour is an adaptation to a hot desert? 1

(a) hibernating in snow **(b)** being active at night
(c) being active at noon **(d)** swimming

9. **Assertion (A):** Wheat plants have fibrous roots. 1
Reason (R): Plants with fibrous roots generally have leaves with parallel venation.
Choose the correct option:

(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

10. **Assertion (A):** Fish have a streamlined body shape. 1
Reason (R): A streamlined body helps a fish to move easily through water.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. Cactus leaves are spines but it still makes food. How? 2

12. Why does a dolphin look like a fish but is classified as a mammal? 2

13. Why do aquatic plants such as hydrilla have thin, flexible stems? 2

14. A student says 'all animals that fly are birds'. Is it correct? Give an example. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. A plant has leaves with net veins, a tap root, a thick woody trunk 15 m tall. Classify it and give the chief features of each part. 3

16. A student suggests classifying animals by colour. Why is this not a good method? 3

17. Explain with an example how animals show adaptation in feeding. 3

OR

Compare the adaptations of a duck and a fish for movement in water. 3

18. Explain how the hump of a camel benefits it in the desert. 3

OR

Analyse why not all plants with flowers are trees. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. **Case study.** A class visited a garden in Jaipur and listed these plants: tulsi, rose, mango, pumpkin and grapevine. The teacher said plants can be grouped as herbs, shrubs, trees, creepers and climbers by the nature of their stems. 5
(i) Name the plant from the list that is a tree.
(ii) Which plant is a creeper?
(iii) Give one difference between a herb and a shrub.
(iv) How is a climber different from a creeper? Give an example of a climber from the list.

20. Describe how the structure of a bird's body (including beak, feet, bones, feathers) is adapted for its way of life with examples. 5

OR

Describe the differences among herbs, shrubs and trees using stem, height, branching, lifespan and uses. 5

END OF QUESTION PAPER — **Total: 40 Marks**
