THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 6 — SCIENCE · HARD LEVEL CHAPTER TEST SET 2

Chapter 2: **Diversity in the Living World** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. The roots of a banyan hanging from branches are called: 1

(a) prop roots **(b)** tap roots **(c)** fibrous roots **(d)** tuberous roots

2. The most likely reason that a cactus has thick, fleshy stem is: 1

(a) to make food in the dark **(b)** to hold soil

(c) to attract birds **(d)** to store water

3. A fish placed on land dies quickly because: 1

(a) it needs a lot of salt **(b)** it is too bright

(c) its gills cannot take oxygen from air **(d)** it is too cold

4. Why does the lotus leaf have a waxy upper surface? 1

(a) to store food **(b)** to attract insects

(c) to repel water **(d)** to hold roots

5. A new organism with feathers, beak and wings is discovered. It likely belongs to: 1

(a) reptiles **(b)** birds **(c)** mammals **(d)** fish

6. Which of these flying animals is NOT a bird? 1

(a) sparrow **(b)** crow **(c)** eagle **(d)** bat

7. Which of the following is the main reason why species are grouped into classes? 1

(a) to colour them **(b)** to show similarities useful for study

(c) to count them **(d)** to name them

8. To identify an unknown plant as a tree, we should check: 1

(a) the smell

(b) whether it has flowers only

(c) whether it has a thick woody trunk and is tall

(d) its colour

9. **Assertion (A):** The leaves of a cactus are reduced to spines to save water in a desert. 1

Reason (R): Cactus plants have large, broad leaves.

Choose the correct option:

(a) Both A and R are true and R is the correct explanation of A.

(b) Both A and R are true but R is not the correct explanation of A.

(c) A is true but R is false.

(d) A is false but R is true.

10. **Assertion (A):** A shrub has one thick, hard trunk and grows very tall. 1
Reason (R): Shrubs are bushy plants with several branches near the ground.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. What advantage does a creeper have over a tree in using sunlight? 2

12. Why do frogs live near ponds even though they have lungs? 2

13. Why do desert animals like camels not need to drink water often? 2

14. Explain how a polar bear's colour and fur help it. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Why do mountain trees such as pine have conical shape and needle-like leaves? 3

16. Explain how grasses protect the soil. 3

17. What happens if the population of herbivores in a forest increases suddenly? 3

OR

Give reasons: 3
(a) leaves of aquatic plants are thin or floating,
(b) roots are reduced,
(c) stems are flexible.

18. What are three problems faced by animals when forests are cut? 3

OR

Why do we say a camel is adapted to the desert? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. **Case study.** Farhan pulled out a wheat seedling and a mustard seedling from his field. The wheat had many thin roots of equal size spreading from the stem base and its leaf had parallel veins. The mustard had one thick main root with thinner side branches and its leaf had a net of veins. 5
(i) What type of roots does wheat have?
(ii) Which plant has a tap root?
(iii) What is the arrangement of veins in a leaf called?
(iv) Name the venation of the mustard leaf and name one more plant with a tap root.

20. Explain the importance of biodiversity with respect to food chains, medicine, climate and tourism. 5

OR

Using examples explain how camouflage protects animals. 5

END OF QUESTION PAPER — Total: 40 Marks
