THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET 1

Chapter 3: **Mindful Eating: A Path to a Healthy Body** | Class 6 Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** starch and fat	Both tests are positive.
2	**(d)** they contain much sugar and few nutrients	Empty calories.
3	**(b)** fat	Protein test.
4	**(d)** Q contains starch	Iodine tests starch only.
5	**(a)** protein and fat	Plant foods have less protein and fat.
6	**(a)** X has starch, Y has fat, Z has neither starch nor fat	Match tests with nutrients.
7	**(d)** spinach and jaggery	Iron-rich foods.
8	**(a)** cereals with pulses	Combination improves protein quality.
9	**(a)** Both A and R are true and R is the correct explanation of A.	Growth and repair of tissues is why proteins are called body-building nutrients.
10	**(b)** Both A and R are true but R is not the correct explanation of A.	Both are true, but the food source does not explain the disease.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	It contains starch (1); It also contains fat (1).	1+1
12	Lacks carbohydrates and fibre (1); Lacks many vitamins (1).	1+1
13	For growth of tissues (1); For repair of body cells (1).	1+1
14	The skin makes vitamin D in sunlight (1); Vitamin D helps the body use calcium (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Lacks protein and vitamins (1); High in refined carbohydrates and fat (1); Add milk, dal, vegetables and fruit (1).	1+1+1
16	Calcium for bones (1); Proteins for growth (1); Vitamins like A and D (1).	1+1+1
17	Fruits and nuts (1); Roasted chana (1); Avoid sugary packaged items (1).	1+1+1
	OR: Dal adds protein (1); Dal adds minerals (1); Together they give a more balanced intake (1).	1+1+1
18	Vitamins get destroyed by air and light (1); Wash before cutting (1); Cut just before eating (1).	1+1+1
	OR: Body is built from nutrients (1); Poor food gives poor health (1); Good food keeps us fit (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) Protein (1). (ii) Vitamins (and minerals) (1). (iii) The ingredients and nutrients in the food (and its date of expiry) (1). (iv) No single food gives all the nutrients (1); a mix gives carbohydrates, proteins, vitamins and minerals in balance, while junk food has too much fat, sugar and salt (1).	1+1+1+2
20	Breakfast: milk, fruit, paratha (1); Lunch: roti, dal, vegetable, curd (1); Snack: sprouts or fruit (1); Dinner: light khichdi with vegetables (1); Avoid chips, soda and excess sweets (1).	1+1+1+1+1
	OR: Proteins from pulses or eggs (1); Calcium from milk products (1); Iron from leafy vegetables (1); Vitamins from fruits (1); Balance and variety matter (1).	1+1+1+1+1

Mistakes to avoid:

- Saying iodine solution tests for proteins or fats; it tests only for **starch**.
- Writing that fibre gives energy; it helps the body remove waste but gives no energy.
- Mixing deficiency diseases: scurvy (C), rickets (D), night blindness (A), anaemia (iron), goitre (iodine).
- Writing 'balanced diet means eating a lot'; it means **all nutrients in the right amounts**.
- Thinking water is not a nutrient or that proteins are the main energy source (carbohydrates are).
- Believing all packaged food is healthy; check the label for fat, sugar and salt.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

MASTERMIND

ANSWER KEY & MARKING SCHEME SET 2

Chapter 3: **Mindful Eating: A Path to a Healthy Body** | Class 6 Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** butter and dal	Butter has fat; dal protein.
2	**(b)** include pulses, seasonal vegetables and local fruits	Local foods are cheap and nutritious.
3	**(a)** it lacks protein and many vitamins	Single food lacks many nutrients.
4	**(d)** playing in morning sunlight	UV light on skin.
5	**(d)** makes proteins more complete	Amino acid balance.
6	**(b)** they are needed in small amounts and excess leads to obesity	They give energy and insulation.
7	**(a)** tooth decay	Sugar harms teeth.
8	**(c)** starch present	Iodine test.
9	**(c)** A is true but R is false.	A is true (starch test); R is false, the blue-black colour is the test for starch only.
10	**(d)** A is false but R is true.	A is false: fibre gives no energy. R is true.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Constipation (1); Slow digestion (1).	1+1
12	We recognise when we are full (1); Digestion starts better with chewing (1).	1+1
13	Pulses, eggs, milk (1); Soya, nuts and fish (1).	1+1
14	They regulate body processes (1); Without them deficiency diseases occur (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Lack of calcium weakens bones (1); Lack of D prevents calcium absorption (1); Both can cause rickets (1).	1+1+1
16	Prevents flies and dust (1); Prevents germs (1); Avoids food poisoning (1).	1+1+1
17	Offer fruits and healthy snacks (1); Avoid fried and sugary items (1); Teach hygiene and avoid wastage (1).	1+1+1
	OR: It has no starch (1); It has no fat (1); It may still contain other nutrients such as vitamins or minerals (1).	1+1+1
18	Food is what we eat, e.g. roti (1); Nutrients are components, e.g. starch (1); One food has many nutrients (1).	1+1+1
	OR: Sweat removes water and salts (1); Body must replace them (1); Drink water or ORS (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) Starch (a carbohydrate) (1). (ii) Potato (1). (iii) Fat (1). (iv) Carbohydrates give energy (1); rice (or wheat, bread) (1).	1+1+1+2
20	Weight gain (1); Low calcium so weak bones (1); Sugar harms teeth (1); Lack of nutrients reduces concentration (1); Healthy alternatives (1).	1+1+1+1+1
	OR: Poster competition (1); Healthy tiffin day (1); No-waste lunch (1); Hygiene demonstration (1); Nutrition quiz (1).	1+1+1+1+1

Mistakes to avoid:

- Saying iodine solution tests for proteins or fats; it tests only for **starch**.
- Writing that fibre gives energy; it helps the body remove waste but gives no energy.
- Mixing deficiency diseases: scurvy (C), rickets (D), night blindness (A), anaemia (iron), goitre (iodine).
- Writing 'balanced diet means eating a lot'; it means **all nutrients in the right amounts**.
- Thinking water is not a nutrient or that proteins are the main energy source (carbohydrates are).
- Believing all packaged food is healthy; check the label for fat, sugar and salt.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET 3

Chapter 3: **Mindful Eating: A Path to a Healthy Body** | Class 6 Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** washing hands and vegetables	Hygiene.
2	**(c)** iodised salt	Iodised salt.
3	**(c)** eating raw citrus fruits	Heat reduces vitamin C.
4	**(c)** adds nutrients like iron or vitamins	Fortification.
5	**(a)** free from added sugar but may still have natural sugar	Natural sugar may remain.
6	**(c)** empty calories food	Sweets and fizzy drinks.
7	**(a)** calories from fats and sugars	Excess energy intake.
8	**(b)** fat and salt	Chips are fried and salted.
9	**(c)** A is true but R is false.	A is true; R is false because a single food cannot give all nutrients.
10	**(a)** Both A and R are true and R is the correct explanation of A.	Without enough iron the blood cannot make enough haemoglobin, so R explains A.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	It shows sodium or salt (1); They can choose low-salt food (1).	1+1
12	Iodine prevents goitre (1); Excess sodium raises blood pressure (1).	1+1
13	Fresh orange (1); It has vitamin C and fibre and no added sugar (1).	1+1
14	Food and water had little iodine (1); Iodised salt prevents it (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Breakfast gives energy for the day (1); Late snacks add excess calories (1); Regular timings keep digestion healthy (1).	1+1+1
16	Little physical activity (1); Foods rich in fat and sugar (1); Medical condition may be involved (1).	1+1+1
17	Extra food stored as fat (1); Strains organs (1); Can cause obesity (1).	1+1+1
	OR: Body becomes dehydrated (1); Wastes are not removed (1); Headache and tiredness (1).	1+1+1
18	Rich in fibre and minerals (1); Needs less water to grow (1); Good for local farmers (1).	1+1+1
	OR: Check the ingredients (1); Check sugar, salt and fat levels (1); Check expiry date (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) Vitamin C (1). (ii) Night blindness (1). (iii) Vitamin D (rickets) (1). (iv) Tanvi: carrot or papaya (vitamin A) (1); Joy: milk or eggs, with morning sunlight (1).	1+1+1+2
20	Plant protein: dal, soya (1); Animal protein: egg, fish, milk (1); Calcium: milk, ragi (1); Iron: spinach, meat (1); Mixed diets give all (1).	1+1+1+1+1
	OR: Not always true (1); Local pulses and vegetables are cheap and nutritious (1); Processed food may be costly but poor in nutrients (1); Balance matters more than price (1); Planning helps save money (1).	1+1+1+1+1

Mistakes to avoid:

- Saying iodine solution tests for proteins or fats; it tests only for **starch**.
- Writing that fibre gives energy; it helps the body remove waste but gives no energy.
- Mixing deficiency diseases: scurvy (C), rickets (D), night blindness (A), anaemia (iron), goitre (iodine).
- Writing 'balanced diet means eating a lot'; it means **all nutrients in the right amounts**.
- Thinking water is not a nutrient or that proteins are the main energy source (carbohydrates are).
- Believing all packaged food is healthy; check the label for fat, sugar and salt.
