CLASS 6 — SCIENCE · MEDIUM LEVEL CHAPTER TEST SET 1

Chapter 8: **A Journey through States of Water** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Medium level: multi-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A glass of water left in an open window for a week shows less water. This is because of: 1

(a) melting **(b)** condensation **(c)** evaporation **(d)** freezing

2. Cloud formation requires: 1

(a) freezing and melting **(b)** evaporation and condensation
(c) melting and freezing **(d)** boiling only

3. A farmer in a dry region wants to conserve water for irrigation. A good method is: 1

(a) cutting trees **(b)** flooding the field
(c) leaving taps open **(d)** drip irrigation

4. A beaker of water is placed on a heater. After some time bubbles form and water level falls. This is: 1

(a) boiling **(b)** freezing **(c)** condensation **(d)** melting

5. Which of these is correctly matched? 1

(a) water – gas **(b)** steam – liquid **(c)** ice – solid **(d)** vapour – solid

6. Which practice increases groundwater? 1

(a) cutting trees **(b)** cementing the entire ground
(c) rainwater harvesting **(d)** polluting rivers

7. Which of the following is correct for 100 °C? 1

(a) water freezes **(b)** ice melts **(c)** dew forms **(d)** water boils

8. A student heats ice in a beaker with a thermometer. The temperature stays at 0 °C while the ice melts because: 1

(a) thermometer is wrong **(b)** heat is used to change the state
(c) heater is off **(d)** ice is cold

9. Why should we plant trees to prevent floods and droughts? 1

(a) trees are tall **(b)** trees give wood
(c) roots hold soil and water **(d)** trees are green

10. If the air is already full of water vapour, the evaporation rate: 1

(a) stops completely always **(b)** doubles
(c) slows down **(d)** speeds up

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. Why does the temperature stay constant at 100 °C when water boils continuously? 2

12. Explain why ice cubes in a drink melt faster in a hot place. 2

13. How does a water cooler or matka keep water cold? 2

14. Why do we see mist on a bathroom mirror after a hot shower? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Describe the water cycle and name its stages. 3

16. Why do we get fresh water from rain though sea water is salty? 3

17. Give three advantages of storing water in dams. 3

OR

Explain with an experiment that evaporation causes cooling. 3

18. Explain how a sunny day and a cloudy day affect the drying of clothes. 3

OR

Why is boiling water before drinking useful? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Describe an experiment to show the effect of surface area, temperature and wind on evaporation. 5

OR

Describe how to prepare drinking water in an emergency using boiling and filtering. 5

20. Explain the formation of rain from sea water step by step. 5

OR

Describe how the sea, rivers, clouds and groundwater are connected in the water cycle. 5

END OF QUESTION PAPER — Total: 40 Marks
