CLASS 6 — SCIENCE · HARD LEVEL CHAPTER TEST SET 2

Chapter 8: **A Journey through States of Water** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A tap leaks 1 drop per second; if 20 drops make 1 mL, the leak in one hour is about: 1

(a) 18 mL **(b)** 3600 mL **(c)** 60 mL **(d)** 180 mL

2. A closed bottle with water and air is heated. What happens to the vapour? 1

(a) it turns to ice **(b)** it freezes **(c)** it increases **(d)** it vanishes

3. A closed jar of water kept in sunlight has droplets on the inner top. This indicates: 1

(a) melting **(b)** boiling
(c) evaporation and condensation **(d)** freezing

4. The rain gauge shows 5 cm of rain in an area of 1 m². The volume of water is: 1

(a) 5 L **(b)** 0.5 L **(c)** 500 L **(d)** 50 L

5. Why do plants release water vapour through leaves? 1

(a) to cool the Sun **(b)** to make rain
(c) transpiration part of the cycle **(d)** to eat

6. Which one of these best explains why steam burns are more serious than boiling water burns? 1

(a) steam is hotter than 100 °C only **(b)** steam is lighter
(c) steam is invisible **(d)** steam releases heat on condensing

7. Which of the following reasons explains the saltiness of sea water over time? 1

(a) salt is added by people
(b) rain contains salt
(c) clouds contain salt
(d) salts brought by rivers and left after evaporation

8. Why do dense forests receive more rain? 1

(a) wind stops **(b)** trees produce salt
(c) trees attract the sun **(d)** more transpiration adds moisture

9. **Assertion (A):** Droplets form on the outside of a glass of cold water. 1
Reason (R): The water leaks out through tiny holes in the glass.
Choose the correct option:

(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

10. **Assertion (A):** Condensation is the change of liquid water into water vapour. 1
Reason (R): Condensation takes place when water vapour is cooled.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. Explain why salty water is obtained from the sea but rain is fresh. 2

12. Why does the sea not become fuller each year though rivers flow into it? 2

13. A 1.5 L bottle of water is filled and frozen. Why does it bulge? 2

14. Why do we sprinkle water on the roof in summer to cool a house? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. A tap drips 1 drop per second. If 20 drops make 1 mL, how much water is wasted in a day? 3

16. Explain why a puddle on the road disappears after some hours of sunshine. 3

17. Why do clothes dry faster in a dryer than in the open on a cloudy day? 3

OR

Explain why heating a closed vessel with water for a long time cracks it. 3

18. How can a farmer reduce evaporation losses from the soil of a field? 3

OR

How is evaporation used in making papad, pickles or salt? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. **Case study.** While boiling milk in a closed pan, Rahul's mother lifted the lid and saw many drops of water on its lower side. Rahul also noticed that the steel jug of cold water kept on the table had water drops on its outside surface. 5
(i) Name the process that forms drops on the lid.
(ii) What is the gaseous form of water called?
(iii) Name the process that changes ice to water.
(iv) Explain how drops form on the cold jug.

20. Discuss the causes of water scarcity in India and propose a five-point action plan for a village. 5

OR

Compare underground water and surface water as sources with advantages and risks. 5

END OF QUESTION PAPER — Total: 40 Marks
