ANSWER KEY & MARKING SCHEME SET 1

Chapter 9: **Methods of Separation in Everyday Life** | Class 6 Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** handpicking	Pick with hands.
2	**(c)** insoluble	It settles.
3	**(b)** sea water	Contains salt.
4	**(b)** winnowing	Wind.
5	**(b)** soluble	It dissolves.
6	**(c)** distilled water	One substance.
7	**(d)** sieve	Net with holes.
8	**(d)** tiny holes	It allows liquid.
9	**(b)** winnowing	Wind.
10	**(d)** sedimentation	Settles.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Two or more things mixed (1); Like sand and salt (1).	1+1
12	Pouring off the liquid (1); Leaves sediment (1).	1+1
13	Beating or stirring cream or curd (1); Butter separates (1).	1+1
14	Separating husk using wind (1); Used for grains (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Sea water (1); Muddy water (1); Air (1).	1+1+1
16	Separating iron (1); Toys (1); Compass (1).	1+1+1
17	Winnows (1); Wind blows husk (1); Wheat falls (1).	1+1+1
	OR: Winnowing (1); Sieving (1); Filtration (1).	1+1+1
18	Let it stand (1); Pour off (1); Filter (1).	1+1+1
	OR: Add water (1); Filter (1); Evaporate (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Spread rice on a plate (1); Look carefully (1); Pick out the stones (1); Use hands (1); Clean rice remains (1).	1+1+1+1+1
	OR: Cut the crop (1); Thresh (1); Winnow (1); Collect grain (1); Store (1).	1+1+1+1+1
20	Use a magnet (1); Move it over mixture (1); Nails stick to magnet (1); Remove nails (1); Sand is left (1).	1+1+1+1+1
	OR: Evaporation: wet cloth dries (1); Water becomes vapour (1); Condensation: dew (1); Vapour becomes liquid (1); Both use temperature (1).	1+1+1+1+1

Mistakes to avoid:

- Choosing filtration for salt in water; dissolved salt passes through the filter, so **evaporation** is needed.
- Mixing **sedimentation** (settling) with **decantation** (pouring off the clear liquid).
- Mixing **threshing** (beating stalks to free grain) with winnowing (blowing away husk).
- Calling the liquid that passes through filter paper the residue; it is the **filtrate**.
- Using a magnet to separate sand or salt; only magnetic substances like iron are attracted.
- Believing that filtered or settled water is always safe to drink.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 9: **Methods of Separation in Everyday Life** | Class 6 Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** residue	Residue.
2	**(b)** sieving	Sieve.
3	**(c)** decantation	Pour off.
4	**(b)** filtrate	Filtrate.
5	**(d)** filtration	Filter paper.
6	**(b)** strainer	Filter.
7	**(b)** threshing	Threshing.
8	**(b)** evaporation	Heating.
9	**(d)** evaporation	Sun.
10	**(c)** water droplets	Condensation.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Separation with filter paper (1); Solids stay behind (1).	1+1
12	Beating stalks (1); Gets grains (1).	1+1
13	A net with small holes (1); Used for flour (1).	1+1
14	Water changing to vapour (1); Leaves salt (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Flour (1); Sand (1); Rice (1).	1+1+1
16	Salt (1); Sugar (1); Soda (1).	1+1+1
17	Remove leaves (1); Clear tea (1); Better drinking (1).	1+1+1
	OR: Tea (1); Muddy water (1); Juice (1).	1+1+1
18	Sand (1); Chalk (1); Stone (1).	1+1+1
	OR: Remove dirt (1); Remove dust (1); Clean food (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Heat the salt water (1); Water evaporates (1); Salt is left (1); Collect salt (1); Cool and store (1).	1+1+1+1+1
	OR: Sugar dissolves (1); Solution forms (1); Sugar is solute (1); Water is solvent (1); Sweet taste (1).	1+1+1+1+1
20	Keep still (1); Mud settles (1); Pour off clear water (1); Filter (1); Boil (1).	1+1+1+1+1
	OR: Tea leaves (1); Stones from rice (1); Flour (1); Cream (1); Dirty water (1).	1+1+1+1+1

Mistakes to avoid:

- Choosing filtration for salt in water; dissolved salt passes through the filter, so **evaporation** is needed.
- Mixing **sedimentation** (settling) with **decantation** (pouring off the clear liquid).
- Mixing **threshing** (beating stalks to free grain) with winnowing (blowing away husk).
- Calling the liquid that passes through filter paper the residue; it is the **filtrate**.
- Using a magnet to separate sand or salt; only magnetic substances like iron are attracted.
- Believing that filtered or settled water is always safe to drink.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 9: **Methods of Separation in Everyday Life** | Class 6 Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** sedimentation	Settles.
2	**(c)** magnet	Magnet.
3	**(b)** vapour	Evaporation.
4	**(c)** large	Large.
5	**(d)** churning	Spinning.
6	**(a)** solvent	Dissolves things.
7	**(d)** magnet	Magnet.
8	**(a)** two or more substances	Mixed.
9	**(a)** solute	Dissolves.
10	**(c)** clean water	Clean water.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Separating iron (1); From mixtures (1).	1+1
12	Settling of heavy particles (1); At the bottom (1).	1+1
13	Vapour changing to water (1); On cooling (1).	1+1
14	Liquid that dissolves (1); Water (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Stones from rice (1); Insects from grains (1); Dirt from dal (1).	1+1+1
16	Collect sea water (1); Let it evaporate (1); Collect salt (1).	1+1+1
17	Kill germs (1); Make safe (1); Avoid disease (1).	1+1+1
	OR: Salt making (1); Drying clothes (1); Cooking (1).	1+1+1
18	Sieve (1); Strainer (1); Magnet (1).	1+1+1
	OR: Sugar in tea (1); Salt in water (1); Soda in water (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Net with holes (1); Small pieces pass (1); Large stay (1); Used for flour (1); Separates sizes (1).	1+1+1+1+1
	OR: To remove dirt (1); To get pure substances (1); To get useful parts (1); For safety (1); For better use (1).	1+1+1+1+1
20	Handpicking: stones (1); Winnowing: husk (1); Sieving: flour (1); Filtration: tea (1); Magnet: iron (1).	1+1+1+1+1
	OR: Take filter paper (1); Fold it (1); Place in a funnel (1); Pour mixture (1); Residue stays (1).	1+1+1+1+1

Mistakes to avoid:

- Choosing filtration for salt in water; dissolved salt passes through the filter, so **evaporation** is needed.
- Mixing **sedimentation** (settling) with **decantation** (pouring off the clear liquid).
- Mixing **threshing** (beating stalks to free grain) with winnowing (blowing away husk).
- Calling the liquid that passes through filter paper the residue; it is the **filtrate**.
- Using a magnet to separate sand or salt; only magnetic substances like iron are attracted.
- Believing that filtered or settled water is always safe to drink.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
