THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 6 — SCIENCE · HARD LEVEL CHAPTER TEST SET 1

Chapter 10: **Living Creatures: Exploring their Characteristics** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A candle burns, melts, gives out waste gases and its flame responds to wind. Why is it still non-living? 1

(a) it makes light **(b)** it melts
(c) it does not grow or reproduce on its own **(d)** it is hot

2. Out of a tree, a bird and a pebble, which one is non-living? 1

(a) tree **(b)** pebble
(c) bird **(d)** both bird and tree

3. A dry seed lies unchanged in a packet for months but sprouts after being watered. This shows that: 1

(a) sprouting is random
(b) a living thing can stay inactive until conditions suit it
(c) water makes seeds alive from stone
(d) seeds are non-living

4. A student observes a crystal growing in a saturated solution. Which statement is true? 1

(a) the crystal grows by outside deposition, not from within
(b) it respires
(c) it is living
(d) it reproduces

5. Two groups of seeds are kept: Group A in water, group B dry. Only A sprouts. What is the conclusion? 1

(a) sprouting is random **(b)** water is needed for germination
(c) dry seeds are dead **(d)** seeds do not need water

6. A tadpole's tail disappears as it grows. This is an example of: 1

(a) reproduction **(b)** response to light
(c) change in body during growth **(d)** death

7. Which pair of observations would suggest that a dry-looking object is a living seed? 1

(a) it is hard and dry **(b)** it breaks when pressed
(c) it is brown and small **(d)** it swells and sprouts in water

8. In the experiment above, what is the controlled variable? 1

(a) water **(b)** germination
(c) dry state **(d)** type of seeds and temperature

9. **Assertion (A):** A stone is a non-living thing. 1
Reason (R): A stone does not grow, breathe or respond to changes around it.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

10. **Assertion (A):** Plants take in air through tiny pores called stomata. 1
Reason (R): Fish breathe with the help of gills.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. A student claims that a river is living because it flows and changes shape. Rebut the claim. 2

12. Why do dead leaves carry out no life process? 2

13. A student says 'all moving things are living'. Give two counterexamples. 2

14. Why do biologists use several characteristics rather than one to define life? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. A student claims that mushrooms are plants. Give three reasons why they are not. 3

16. Why can't we say that a seed is dead because it does not respire visibly? 3

17. Give three examples of how living things depend on each other. 3

OR

Design an experiment to show that germinating seeds produce heat. 3

18. A potted plant placed sideways soon curves upward. What does this show? 3

OR

Name three characteristics that a pebble lacks but a pea seedling has. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. **Case study.** In a garden in Shimla, Pooja saw a puppy drinking milk and a rose plant with a new bud. She also noticed a stone bench and a toy car. Her teacher asked her to separate the living from the non-living and to give reasons. 5
(i) Name one living thing in the story.
(ii) Name one non-living thing.
(iii) Which characteristic shows in the rose plant growing a new bud?
(iv) Why is the toy car non-living even though it can move?

20. Discuss with examples why it can be hard to decide whether a dry seed, a crystal and a flowing river are living. 5

OR

Explain with examples why living things need food, water and air. 5

END OF QUESTION PAPER — Total: 40 Marks
