ANSWER KEY & MARKING SCHEME SET 1

Chapter 11: **Nature's Treasures** | Class 6 Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** natural resources	Air, water, soil are natural resources.
2	**(a)** mixture of gases	Contains N2, O2 and others.
3	**(b)** crude oil	Obtained from under the ground.
4	**(b)** renewable	E.g. sunlight, wind.
5	**(d)** smoke from vehicles	Smoke contains harmful gases.
6	**(b)** petrol	Fuels and plastics are from petroleum.
7	**(d)** non-renewable	E.g. coal, petroleum.
8	**(b)** planting trees	Trees absorb gases.
9	**(c)** fuel (CNG, LPG)	Used for cooking and vehicles.
10	**(d)** sunlight	Sun's energy is always available.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Materials from nature that we use (1); Air and water (1).	1+1
12	Washing away of topsoil (1); By water or wind (1).	1+1
13	Reduce (1); Reuse and recycle (1).	1+1
14	Renewable: replenished quickly, e.g. wind (1); Non-renewable: limited, e.g. coal (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Nitrogen about 78 per cent (1); Oxygen about 21 per cent (1); Others about 1 per cent (1).	1+1+1
16	Give oxygen (1); Hold soil (1); Give shade and food (1).	1+1+1
17	Soil erosion (1); Less rain (1); Loss of homes of animals (1).	1+1+1
	OR: Oxygen is needed for respiration (1); Plants use carbon dioxide (1); Burning needs air (1).	1+1+1
18	Saves trees (1); Reduces waste (1); Saves energy (1).	1+1+1
	OR: Reuse: use old bottle again (1); Recycle: convert to new items (1); Reuse needs no processing (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Nitrogen 78 per cent (1); Oxygen 21 per cent (1); Carbon dioxide small (1); For breathing (1); For burning and photosynthesis (1).	1+1+1+1+1
	OR: Weathering of rocks (1); Humus from decay (1); Topsoil (1); Subsoil (1); Bedrock (1).	1+1+1+1+1
20	Plants grow in soil (1); Home to many organisms (1); Prevent erosion with trees (1); Terracing (1); Avoid overgrazing (1).	1+1+1+1+1
	OR: Give oxygen (1); Hold soil (1); Bring rain (1); Deforestation causes erosion (1); Animals lose habitats (1).	1+1+1+1+1

Mistakes to avoid:

- Swapping percentages: air is about **78 per cent nitrogen** and 21 per cent oxygen.
- Calling coal and petroleum renewable; they take millions of years to form.
- Writing that humus is made of rocks; it comes from decayed plants and animals.
- Thinking that soil erosion is the formation of soil; it is its **loss**.
- Saying that oxygen burns by itself; it only supports burning.
- Forgetting that wind, sunlight and water are renewable resources.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 11: **Nature's Treasures** | Class 6 Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** rocks	Weathering over a long time.
2	**(b)** mining	Digging from the Earth.
3	**(b)** coal	Coal takes millions of years to form.
4	**(c)** humus	Humus makes soil fertile.
5	**(a)** iron ore	Metals are extracted from ores.
6	**(c)** nitrogen	About 78 per cent.
7	**(b)** topsoil	It contains humus.
8	**(b)** electricity	Renewable energy.
9	**(a)** 21 per cent	About one fifth.
10	**(d)** loamy soil	It has a mix of sand, silt, clay and humus.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Planting trees (1); Terrace farming (1).	1+1
12	Respiration (1); Burning of fuels (1).	1+1
13	Nitrogen and oxygen (1); Carbon dioxide and others (1).	1+1
14	Coal (1); Petroleum (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Topsoil with humus (1); Subsoil with small stones (1); Bedrock below (1).	1+1+1
16	From dead plants and animals buried long ago (1); Heat and pressure over millions of years (1); Form coal and petroleum (1).	1+1+1
17	Rich in humus (1); Supports plant growth (1); Home to organisms (1).	1+1+1
	OR: Weathering by wind, water (1); Rocks break into small particles (1); Plant and animal remains add humus (1).	1+1+1
18	Coal: fuel, electricity (1); Petroleum: petrol, diesel (1); Plastics from petroleum (1).	1+1+1
	OR: Windmills (1); Sailing boats (1); Drying clothes (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Sunlight (1); Wind (1); Coal (1); Petroleum (1); Reason based on replenishing (1).	1+1+1+1+1
	OR: Rain waters soil (1); Wind carries water vapour (1); Soil stores water (1); Plants use all three (1); Pollution of one affects all (1).	1+1+1+1+1
20	Vehicles (1); Factories (1); Burning waste (1); Plant more trees (1); Use public transport (1).	1+1+1+1+1
	OR: Solar (1); Wind (1); Water (1); Do not run out (1); Cause less pollution (1).	1+1+1+1+1

Mistakes to avoid:

- Swapping percentages: air is about **78 per cent nitrogen** and 21 per cent oxygen.
- Calling coal and petroleum renewable; they take millions of years to form.
- Writing that humus is made of rocks; it comes from decayed plants and animals.
- Thinking that soil erosion is the formation of soil; it is its **loss**.
- Saying that oxygen burns by itself; it only supports burning.
- Forgetting that wind, sunlight and water are renewable resources.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 11: **Nature's Treasures** | Class 6 Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** give oxygen and wood and prevent erosion	Many benefits.
2	**(d)** oxygen	Living beings breathe oxygen.
3	**(a)** soil erosion	Loss of fertile soil.
4	**(c)** reduce, reuse, recycle	Standard conservation message.
5	**(b)** carbon dioxide	Photosynthesis uses carbon dioxide.
6	**(b)** roots hold the soil	Roots bind the soil.
7	**(b)** using an old bottle as a flower vase	Using again.
8	**(c)** wind	Wind is air in motion.
9	**(c)** coal	Formed from ancient organisms.
10	**(d)** making new paper from used paper	Reprocessing waste.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	A natural substance from the Earth (1); Iron ore (1).	1+1
12	Dark layer from decayed plants and animals (1); Makes soil fertile (1).	1+1
13	They are limited (1); They take millions of years to form (1).	1+1
14	It keeps blowing (1); It is not exhausted (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Causes: smoke, dust, vehicles (1); Effects: breathing problems (1); Smog and acid rain (1).	1+1+1
16	Many are limited (1); Future generations need them (1); Wastage harms nature (1).	1+1+1
17	Releases harmful gases (1); Pollutes air (1); Causes health problems (1).	1+1+1
	OR: Close taps (1); Harvest rain (1); Reuse water (1).	1+1+1
18	Renewable: wind, sunlight, water (1); Non-renewable: coal, petroleum, natural gas (1); Classified by replenishment (1).	1+1+1
	OR: Iron for tools (1); Aluminium for foil (1); Gold for jewellery (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Reduce: use less (1); Reuse: use again (1); Recycle: make new from old (1); Saves resources (1); Reduces waste (1).	1+1+1+1+1
	OR: Natural substances (1); Obtained by mining (1); Iron for tools (1); Limestone for cement (1); Conserve minerals (1).	1+1+1+1+1
20	From ancient plants and animals (1); Take millions of years (1); Coal, petroleum, gas (1); Used as fuels (1); Limited, so save (1).	1+1+1+1+1
	OR: Rain harvesting (1); Plant trees (1); Segregate waste (1); Save paper (1); Use less electricity (1).	1+1+1+1+1

Mistakes to avoid:

- Swapping percentages: air is about **78 per cent nitrogen** and 21 per cent oxygen.
- Calling coal and petroleum renewable; they take millions of years to form.
- Writing that humus is made of rocks; it comes from decayed plants and animals.
- Thinking that soil erosion is the formation of soil; it is its **loss**.
- Saying that oxygen burns by itself; it only supports burning.
- Forgetting that wind, sunlight and water are renewable resources.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
