CLASS 6 — SCIENCE · HARD LEVEL CHAPTER TEST SET 2

Chapter 11: **Nature's Treasures** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A farmer notes that crop yield fell year after year in the same field with the same crop. Probable reason: 1

(a) nutrient loss in soil **(b)** more worms
(c) more rain **(d)** more sunshine

2. Why would a sunny region benefit from solar panels? 1

(a) sunlight is limited there
(b) renewable energy is available there all year
(c) panels need no sunlight
(d) sunlight pollutes the air

3. A family uses a solar cooker instead of firewood. Which advantage is correct? 1

(a) more smoke **(b)** uses more fuel
(c) works only at night **(d)** no smoke and saves firewood

4. Which pair shows renewable resources only? 1

(a) petrol and water **(b)** wind and sunlight
(c) coal and wind **(d)** LPG and sunlight

5. Which pair is correctly matched? 1

(a) petrol – renewable **(b)** coal – fossil fuel; wind – renewable
(c) coal – renewable; wind – fossil fuel **(d)** sun – fossil

6. Which statement about resources is true? 1

(a) renewable resources can never be exhausted
(b) all resources are man-made
(c) a resource that regenerates may still be depleted by overuse
(d) non-renewable resources regenerate quickly

7. Why does the amount of carbon dioxide rise with deforestation and burning of fuels? 1

(a) rain adds it
(b) nitrogen turns into carbon dioxide
(c) fewer plants absorb it and burning adds it
(d) oxygen turns into carbon dioxide

8. Which action best shows the 'reuse' principle? 1

(a) burning **(b)** using old jars for storing spices
(c) throwing away **(d)** buying new

9. **Assertion (A):** Air contains about 21 per cent nitrogen. 1
Reason (R): Oxygen is needed for respiration.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

10. **Assertion (A):** Planting trees helps to prevent soil erosion. 1
Reason (R): The roots of trees hold the soil together.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. How does the burning of fossil fuels affect the air? 2

12. Why do some countries use a deposit system for bottles? 2

13. Explain why plastics are a problem though they are made from petroleum which is a natural resource. 2

14. What does using resources wisely mean? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Explain how an afforestation drive in a hill region would change soil, water and air. 3

16. Describe three ways that families can contribute to reducing pollution. 3

17. Why should we not waste electricity? 3

OR

Why must waste from mining be treated before disposal? 3

18. Explain how overgrazing leads to soil erosion. 3

OR

Explain how increasing population puts pressure on resources. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. **Case study.** Farmer Jagdish from Nashik noticed that on his sloping field the topsoil got washed away in heavy rain, leaving poor soil behind, while the neighbouring field with trees and grass stayed fertile. The agriculture officer advised planting trees and grass at the edges. 5
(i) What is the washing away of topsoil called?
(ii) Name the dark, rich layer of decayed matter in soil.
(iii) Which soil is best for growing crops?
(iv) How do trees and grass help to protect the soil?

20. Explain simple ways to check how clean the air is in your area. 5

OR

Describe the harmful effects of plastic waste thrown into rivers. 5

END OF QUESTION PAPER — Total: 40 Marks
