THE MASTERMIND COACHING CLASSES

CBSE / RBSE · Nursery – Class XII · Road No. 5, VKIA, Jaipur · 9887258679

CLASS VI — SCIENCE · FULL-YEAR PRACTICE PAPER

Annual Examination Pattern · Session 2026-27 · Full Syllabus · Chapters 1–12

Class: 6	Subject: Science	Set 01	Time: 2 Hours 30 Minutes	Max. Marks: 60

General Instructions:

1. All questions are compulsory.
2. This question paper has five sections A, B, C, D and E. Marks are indicated against each question.
3. Section A (Q. 1, parts I–XII) consists of multiple choice questions of 1 mark each.
4. Section B (Q. 2–5) consists of very short answer questions of 2 marks each.
5. Section C (Q. 6–8) consists of short answer questions of 3 marks each.
6. Section D (Q. 9–11) consists of long answer questions of 5 marks each.
7. Section E (Q. 12–15) consists of four case-based / source-based questions of 4 marks each (1 + 1 + 2).
8. There is no overall choice. However, internal choice is given in some questions. Only one of the choices in such questions is to be attempted.
9. Draw neat and labelled diagrams wherever required.

SECTION A — Multiple Choice Questions — 1 questions · 12 marks

Question 1 has twelve parts (I–XII). Each carries 1 mark.

1. From Question I–XII, choose the correct option.

I. Meena sees ants gathering near some spilled sugar and wonders, "Do ants prefer sugar to salt?" The best way to find out is to: 1

(a) read a story about ants
(b) ask her friends what they think
(c) place equal amounts of sugar and salt at equal distances from the ants and watch where they go
(d) put only sugar and look at the ants

II. A plant has a thin, weak stem and holds a fence with its tendrils to grow upwards. It is a: 1

(a) shrub (b) tree (c) climber (d) herb

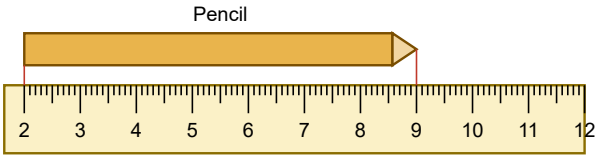

III. Ravi's gums bleed often. The doctor advises more amla, lemon and guava. These foods mainly contain: 1

(a) vitamin C (b) vitamin D (c) iron (d) starch

IV. A bar magnet is hung freely from a thread. It comes to rest pointing roughly: 1

(a) in any direction (b) up–down
(c) north–south (d) east–west

V. The left end of a ruler is broken and its first visible mark is 2 cm. A pencil starts at the 2 cm mark and ends at 9 cm. The length of the pencil is: 1

(a) 7 cm (b) 9 cm (c) 2 cm (d) 11 cm

VI. A window pane should be made of a material that is: 1

(a) transparent (b) rough (c) magnetic (d) opaque

VII. A clinical thermometer is given a sharp jerk before use, so that: 1

(a) the mercury becomes hotter (b) the bulb breaks
(c) the mercury level falls below 35 °C (d) the scale gets cleaned

VIII Wet clothes will dry the fastest on a: 1

(a) cold, humid and still day (b) hot, dry and windy day

(c) cold and foggy day (d) cool and rainy day

IX After harvest, a farmer separates light husk from heavy wheat grains by dropping the mixture from a height on a windy day. This method is: 1

(a) filtration (b) evaporation (c) winnowing (d) sieving

X A camel can live for many days in a desert with little water. This is an example of: 1

(a) reproduction (b) adaptation (c) growth (d) migration only

XI Which of the following is a renewable natural resource? 1

(a) Coal (b) Petroleum (c) Wind (d) Natural gas

XII On a clear night, Aarav sees a bright point of light that shines steadily without twinkling. It is most likely a: 1

(a) planet (b) comet (c) galaxy (d) star

SECTION B — Very Short Answer Questions — 4 questions · 8 marks

2 marks each (about 30–40 words).

2. Name the nutrient needed for growth and repair of the body. Give two food sources of it. **2**

3. Convert: (i) 2.5 km into metres (ii) 350 cm into metres. **2**

OR

Name the type of motion in each case: (i) a child on a swing (ii) a car moving on a straight road.

4. Why do puddles of water on the road disappear on a sunny day? Name the process. **2**

5. Write two characteristics of living things with one example of each. **2**

SECTION C — Short Answer Questions — 3 questions · 9 marks

3 marks each (about 60 words).

6. Classify the following plants as herb, shrub or tree and write one difference between a shrub and a tree: tulsi, rose, mango. **3**

7. Pooja sorted some objects: glass tumbler, eraser, steel spoon, wooden ruler. (i) Which is transparent? (ii) Which has lustre (shine)? (iii) Name one property that makes steel suitable for making a spoon. **3**

8. Name the best method of separating: (i) sand from water (ii) salt from salt solution (iii) iron filings from sand. **3**

SECTION D — Long Answer Questions — 3 questions · 15 marks

5 marks each.

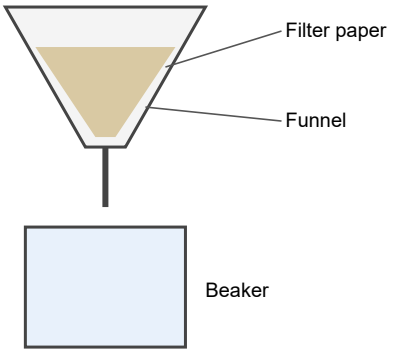

9. Match the nutrient in Column I with the deficiency problem in Column II. **5**

Column I	Column II
(a) Vitamin A	(i) Bleeding gums (scurvy)
(b) Vitamin C	(ii) Goitre
(c) Vitamin D	(iii) Weak bones (rickets)
(d) Iron	(iv) Night blindness
(e) Iodine	(v) Anaemia

10. A mixture contains salt, sand and iron filings. Describe the steps to separate all three components. **5**

OR

(a) Name the apparatus shown in the figure and the process. (b) What is the residue and what is the filtrate if muddy water is poured through it? (c) Why do we use a filter paper?

11. Describe an activity to find out which of these objects are attracted by a magnet: iron nail, plastic comb, copper coin, steel key, rubber band. **5**

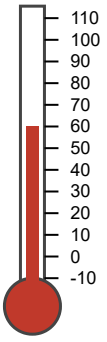

OR

Describe any five properties of a magnet.

SECTION E — Case-based / Source-based Questions — 4 questions · 16 marks

Read the cases carefully and answer. Each question carries 4 marks.

12. In a science lab Rohit dipped a laboratory thermometer in a beaker of hot water for the first time. The figure shows the thermometer reading just after he took it out of the heat source.

(a) What is the temperature shown in the figure? 1

(b) Name the unit in which the temperature is measured. 1

(c) Rohit wants to measure his body temperature. Why should he not use this thermometer? 2

OR

(d) State two precautions while using a laboratory thermometer.

13. In Rajasthan, the villagers of a dry village built a johad (small earthen check dam) to store rainwater. Within two years the water level of their wells rose, and the fields became green again. The village also protects its sacred groves (orans) and does not cut the trees.

(a) Name the natural resource conserved by the johad. 1

(b) Name one more natural resource the villagers are protecting. 1

(c) How did the johad help raise the water level in the wells? 2

OR

(d) Suggest two things students can do at home to save water.

14. The students of Class 6 watched the sky after sunset for three nights. On the first night the Moon looked like a thin bright curve; a few nights later more of it was bright. They also noticed that one bright, non-twinkling object stayed near the Moon.

(a) What are the different shapes of the bright part of the Moon called? 1

(b) Is the Moon a star? Give a reason. 1

(c) Why does the Moon look different on different nights? 2

OR

(d) Name the day when the Moon is not visible and the day when the full Moon is seen.

15. In the salt pans of Sambhar Lake in Rajasthan, salty water is collected in shallow pits and left in the hot Sun. After some days white salt crystals are seen at the bottom of the pits.

(a) Name the process by which water leaves the pits. 1

(b) Why are the pits made shallow and kept in the Sun? 1

(c) Name the substance that remains behind when water evaporates. 2

OR

(d) Describe in words what happens to this water vapour after it leaves the pits.
