THE MASTERMIND COACHING CLASSES

CBSE / RBSE · Nursery – Class XII · Road No. 5, VKIA, Jaipur · 9887258679

CLASS VI — SCIENCE · FULL-YEAR PRACTICE PAPER

Annual Examination Pattern · Session 2026-27 · Full Syllabus · Chapters 1–12

Class: 6	Subject: Science	Set 02	Time: 2 Hours 30 Minutes	Max. Marks: 60

General Instructions:

1. All questions are compulsory.
2. This question paper has five sections A, B, C, D and E. Marks are indicated against each question.
3. Section A (Q. 1, parts I–XII) consists of multiple choice questions of 1 mark each.
4. Section B (Q. 2–5) consists of very short answer questions of 2 marks each.
5. Section C (Q. 6–8) consists of short answer questions of 3 marks each.
6. Section D (Q. 9–11) consists of long answer questions of 5 marks each.
7. Section E (Q. 12–15) consists of four case-based / source-based questions of 4 marks each (1 + 1 + 2).
8. There is no overall choice. However, internal choice is given in some questions. Only one of the choices in such questions is to be attempted.
9. Draw neat and labelled diagrams wherever required.

SECTION A — Multiple Choice Questions — 1 questions · 12 marks

Question 1 has twelve parts (I–XII). Each carries 1 mark.

1. From Question I–XII, choose the correct option.

I. Sunita thinks, "Plants kept in sunlight grow taller than plants kept in the dark." In the scientific method this statement is a: 1

(a) conclusion (b) hypothesis (c) result (d) measurement

II. Which of the following animal–habitat pairs is correctly matched? 1

(a) Camel – desert (b) Penguin – grassland
(c) Fish – forest floor (d) Polar bear – desert

III. Which of the following foods is the best source of dietary fibre (roughage)? 1

(a) Sugar and jaggery (b) Vegetables and whole-wheat chapati
(c) Fried samosa (d) Butter and ghee

IV. Two bar magnets P and Q are placed as shown. They will: 1

(a) not affect each other (b) repel each other
(c) lose their magnetism (d) attract each other

V. The most suitable unit for expressing the thickness of a coin is the: 1

(a) millimetre (b) metre (c) hour (d) kilometre

VI. Salt disappears when stirred in water but sand does not. This shows that salt is: 1

(a) lustrous (b) soluble in water
(c) magnetic (d) transparent

VII. A steel spoon is left in a cup of hot tea. After some time the handle becomes warm. Heat reaches the handle by: 1

(a) melting (b) conduction (c) condensation (d) evaporation

VIII Drops of water appear on the outside of a glass filled with ice-cold water. This happens because: 1

(a) the glass sweats like skin
(b) ice melts and passes through the glass
(c) water leaks through the glass
(d) water vapour in air condenses on the cold glass

IX Muddy pond water is left undisturbed. The mud settles down and the clear water is then poured into another vessel. The two methods used are: 1

(a) winnowing and sieving (b) evaporation and churning
(c) sedimentation and decantation (d) magnetic separation and filtration

X Which of the following shows 'response to stimulus'? 1

(a) A pebble rolls down a slope
(b) Ice melts in sunlight
(c) A touch-me-not plant folds its leaves when touched
(d) A cloud floats in the sky

XI Which of the following activities helps in conserving soil on a hill slope? 1

(a) Digging up the slope (b) Planting trees and terrace farming
(c) Cutting trees for fuel (d) Burning dry leaves

XII The star nearest to the Earth is the: 1

(a) Sun (b) Pole Star (c) Sirius (d) Moon

SECTION B — Very Short Answer Questions — 4 questions · 8 marks

2 marks each (about 30–40 words).

2. List two habits that a good scientist should have. **2**

3. Name two uses of magnets in daily life. **2**

OR

How can you find the poles of an unmarked bar magnet using another bar magnet whose N pole is marked?

4. Give two examples each of materials that are (i) soluble in water and (ii) insoluble in water. **2**

5. Name the centre of our solar system and write the names of any two planets, one nearer and one farther from it. **2**

SECTION C — Short Answer Questions — 3 questions · 9 marks

3 marks each (about 60 words).

6. Dev eats only rice, potatoes and sugary sweets every day. (i) Which nutrient does he get mostly? (ii) Name one nutrient he is missing. (iii) Suggest two foods to add. **3**

7. Write the steps for measuring the temperature of hot water with a laboratory thermometer. **3**

8. Name three natural resources. Why should we use them wisely? Write one way of doing so. **3**

SECTION D — Long Answer Questions — 3 questions · 15 marks

5 marks each.

9. Describe how you can measure the length of a curved line (such as a road on a map) with the help of a thread and a ruler. **5**

OR

Convert (i) 4 m into cm (ii) 250 cm into m (iii) 3.2 km into m (iv) 7 cm into mm (v) 4500 m into km.

10. Draw or describe the water cycle and name its main stages. **5**

OR

Explain any five factors or conditions that make evaporation of water faster, giving a daily-life example for each of two.

11. Complete the given sentences (choose from the words in the box): **(habitat, adaptation, herb, tree, shrub)** **5**

i. The place where a plant or animal lives is its _____.
ii. A feature that helps a living thing survive in its surroundings is an _____.
iii. A small plant with a soft green stem, like coriander, is a _____.
iv. A plant with a hard woody trunk and many branches high above the ground is a _____.
v. A plant with many woody stems growing from the base, like hibiscus, is a _____.

SECTION E — Case-based / Source-based Questions — 4 questions · 16 marks

Read the cases carefully and answer. Each question carries 4 marks.

12. Rohit has two bar magnets, P and Q. He also has an iron nail, a plastic scale and a steel needle. When he brings the magnet near these things, the nail and needle stick to it but the plastic scale does not. He then hangs magnet P freely with a thread and finds that one end always points towards the North.

(a) Name two magnetic materials from the above case. 1

(b) Which pole of the freely hanging magnet points towards the North? 1

(c) What will happen if Rohit brings the S pole of magnet Q near the S pole of magnet P? Give a reason. 2

OR

(d) Why is a magnetic compass useful for a traveller?

13. In Grandmother's kitchen, many separations take place. Rice is checked for tiny stones, tea is poured through a strainer, and cream is separated from curd by churning it into butter.

(a) Which method is used to remove stones from rice? 1

(b) Name the device used to separate tea leaves from tea. 1

(c) What happens when curd is churned? Name the method. 2

OR

(d) Name the method you would use to separate salt from sea-water and explain in one line.

14. In the Thar desert, a cactus has thick, fleshy stems that store water, its leaves are tiny spines, and its roots spread wide near the surface. A camel has long eyelashes, wide padded feet and a hump of fat.

(a) What is the habitat described here? 1

(b) Name the part of a cactus that stores water. 1

(c) How do the spines help the cactus? 2

OR

(d) Explain how wide padded feet help a camel.

15. In a school mid-day meal in Jaipur, the cook prepares dal, roti, mixed vegetables, rice and a bowl of curd. A banana is given as dessert on Fridays. The teacher says it is a balanced meal.

(a) Name one food from the meal that is rich in proteins. 1

(b) Which food in the meal gives mainly carbohydrates? 1

(c) What is a balanced diet? 2

OR

(d) Why is eating too many fried and packaged snacks not good for children?
