ANSWER KEY & MARKING SCHEME SET 1

Chapter 1: **Locating Places on the Earth** | Class 6 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** map	A representation of a place
2	**(c)** south-west	Between two cardinal directions
3	**(b)** parallels of latitude	Circles around the Earth
4	**(b)** atlas	Used in geography
5	**(b)** south-west	Diagonally opposite
6	**(a)** meridians	Run from pole to pole
7	**(a)** physical maps	Natural features
8	**(b)** symbols	The map's language
9	**(d)** Greenwich	Near London
10	**(a)** political maps	Man-made divisions

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Drawing of an area on a flat surface (1); Seen from above (1).	1+1
12	North and south (1); East and west (1).	1+1
13	Longitude 0 degrees (1); Passes through Greenwich (1).	1+1
14	Collection of maps (1); In book form (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Physical shows natural features (1); Political shows boundaries (1); Different uses (1).	1+1+1
16	North-south lines (1); Half circles (1); Meet at poles (1).	1+1+1
17	Direction arrow (1); Buildings (1); Key (1).	1+1+1
	OR: Distance by scale (1); Direction by arrow (1); Symbols for features (1).	1+1+1
18	Agreed in 1884 (1); For common reference (1); World time (1).	1+1+1
	OR: Northern and Southern by Equator (1); Eastern and Western by Prime Meridian (1); Four parts together (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Physical (1); Political (1); Thematic (1); Uses (1); Examples (1).	1+1+1+1+1
	OR: Direction arrow (1); Scale (1); Measure (1); Convert (1); Example (1).	1+1+1+1+1
20	Distance (1); Scale (1); Direction (1); Symbols (1); Example (1).	1+1+1+1+1
	OR: Survey of India (1); Symbols (1); Standards (1); Uses (1); Importance (1).	1+1+1+1+1

Mistakes to avoid:

- Mixing up **latitude** and **longitude**: latitudes are east-west parallels measured north or south of the Equator; longitudes are north-south meridians measured east or west of the Prime Meridian.
- Saying meridians are parallel to each other. Only **parallels of latitude** are parallel; meridians meet at the poles.
- Writing a scale answer without converting: for 1 cm = 5 km, a 4 cm line is *4 x 5 = 20 km* (multiply), and real distance to map distance needs *division*.
- Getting the time difference backwards: places to the **east** are *ahead* in time and places to the west are behind; each 15° is 1 hour.
- Forgetting the direction letters (N, S, E, W) with degrees, e.g. writing 20° instead of 20°N, or calling the Prime Meridian a latitude.
- Confusing a **map**, an **atlas** and a **globe**: a map is flat, an atlas is a collection of maps, a globe is a spherical model of the Earth.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 1: **Locating Places on the Earth** | Class 6 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** Survey of India	Prepares official maps
2	**(c)** 0 degrees	Zero longitude
3	**(a)** thematic maps	Special-purpose maps
4	**(b)** a sphere	Slightly flattened at the poles
5	**(a)** four parts	Quadrants
6	**(d)** distance, direction and symbols	Needed to read a map
7	**(a)** globe	Spherical model
8	**(d)** coordinates of a place	Exact location
9	**(c)** find real distances from distances on the map	Ratio of map to ground
10	**(d)** Equator	Latitude 0 degrees

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Imaginary line at 0 degrees latitude (1); Divides Earth into two hemispheres (1).	1+1
12	Model of the Earth (1); Shows its spherical shape (1).	1+1
13	Distance (1); Direction and symbols (1).	1+1
14	Distance north or south of the Equator (1); Measured in degrees (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	6 x 5 (1); 30 km (1); Units km (1).	1+1+1
16	Latitude north/south (1); Longitude east/west (1); Crossing point (1).	1+1+1
17	Curved surface (1); Distortion (1); Orange-peel example (1).	1+1+1
	OR: Short drawings (1); Save space (1); Standard meaning (1).	1+1+1
18	Passed through Ujjayini (1); Called madhya rekha (1); Used by astronomers (1).	1+1+1
	OR: Find places (1); Plan travel (1); Study the world (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Equator (1); Parallels (1); Meridians (1); Prime Meridian (1); Coordinates (1).	1+1+1+1+1
	OR: Latitude (1); Longitude (1); Crossing (1); Examples (1); Uses today (1).	1+1+1+1+1
20	Shape (1); Accuracy (1); Distortion (1); Use (1); Limits (1).	1+1+1+1+1
	OR: Hemispheres (1); Quadrants (1); Names (1); Examples (1); Importance (1).	1+1+1+1+1

Mistakes to avoid:

- Mixing up **latitude** and **longitude**: latitudes are east-west parallels measured north or south of the Equator; longitudes are north-south meridians measured east or west of the Prime Meridian.
- Saying meridians are parallel to each other. Only **parallels of latitude** are parallel; meridians meet at the poles.
- Writing a scale answer without converting: for 1 cm = 5 km, a 4 cm line is *4 x 5 = 20 km* (multiply), and real distance to map distance needs *division*.
- Getting the time difference backwards: places to the **east** are *ahead* in time and places to the west are behind; each 15° is 1 hour.
- Forgetting the direction letters (N, S, E, W) with degrees, e.g. writing 20° instead of 20°N, or calling the Prime Meridian a latitude.
- Confusing a **map**, an **atlas** and a **globe**: a map is flat, an atlas is a collection of maps, a globe is a spherical model of the Earth.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 1: **Locating Places on the Earth** | Class 6 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** Ujjayini (Ujjain)	Madhya rekha
2	**(d)** 40 m	4 x 10
3	**(c)** 0 degrees	The starting line of latitude
4	**(d)** 1 hour	360/24 = 15
5	**(a)** north	Direction indicator
6	**(a)** 90 degrees N	Top of the globe
7	**(b)** 24 hours	Causes day and night
8	**(a)** north, east, south and west	Main directions
9	**(d)** north or south of the Equator	In degrees
10	**(b)** poles	Circles shrink

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Latitude and longitude of a place (1); Fix exact location (1).	1+1
12	Ratio of map distance to real distance (1); Helps find actual distances (1).	1+1
13	Distance east or west of the Prime Meridian (1); Measured in degrees (1).	1+1
14	One hour (1); Because 360/24 = 15 (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Spherical (1); No distortion (1); True shapes (1).	1+1+1
16	360 degrees in 24 hours (1); 15 degrees per hour (1); East is ahead (1).	1+1+1
17	Shows directions (1); Cardinal and intermediate (1); Helps orientation (1).	1+1+1
	OR: Imaginary east-west lines (1); Parallel to Equator (1); Smaller towards poles (1).	1+1+1
18	Maps in one book (1); Different regions (1); Quick reference (1).	1+1+1
	OR: Symbols (1); Colours (1); Scale (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Rotation (1); 24 hours (1); 15 degrees (1); Time zones (1); Example (1).	1+1+1+1+1
	OR: Travel (1); Planning (1); Study (1); Disasters (1); Navigation (1).	1+1+1+1+1
20	Greenwich (1); 1884 (1); Reference (1); Time (1); India's earlier meridian (1).	1+1+1+1+1
	OR: Choose area (1); Direction (1); Scale (1); Symbols (1); Key (1).	1+1+1+1+1

Mistakes to avoid:

- Mixing up **latitude** and **longitude**: latitudes are east-west parallels measured north or south of the Equator; longitudes are north-south meridians measured east or west of the Prime Meridian.
- Saying meridians are parallel to each other. Only **parallels of latitude** are parallel; meridians meet at the poles.
- Writing a scale answer without converting: for 1 cm = 5 km, a 4 cm line is *4 x 5 = 20 km* (multiply), and real distance to map distance needs *division*.
- Getting the time difference backwards: places to the **east** are *ahead* in time and places to the west are behind; each 15° is 1 hour.
- Forgetting the direction letters (N, S, E, W) with degrees, e.g. writing 20° instead of 20°N, or calling the Prime Meridian a latitude.
- Confusing a **map**, an **atlas** and a **globe**: a map is flat, an atlas is a collection of maps, a globe is a spherical model of the Earth.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
