ANSWER KEY & MARKING SCHEME SET 1

Chapter 1: **Locating Places on the Earth** | Class 6 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** 175 km	7 x 25
2	**(b)** Southern and Western hemispheres	Coordinates
3	**(b)** it is a rough drawing	Purpose
4	**(b)** 5 cm	150 / 30
5	**(a)** 2 pm	30/15 = 2 hours ahead
6	**(c)** to find their position on the open sea	Navigation
7	**(c)** 6 km	3 x 2
8	**(b)** 9 am	45/15 = 3 hours behind
9	**(b)** everyone can read them	Standardisation
10	**(a)** south	N, E, S

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	8 x 20 (1); 160 km (1).	1+1
12	Earth rotates west to east (1); East meets Sun first (1).	1+1
13	Sun rises in east (1); Face east to know others (1).	1+1
14	Curved surface (1); Flat paper (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	To measure real distances (1); 1 cm = 10 km (1); 6 cm = 60 km (1).	1+1+1
16	Large-scale: small area, more detail (1); Small-scale: large area, less detail (1); Examples (1).	1+1+1
17	Maximum latitude (1); Top of globe (1); All meridians meet (1).	1+1+1
	OR: Parallels (1); Meridians (1); Crossing points give location (1).	1+1+1
18	Short signs (1); Standard meaning (1); Space saving (1).	1+1+1
	OR: Equator: north/south (1); Prime Meridian: east/west (1); Four sections (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Scale (1); Direction (1); Symbols (1); Example (1); Calculation (1).	1+1+1+1+1
	OR: Latitude and longitude (1); GPS (1); Navigation (1); Maps apps (1); Safety (1).	1+1+1+1+1
20	Parallels (1); Meridians (1); Equator (1); Prime Meridian (1); Length and spacing (1).	1+1+1+1+1
	OR: Early maps (1); Greenwich 1884 (1); India's meridian (1); Reason (1); Importance (1).	1+1+1+1+1

Mistakes to avoid:

- Mixing up **latitude** and **longitude**: latitudes are east-west parallels measured north or south of the Equator; longitudes are north-south meridians measured east or west of the Prime Meridian.
- Saying meridians are parallel to each other. Only **parallels of latitude** are parallel; meridians meet at the poles.
- Writing a scale answer without converting: for 1 cm = 5 km, a 4 cm line is *4 x 5 = 20 km* (multiply), and real distance to map distance needs *division*.
- Getting the time difference backwards: places to the **east** are *ahead* in time and places to the west are behind; each 15° is 1 hour.
- Forgetting the direction letters (N, S, E, W) with degrees, e.g. writing 20° instead of 20°N, or calling the Prime Meridian a latitude.
- Confusing a **map**, an **atlas** and a **globe**: a map is flat, an atlas is a collection of maps, a globe is a spherical model of the Earth.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 1: **Locating Places on the Earth** | Class 6 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(c)** east of Greenwich	The Sun rises earlier there
2	**(a)** north-west	Opposite
3	**(a)** south-west of the school	Opposite direction
4	**(c)** the Earth is round	Shape
5	**(a)** parallels are equally spaced	Roughly 111 km
6	**(a)** it is also spherical so there is no distortion	Representation
7	**(b)** they are half circles from pole to pole	Geometry
8	**(a)** 1 hour ahead	Rule of 15
9	**(a)** they are easy to carry and show detail	Portability
10	**(a)** a thematic map	Specific information

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Shows one theme (1); e.g. rainfall (1).	1+1
12	It is curved (1); Distortion (1).	1+1
13	Explains symbols (1); Helps reading (1).	1+1
14	Four quadrants (1); Reference lines (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Left is west (1); Right is east (1); Back is south (1).	1+1+1
16	Ujjayini (1); Madhya rekha (1); Used for calculation (1).	1+1+1
17	Changes in boundaries (1); New roads and cities (1); Accuracy (1).	1+1+1
	OR: 15 degrees per hour (1); East ahead (1); West behind (1).	1+1+1
18	Index (1); Page number (1); Grid reference (1).	1+1+1
	OR: Finding way (1); Planning (1); Building design (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	360 and 24 (1); 15 per hour (1); East ahead (1); Example (1); Limits (1).	1+1+1+1+1
	OR: Scale 1 cm = 5 km (1); 14 x 5 (1); 70 km (1); Method (1); Check (1).	1+1+1+1+1
20	Shape (1); Details (1); Portability (1); Distortion (1); Use (1).	1+1+1+1+1
	OR: Hemispheres (1); Quadrants (1); Examples (1); Names (1); Significance (1).	1+1+1+1+1

Mistakes to avoid:

- Mixing up **latitude** and **longitude**: latitudes are east-west parallels measured north or south of the Equator; longitudes are north-south meridians measured east or west of the Prime Meridian.
- Saying meridians are parallel to each other. Only **parallels of latitude** are parallel; meridians meet at the poles.
- Writing a scale answer without converting: for 1 cm = 5 km, a 4 cm line is *4 x 5 = 20 km* (multiply), and real distance to map distance needs *division*.
- Getting the time difference backwards: places to the **east** are *ahead* in time and places to the west are behind; each 15° is 1 hour.
- Forgetting the direction letters (N, S, E, W) with degrees, e.g. writing 20° instead of 20°N, or calling the Prime Meridian a latitude.
- Confusing a **map**, an **atlas** and a **globe**: a map is flat, an atlas is a collection of maps, a globe is a spherical model of the Earth.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 1: **Locating Places on the Earth** | Class 6 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** the time at 0 degrees longitude	World standard
2	**(d)** a smaller area in greater detail	Scale
3	**(d)** a political map	Boundaries and cities
4	**(c)** west to east	Hence the Sun rises in the east
5	**(c)** the Atlantic Ocean off Africa	Equator meets Prime Meridian
6	**(b)** it is a real replica of the Earth	Maps are representations
7	**(d)** 15	360/24
8	**(b)** Northern and Eastern hemispheres	Coordinates
9	**(a)** interpret symbols and colours	Legend
10	**(a)** to locate places exactly	Grid system

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Not portable (1); Small detail (1).	1+1
12	60/15 = 4 (1); 4 pm (1).	1+1
13	Common reference (1); Time reckoning (1).	1+1
14	Rough hand-drawn map (1); No exact scale (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Shape (1); Portability (1); Accuracy (1).	1+1+1
16	12 x 5 (1); 60 km (1); Units (1).	1+1+1
17	Show risk zones (1); Plan rescue (1); Evacuation routes (1).	1+1+1
	OR: Blue for water (1); Green for plains (1); Brown for mountains (1).	1+1+1
18	Find 28 degrees N parallel (1); Find 77 degrees E meridian (1); Crossing (1).	1+1+1
	OR: GPS (1); Real-time (1); Zoom (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Physical (1); Political (1); Thematic (1); Sketch (1); Uses (1).	1+1+1+1+1
	OR: Route (1); Distance (1); Direction (1); Time (1); Symbols (1).	1+1+1+1+1
20	Title (1); Key (1); Scale (1); Direction (1); Example (1).	1+1+1+1+1
	OR: Many maps (1); Index (1); Comparison (1); Different themes (1); Convenience (1).	1+1+1+1+1

Mistakes to avoid:

- Mixing up **latitude** and **longitude**: latitudes are east-west parallels measured north or south of the Equator; longitudes are north-south meridians measured east or west of the Prime Meridian.
- Saying meridians are parallel to each other. Only **parallels of latitude** are parallel; meridians meet at the poles.
- Writing a scale answer without converting: for 1 cm = 5 km, a 4 cm line is *4 x 5 = 20 km* (multiply), and real distance to map distance needs *division*.
- Getting the time difference backwards: places to the **east** are *ahead* in time and places to the west are behind; each 15° is 1 hour.
- Forgetting the direction letters (N, S, E, W) with degrees, e.g. writing 20° instead of 20°N, or calling the Prime Meridian a latitude.
- Confusing a **map**, an **atlas** and a **globe**: a map is flat, an atlas is a collection of maps, a globe is a spherical model of the Earth.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
