THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 6 — SOCIAL SCIENCE · HARD LEVEL CHAPTER TEST SET 3

Chapter 1: **Locating Places on the Earth** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A sketch map is drawn from a school gate to a market with a river in between. Which feature is essential? 1

(a) colour only **(b)** direction and key
(c) decoration only **(d)** title only

2. Why can the North Pole not have a single longitude? 1

(a) it is warm **(b)** it has no latitude
(c) it is in the ocean **(d)** all meridians meet there

3. If a map shows a north arrow pointing to the bottom of the page, then 1

(a) the map has no direction **(b)** the top of the page is south
(c) the map is wrong **(d)** the top of the page is north

4. Why is the term 'flat Earth' contradicted by evidence like ships disappearing hull first? 1

(a) no curvature **(b)** straight horizon
(c) curved surface of the Earth **(d)** horizon is a line

5. Why does the Equator have the longest circle among the parallels? 1

(a) it is shortest **(b)** the Earth bulges most at its middle
(c) it is closest to the Sun **(d)** it is a straight line

6. The advantage of GPS over a paper map is 1

(a) no need of signals **(b)** no coordinates
(c) real-time position through satellites **(d)** no need of power

7. A traveller without a map wants to find north. Which instrument helps most? 1

(a) a thermometer **(b)** a barometer
(c) a magnetic compass **(d)** a rain gauge

8. A student claims a globe shows all places in true size and shape. A weakness in this claim is 1

(a) globes are flat **(b)** globes are small and show little detail
(c) globes have no poles **(d)** globes are distorted

9. **Assertion (A):** A place at 60°E longitude is ahead of Greenwich time. 1
Reason (R): The Earth rotates from west to east.
Choose the correct option:

(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

10. **Assertion (A):** A globe shows the shape of the Earth more truly than a flat map. 1
Reason (R): A globe is a spherical model of the Earth.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. What is the time at 105 degrees E when it is noon at Greenwich? 2

12. What would happen without latitude and longitude? 2

13. Why do climates differ along the same meridian? 2

14. Why is the Equator called 0 degrees? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Explain how latitude influences climate. 3

16. Explain the role of latitude and longitude in ship and aircraft navigation. 3

17. Explain what 'distortion' means in a map projection. 3

OR

Analyse why detailed local maps need large scale. 3

18. Explain how the Earth's tilt and rotation cause day and night and seasons (basic idea). 3

OR

Explain how coordinates improve emergency response. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. **Case study.** A teacher gives the coordinates of two places: Place P is at 20°N, 30°E and Place Q is at 20°S, 30°E. She asks the class to locate them on a globe. 5
(i) In which hemispheres (north-south and east-west) does P lie?
(ii) In which north-south hemisphere does Q lie?
(iii) Do P and Q lie on the same meridian?
(iv) Are P and Q on the same parallel of latitude? Explain how far apart they are in degrees of latitude.

20. Explain how maps are used in different fields like planning, defence and disaster management. 5

OR

Compare thematic, political and physical maps in terms of purpose and design. 5

END OF QUESTION PAPER — Total: 40 Marks
