Mistakes to avoid:

- Writing that land covers about three-fourths of the Earth. **Water** covers about 71 per cent and land about 29 per cent.
- Naming only three or four oceans. The five oceans are the Pacific, Atlantic, Indian, Southern and Arctic; the Pacific is the largest and the Arctic the smallest.
- Confusing **ocean**, **sea** and **continent**: the Arabian Sea and Bay of Bengal are parts of the Indian Ocean, not separate oceans.
- Treating Australia as a country only. It is also the smallest continent; Asia is the largest and Antarctica the coldest.
- Mixing up **flora** (plants) and **fauna** (animals), and a **tsunami** (sea wave from an undersea earthquake) with a **cyclone** (storm with strong winds and rain).
- Believing the lines between oceans are natural walls. Ocean water is continuous; the boundaries are only conventions drawn on maps.
