ANSWER KEY & MARKING SCHEME SET 1

Chapter 2: **Oceans and Continents** | Class 6 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** 362 million sq km	0.71 x 510
2	**(b)** warm and cold currents change temperatures of coasts	Heat transport
3	**(a)** fish when sustainably caught	Resources
4	**(b)** 148 million sq km	0.29 x 510
5	**(a)** coastal cities are flooded	Sea level rise
6	**(a)** algae producing much of the oxygen	Photosynthesis
7	**(c)** water heats and cools slowly	Specific heat
8	**(c)** early warnings and evacuation drills	Preparedness
9	**(a)** Both A and R are true and R is the correct explanation of A.	Water covers most of the surface, so the Earth looks blue from space; R explains A.
10	**(c)** A is true but R is false.	A is true. R is false because there are five oceans: Pacific, Atlantic, Indian, Southern and Arctic.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Water flows between them (1); Boundaries are conventional (1).	1+1
12	Trade routes (1); Oil transport (1).	1+1
13	Surrounded by land (1); Polar location (1).	1+1
14	Absorb heat (1); Release slowly (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Water 362 million (1); Land 148 million (1); Check total (1).	1+1+1
16	Named after India (1); Trade (1); Monsoon (1).	1+1+1
17	6.4 x 500 (1); 3,200 km (1); Units (1).	1+1+1
	OR: Large size (1); Latitude range (1); Mountains and monsoon (1).	1+1+1
18	Climate (1); Size (1); Isolation (1).	1+1+1
	OR: Low height (1); Erosion (1); Salt intrusion (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) Water, i.e. the oceans and other water bodies (1). (ii) About 29 per cent (1). (iii) The Northern Hemisphere (1). (iv) On water, because water covers about 71 per cent, i.e. more than twice the area of land (1) so the chance of hitting it is greater (1).	1+1+1+2
20	Causes (1); Effects (1); Warning (1); Management (1); International cooperation (1).	1+1+1+1+1
	OR: Connected (1); Currents (1); Climate (1); Shared resource (1); Management (1).	1+1+1+1+1

Mistakes to avoid:

- Writing that land covers about three-fourths of the Earth. **Water** covers about 71 per cent and land about 29 per cent.
- Naming only three or four oceans. The five oceans are the Pacific, Atlantic, Indian, Southern and Arctic; the Pacific is the largest and the Arctic the smallest.
- Confusing **ocean**, **sea** and **continent**: the Arabian Sea and Bay of Bengal are parts of the Indian Ocean, not separate oceans.
- Treating Australia as a country only. It is also the smallest continent; Asia is the largest and Antarctica the coldest.
- Mixing up **flora** (plants) and **fauna** (animals), and a **tsunami** (sea wave from an undersea earthquake) with a **cyclone** (storm with strong winds and rain).
- Believing the lines between oceans are natural walls. Ocean water is continuous; the boundaries are only conventions drawn on maps.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 2: **Oceans and Continents** | Class 6 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** trade routes and the monsoon	Role
2	**(c)** surrounds Antarctica	Fifth ocean
3	**(b)** countries around the Indian Ocean were affected	Regional
4	**(a)** closed seas in hot regions	Evaporation
5	**(b)** Indian Ocean Tsunami Warning System	Collaboration
6	**(c)** Indian Ocean	Route
7	**(a)** in both hemispheres (north and south)	Equator crossing
8	**(c)** some continents are connected by land such as Asia and Europe	Eurasia
9	**(d)** A is false but R is true.	The Southern Ocean surrounds Antarctica near the South Pole, so A is false; the Arctic Ocean is indeed the smallest, so R is true.
10	**(b)** Both A and R are true but R is not the correct explanation of A.	Both statements are true, but the coldness of Antarctica does not explain the size of Asia.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Warnings (1); Shelters (1).	1+1
12	Waves move with great energy (1); Water is continuous (1).	1+1
13	Sea level rises (1); Flooding (1).	1+1
14	Climate (1); Isolation (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Moderate temperature (1); Rain (1); Sea breeze (1).	1+1+1
16	Cause (1); Warning time (1); Impact (1).	1+1+1
17	Treaties (1); Research (1); Awareness (1).	1+1+1
	OR: Time to act (1); Saves lives (1); Coordination (1).	1+1+1
18	Ships cross them (1); Ports on their coasts (1); Cheap bulk transport (1).	1+1+1
	OR: Protect shore (1); Breeding ground (1); Carbon store (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) Pacific Ocean (1). (ii) Atlantic Ocean (1). (iii) Arctic Ocean (1). (iv) C is the Indian Ocean and E is the Southern Ocean (1). The Indian Ocean is important because India lies on its shores, with the Arabian Sea on the west and the Bay of Bengal on the east, and it carries trade routes (1).	1+1+1+2
20	Heating (1); Winds (1); Rain (1); Agriculture (1); Variability (1).	1+1+1+1+1
	OR: Awareness (1); Drills (1); Alerts (1); Shelters (1); Role of NDMA (1).	1+1+1+1+1

Mistakes to avoid:

- Writing that land covers about three-fourths of the Earth. **Water** covers about 71 per cent and land about 29 per cent.
- Naming only three or four oceans. The five oceans are the Pacific, Atlantic, Indian, Southern and Arctic; the Pacific is the largest and the Arctic the smallest.
- Confusing **ocean**, **sea** and **continent**: the Arabian Sea and Bay of Bengal are parts of the Indian Ocean, not separate oceans.
- Treating Australia as a country only. It is also the smallest continent; Asia is the largest and Antarctica the coldest.
- Mixing up **flora** (plants) and **fauna** (animals), and a **tsunami** (sea wave from an undersea earthquake) with a **cyclone** (storm with strong winds and rain).

- Believing the lines between oceans are natural walls. Ocean water is continuous; the boundaries are only conventions drawn on maps.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 2: **Oceans and Continents** | Class 6 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(c)** polar bears	Fauna
2	**(a)** Australia	Island continent
3	**(c)** they evolved in the Arctic	Distribution
4	**(a)** penguins	Fauna
5	**(a)** fertile plains and river valleys	Settlements
6	**(c)** heating differences between land and the Indian Ocean	Pressure
7	**(d)** Indian Ocean	Name
8	**(a)** Europe and Asia share a continuous landmass	Geography
9	**(a)** Both A and R are true and R is the correct explanation of A.	Because ocean water is continuous, the dividing lines are only drawn for convenience.
10	**(a)** Both A and R are true and R is the correct explanation of A.	The sudden movement of the sea floor displaces water and forms giant waves, which explains A.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Monsoon winds (1); Rain from the sea (1).	1+1
12	Photosynthesis (1); Produce much oxygen (1).	1+1
13	Hot climate (1); Rainforests (1).	1+1
14	Warming (1); Pollution (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Ocean vs continent (1); Life (1); Climate (1).	1+1+1
16	Ships (1); Costs (1); Routes (1).	1+1+1
17	Large east-west extent (1); More zones (1); Examples (1).	1+1+1
	OR: Fish contamination (1); Fewer fish (1); Livelihood (1).	1+1+1
18	Shelters (1); Warnings (1); Stilt houses (1).	1+1+1
	OR: Fishing (1); Mining (1); Tourism (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) A tsunami (1). (ii) An undersea earthquake (1). (iii) To warn countries and people in time so that they can move to safety (1). (iv) Any two: move quickly to higher ground, follow official instructions and evacuation routes, stay away from the beach until the all-clear (1+1 = 2).	1+1+1+2
20	Pacific about 170 million (1); Asia 44.6 million (1); Ratio about 3.8 (1); Method (1); Comment (1).	1+1+1+1+1
	OR: Waste (1); Overuse (1); Pollution (1); Laws (1); Citizen action (1).	1+1+1+1+1

Mistakes to avoid:

- Writing that land covers about three-fourths of the Earth. **Water** covers about 71 per cent and land about 29 per cent.
- Naming only three or four oceans. The five oceans are the Pacific, Atlantic, Indian, Southern and Arctic; the Pacific is the largest and the Arctic the smallest.
- Confusing **ocean**, **sea** and **continent**: the Arabian Sea and Bay of Bengal are parts of the Indian Ocean, not separate oceans.
- Treating Australia as a country only. It is also the smallest continent; Asia is the largest and Antarctica the coldest.
- Mixing up **flora** (plants) and **fauna** (animals), and a **tsunami** (sea wave from an undersea earthquake) with a **cyclone** (storm with strong winds and rain).
- Believing the lines between oceans are natural walls. Ocean water is continuous; the boundaries are only conventions drawn on maps.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
