16	Rivers (1); Forests (1); Minerals (1).	1+1+1
17	Flat (1); Fertile (1); Farming (1).	1+1+1
	OR: Himalayas young (1); Aravallis old (1); Peaks sharp vs rounded (1).	1+1+1
18	Bachendri Pal (1); Arunima Sinha (1); Everest (1).	1+1+1
	OR: Fertile soil (1); Easy transport (1); Water (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Mistakes to avoid:

- Mixing up a **hill** and a **mountain**: a mountain is much higher with a narrow summit; a hill is lower with a rounded top and gentler slope.
- Calling the Aravallis young. The Himalayas are young fold mountains with sharp peaks; the Aravallis are old, worn-down and rounded.
- Describing a plateau as having no steep sides. A plateau is a raised, flat-topped land *with* steep sides, often rich in minerals.
- Confusing an **avalanche** (snow sliding down a slope) with a **landslide** (earth and rock falling).
- Giving the wrong peak for the continent: Everest (Asia), Aconcagua (South America), Mont Blanc (Europe), Kilimanjaro (Africa).
- Writing that plains are less useful. Plains are the main areas of farming, transport and dense population.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
