	OR: Steps (1); Soil (1); Water (1); Crops (1); Limits (1).	1+1+1+1+1

Mistakes to avoid:

- Mixing up a **hill** and a **mountain**: a mountain is much higher with a narrow summit; a hill is lower with a rounded top and gentler slope.
- Calling the Aravallis young. The Himalayas are young fold mountains with sharp peaks; the Aravallis are old, worn-down and rounded.
- Describing a plateau as having no steep sides. A plateau is a raised, flat-topped land *with* steep sides, often rich in minerals.
- Confusing an **avalanche** (snow sliding down a slope) with a **landslide** (earth and rock falling).
- Giving the wrong peak for the continent: Everest (Asia), Aconcagua (South America), Mont Blanc (Europe), Kilimanjaro (Africa).
- Writing that plains are less useful. Plains are the main areas of farming, transport and dense population.
