ANSWER KEY & MARKING SCHEME SET 1

Chapter 3: **Landforms and Life** | Class 6 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** terrace farming	Hill agriculture
2	**(c)** to let rain and snow slide off	Adaptation
3	**(b)** eco-friendly tourism	Conservation
4	**(c)** plateau	Chhota Nagpur
5	**(a)** steep land and harsh climate	Limits
6	**(d)** rocky surface and slope	Drainage
7	**(d)** steep edge of the plateau	Waterfall formation
8	**(b)** planting trees and terracing	Conservation
9	**(a)** Both A and R are true and R is the correct explanation of A.	Young mountains are still sharp and high; R explains A.
10	**(c)** A is true but R is false.	A is true because long erosion has rounded the Aravallis; R is false, as the Himalayas are far higher.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Waterfalls (1); Steep drops (1).	1+1
12	Melt (1); Feed streams (1).	1+1
13	Gives minerals (1); Damages land (1).	1+1
14	Walking on slopes (1); Clean air (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	6.5 x 3.5 = 22.75 (1); 30 - 22.75 (1); 7.25 degrees C (1).	1+1+1
16	Terrace vs flat fields (1); Crops (1); Mechanisation (1).	1+1+1
17	Beauty (1); Hydropower (1); Livelihood (1).	1+1+1
	OR: Fertile land (1); Transport (1); Harsh climate (1).	1+1+1
18	Prevent erosion (1); Fuel (1); Water (1).	1+1+1
	OR: Plateaus mines (1); Plains transport (1); Ports (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) Terrace farming (1). (ii) Tourism (1). (iii) A landslide (1). (iv) Mountains are high, steep and rocky with cold weather and risk of landslides and avalanches (1), so construction is costly and difficult (1).	1+1+1+2
20	6.5 per 1,000 m (1); Example (1); Vegetation (1); Settlement (1); Limits (1).	1+1+1+1+1
	OR: Erosion (1); Deposition (1); Rivers (1); Glaciers (1); Result (1).	1+1+1+1+1

Mistakes to avoid:

- Mixing up a **hill** and a **mountain**: a mountain is much higher with a narrow summit; a hill is lower with a rounded top and gentler slope.
- Calling the Aravallis young. The Himalayas are young fold mountains with sharp peaks; the Aravallis are old, worn-down and rounded.
- Describing a plateau as having no steep sides. A plateau is a raised, flat-topped land *with* steep sides, often rich in minerals.
- Confusing an **avalanche** (snow sliding down a slope) with a **landslide** (earth and rock falling).
- Giving the wrong peak for the continent: Everest (Asia), Aconcagua (South America), Mont Blanc (Europe), Kilimanjaro (Africa).
- Writing that plains are less useful. Plains are the main areas of farming, transport and dense population.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 3: **Landforms and Life** | Class 6 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(c)** formed by solidified lava flows	Volcanic origin
2	**(c)** steep slope with loose soil	Hazard-prone
3	**(c)** Aravalli - young fold mountains	Aravallis are old
4	**(c)** heavy rain erodes slopes	Erosion
5	**(a)** water, fertile soil and transport	River valleys
6	**(a)** -8 degrees C	26 - 6.5 x 5.2
7	**(d)** mountains, plateaus, plains	Course
8	**(a)** deforestation for construction	Human impact
9	**(d)** A is false but R is true.	A plateau is a raised flat-topped land with steep sides, so A is false; R is true.
10	**(b)** Both A and R are true but R is not the correct explanation of A.	Both statements are true, but tourism does not explain why steps are cut for farming.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Landslides (1); Soil loss (1).	1+1
12	Snow stores water (1); Feeds rivers (1).	1+1
13	Weathered lava (1); Rich in minerals (1).	1+1
14	Local material (1); Insulation (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Deforestation (1); Road cutting (1); Construction (1).	1+1+1
16	Jobs (1); Conservation (1); Culture (1).	1+1+1
17	Temperature (1); Rain (1); Soil (1).	1+1+1
	OR: Rivers (1); Climate (1); Defence (1).	1+1+1
18	Forests at base (1); Alpine meadows (1); Snow at top (1).	1+1+1
	OR: Forest produce (1); Mining jobs (1); Culture (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) A raised, flat-topped land with steep sides (1). (ii) Any two of iron ore, coal, manganese (1). (iii) Black soil (1). (iv) They contain many valuable minerals such as coal and iron (1); waterfalls can be used to generate hydroelectricity and attract tourists (1).	1+1+1+2
20	Minerals (1); Industries (1); Displacement (1); Pollution (1); Solutions (1).	1+1+1+1+1
	OR: Soil (1); Water (1); Transport (1); History (1); Pressure (1).	1+1+1+1+1

Mistakes to avoid:

- Mixing up a **hill** and a **mountain**: a mountain is much higher with a narrow summit; a hill is lower with a rounded top and gentler slope.
- Calling the Aravallis young. The Himalayas are young fold mountains with sharp peaks; the Aravallis are old, worn-down and rounded.
- Describing a plateau as having no steep sides. A plateau is a raised, flat-topped land *with* steep sides, often rich in minerals.
- Confusing an **avalanche** (snow sliding down a slope) with a **landslide** (earth and rock falling).
- Giving the wrong peak for the continent: Everest (Asia), Aconcagua (South America), Mont Blanc (Europe), Kilimanjaro (Africa).
- Writing that plains are less useful. Plains are the main areas of farming, transport and dense population.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 3: **Landforms and Life** | Class 6 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** decreases	Gradient
2	**(d)** an area at 150 m	Altitude
3	**(d)** cooler climate, steeper land	Altitude
4	**(a)** mountains and valleys	Landform pairs
5	**(d)** plains	Farming
6	**(d)** Tibetan Plateau	Highest plateau
7	**(b)** differences in soil and climate	Farming patterns
8	**(d)** landslide	Mountain hazard
9	**(a)** Both A and R are true and R is the correct explanation of A.	Good farming and easy transport attract people, which explains the dense population.
10	**(a)** Both A and R are true and R is the correct explanation of A.	Cooled lava breaks down into black soil, so R explains A.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Few jobs (1); Hard life (1).	1+1
12	Fan-shaped plain at river mouth (1); Fertile (1).	1+1
13	Higher altitude colder (1); Thin air (1).	1+1
14	Erosion in mountains (1); Deposition in plains (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Water (1); Fertile soil (1); Transport (1).	1+1+1
16	Landslides (1); Cost (1); Weather (1).	1+1+1
17	Water (1); Biodiversity (1); Climate (1).	1+1+1
	OR: Minerals (1); Waterfalls (1); Farming (1).	1+1+1
18	Erosion (1); Transport (1); Deposition (1).	1+1+1
	OR: Flat land (1); Water (1); Hazards (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) A large flat or gently rolling area of low-lying land (1). (ii) Wheat and rice (1). (iii) Roads, railways or canals (any one) (1). (iv) Fertile soil gives good harvests (1); easy transport and building of towns and industries (1).	1+1+1+2
20	Mountain culture (1); Plain culture (1); Plateau culture (1); Festivals (1); Food (1).	1+1+1+1+1
	OR: Landforms shape people (1); People shape landforms (1); Examples (1); Balance (1); Conclusion (1).	1+1+1+1+1

Mistakes to avoid:

- Mixing up a **hill** and a **mountain**: a mountain is much higher with a narrow summit; a hill is lower with a rounded top and gentler slope.
- Calling the Aravallis young. The Himalayas are young fold mountains with sharp peaks; the Aravallis are old, worn-down and rounded.
- Describing a plateau as having no steep sides. A plateau is a raised, flat-topped land *with* steep sides, often rich in minerals.
- Confusing an **avalanche** (snow sliding down a slope) with a **landslide** (earth and rock falling).
- Giving the wrong peak for the continent: Everest (Asia), Aconcagua (South America), Mont Blanc (Europe), Kilimanjaro (Africa).
- Writing that plains are less useful. Plains are the main areas of farming, transport and dense population.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
