THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 8 — SCIENCE · HARD LEVEL CHAPTER TEST SET 2

Chapter 3: **Health: The Ultimate Treasure** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A sick person drinks water from a well that is next to a leaking toilet pit. The disease most likely to spread is: 1

(a) rickets **(b)** typhoid **(c)** scurvy **(d)** goitre

2. Why can dengue be spread even in clean-looking colonies? 1

(a) It is non-communicable
(b) Aedes breeds in small collections of clean water
(c) Dirty water causes it
(d) Dengue is airborne

3. Assertion (A): Boiling water kills pathogens. Reason (R): High temperature destroys microorganisms. 1

(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

4. A child with the symptoms of fever, cough and weight loss over three months is suspected to have: 1

(a) tuberculosis **(b)** common cold **(c)** diabetes only **(d)** chickenpox

5. Two persons are exposed to the same flu virus. One falls sick and the other does not. A possible reason is: 1

(a) colour of eyes **(b)** height
(c) age of the virus **(d)** difference in immunity

6. Assertion (A): Scurvy is cured by including citrus fruits in the diet. Reason (R): Citrus fruits are rich in vitamin C. 1

(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

7. Which action does NOT reduce the spread of a respiratory infection? 1

(a) covering sneezes **(b)** wearing a mask while ill
(c) washing hands **(d)** sharing a handkerchief

8. Which of the following correctly pairs nutrients and diseases? 1

(a) vitamin A - rickets **(b)** iodine - goitre
(c) iron - scurvy **(d)** vitamin C - anaemia

9. **Assertion (A):** Diabetes is a communicable disease. 1
Reason (R): Communicable diseases are caused by germs and can spread from person to person.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

10. **Assertion (A):** Vaccination protects a person against certain diseases. 1
Reason (R): A vaccine trains the body's immune system to recognise and fight the germ.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. Differentiate between first and second doses of a vaccine on the immune response. 2

12. Explain why a balanced diet cannot be replaced by taking vitamin tablets alone. 2

13. Why must wounds be cleaned and covered? 2

14. Why is a female Aedes or Anopheles mosquito a vector but a housefly spreads disease differently? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Explain, with reasoning, why washing hands is more important than wearing gloves for food hygiene in a household. 3

16. Why do some diseases like tuberculosis need long treatment (6 months or more)? 3

17. Why are antibiotics given as a full course only when prescribed by a doctor? 3

OR

An infected person coughs in a closed room. Explain how others get infected and how it is prevented. 3

18. Explain why oral polio drops are given repeatedly to children below five. 3

OR

Why does stress reduce immunity? Mention a way to overcome stress. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. **Case study.** Nisha's grandfather suffers from high blood sugar and takes regular tablets. Her cousin recovered from chickenpox last month. Nisha was given a vaccine against measles when she was small. 5
(i) Is diabetes communicable or non-communicable?
(ii) Name one communicable disease from the passage.
(iii) What does a vaccine do to the body?
(iv) Why can chickenpox spread in a classroom while diabetes cannot?

20. Compare communicable and non-communicable diseases in terms of cause, spread, prevention and treatment using two examples each. 5

OR

A class conducts a survey: 12 of 40 students have had dengue, 8 malaria and 4 both. Find how many had at least one of the diseases and how many had neither. Suggest a school-level measure. 5

END OF QUESTION PAPER — **Total: 40 Marks**
