THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 8 — SCIENCE · HARD LEVEL CHAPTER TEST SET 3

Chapter 3: **Health: The Ultimate Treasure** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A health worker advises washing hands before eating and after using the toilet to break: 1

(a) faecal-oral transmission **(b)** air transmission
(c) vector transmission **(d)** heredity

2. Assertion (A): Dengue is spread by Aedes mosquitoes. Reason (R): Aedes mosquitoes breed in clear, standing water. 1

(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

3. ORS contains salt and sugar in water. It helps because it: 1

(a) cures cold **(b)** gives vitamins only
(c) restores lost water and salts **(d)** kills bacteria

4. A deficiency disease differs from an infection in that it: 1

(a) is spread by sneezing **(b)** is spread by mosquitoes
(c) is caused by lack of a nutrient **(d)** is caused by a virus

5. Assertion (A): Antibiotics must be taken only on a doctor's advice. Reason (R): Wrong use may make bacteria resistant. 1

(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

6. A mosquito net treated with insecticide protects against: 1

(a) scurvy **(b)** typhoid **(c)** malaria **(d)** cholera

7. Blood donation camps screen donors for infections like: 1

(a) HIV and hepatitis **(b)** rickets and anaemia
(c) scurvy and goitre **(d)** cold only

8. Assertion (A): People recover from measles and rarely get it again. Reason (R): The immune system remembers the virus. 1

(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

9. **Assertion (A):** Washing hands with soap before eating reduces the chances of infection. 1
Reason (R): Soap and water remove many germs from the hands.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

10. **Assertion (A):** Dengue spreads by the Aedes mosquito, which breeds in stagnant clean water. 1
Reason (R): Dengue can be prevented by spraying cough syrup on stagnant water.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. Why do diseases like malaria occur in clusters in some regions? 2

12. Why does boiling water help while chlorination is used in large supplies? 2

13. State how the use of tobacco affects both the user and others around. 2

14. Mention two ways in which exercise improves health. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Analyse: 'A child had a fever, took paracetamol and recovered in 3 days. So it was not an infection.' Is this correct? 3

16. How can poor sanitation affect a community's economy and health? Give three effects. 3

17. Explain the difference between prevention and cure with two examples each. 3

OR

Why is the immune response faster the second time the same pathogen enters the body? 3

18. Differentiate between a carrier and a patient with an example. 3

OR

What is meant by 'herd immunity'? Why does it protect unvaccinated persons? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. **Case study.** A school runs a health week. A doctor says that a balanced diet, enough sleep, daily exercise and clean surroundings matter, and that mental and social health are as important as physical health. A student, Rohan, feels sad and avoids friends for weeks even though he has no fever or cough. 5
(i) Name any two components of health.
(ii) Which type of health may be affected in Rohan's case?
(iii) Name one habit from the passage that supports physical health.
(iv) Explain why a person with no fever or cough may still not be healthy.

20. A person eats mostly polished rice and no fruits. Predict the possible deficiency diseases, explain and suggest a diet. 5

OR

Discuss the importance of health education and awareness, giving examples of campaigns that changed public health. 5

END OF QUESTION PAPER — **Total: 40 Marks**
