CLASS 8 — SOCIAL SCIENCE · MEDIUM LEVEL CHAPTER TEST SET 1

Chapter 1: **Natural Resources and Their Use** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Medium level: multi-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Which condition explains why resources may be left untouched in a sacred grove? 1

(a) Political stability **(b)** Technological accessibility
(c) Economic feasibility **(d)** Cultural acceptability

2. The main reason for the Punjab water crisis was 1

(a) tax
(b) cropping pattern needing more water plus free power
(c) lack of rivers
(d) snowfall

3. The best description of sustainable use is 1

(a) trading all **(b)** taking only what can be replaced
(c) taking as much as possible **(d)** never using resources

4. A coal seam too deep to mine with present technology is 1

(a) useless forever **(b)** not yet a usable resource
(c) a renewable resource **(d)** a cultural resource

5. Which option is a long-term solution for Punjab's water problem? 1

(a) Crop diversification and rain-water harvesting
(b) Importing wheat only
(c) Digging deeper tube wells
(d) Burning stubble

6. Mining sacred hills may be rejected because of 1

(a) technology **(b)** cost
(c) cultural unacceptability **(d)** rainfall

7. A resource that is technologically possible but too costly to extract fails the test of 1

(a) rainfall **(b)** cultural acceptance
(c) economic feasibility **(d)** geography

8. Why is cement dust a policy concern? 1

(a) It adds oxygen **(b)** It harms health, soil and crops
(c) It improves rivers **(d)** It cools the air

9. A river used by upstream and downstream states causes dispute mainly due to 1

(a) its colour **(b)** shared resource and competing demands
(c) its length **(d)** lack of water on Earth

10. Why is timber renewable only conditionally? 1

(a) It renews only if cut slower than it regrows
(b) It never regrows
(c) It is made of metal
(d) It is a fossil

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. Why is a thing not always a resource, even if it exists in Nature? 2

12. Why do rivers cause disputes between states? 2

13. Why are neem and garlic useful for farmers? 2

14. Distinguish between ecosystem functions and ecosystem services with one example. 2

SECTION — C (Short Answer Type) 4 × 3 = 12

Answer in about 40–60 words each.

15. Explain with the help of an example how technology can change what counts as a resource. 3

16. Give reasons for the Kaveri dispute. 3

17. Explain why Sikkim's organic transition took years. 3

OR

Compare renewable and non-renewable resources on formation time, rate of use and examples. 3

18. Why do some resource-rich regions remain poor? 3

OR

Describe how Vrikshayurveda links soil, season and seed. 3

SECTION — D (Long Answer Type) 2 × 5 = 10

Answer in about 100–150 words each.

19. Discuss how technology, economy and culture together decide whether something is a resource. Give three examples. 5

OR

Discuss the groundwater crisis of Punjab: causes, effects and solutions. 5

20. Distinguish between renewable and non-renewable resources and explain why even renewables need care. 5

OR

Evaluate cement as an essential but polluting industry. Suggest ways to balance both. 5

END OF QUESTION PAPER Total: 40 Marks
