- Confusing interest with profit; interest is a fixed payment for capital while profit is what remains and can be a loss.
- Thinking that capital means only money; it also means durable assets such as machines and buildings used in production.
- Mixing human capital (skills and knowledge of workers) with physical capital (machines, tools).
- Writing that land means only farmland; it includes soil, forests, water, minerals and sunlight.
- Mixing labour-intensive (handicrafts) with capital-intensive (satellite manufacturing) activities, and quoting CSR as 5 per cent instead of 2 per cent.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
