- Calling the Gobi a hot desert; it is a cold desert. The Sahara is the largest hot desert.
- Writing that the Urals divide Asia and Africa; they separate Europe and Asia.
- Forgetting that the Tibetan Plateau was formed by the collision of the Indo-Australian and Eurasian plates, which also raised the Himalaya.
- Mixing tundra (treeless plain with permafrost) and steppes (flat, treeless grasslands), or placing the Andes outside South America.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
