18	Grasslands feed herbivores (1); Store carbon (1); Support herders (1).	1+1+1
	OR: Dry desert with sparse people (1); Cheap clothes exported (1); Poor waste management (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Distortion causes (1); Mercator (1); Robinson (1); Purpose (1); Examples (1).	1+1+1+1+1

	OR: Andes (1); Amazon (1); Resources (1); Threats (1); Protection (1).	1+1+1+1+1

Mistakes to avoid:

- Saying the Mercator map shows true sizes; it preserves direction and shape but distorts size near the poles.
- Mixing the oceans: the Pacific is largest and deepest, the Arctic is smallest and shallowest, and the Southern Ocean encircles Antarctica (the fifth ocean).
- Calling the Gobi a hot desert; it is a cold desert. The Sahara is the largest hot desert.
- Writing that the Urals divide Asia and Africa; they separate Europe and Asia.
- Forgetting that the Tibetan Plateau was formed by the collision of the Indo-Australian and Eurasian plates, which also raised the Himalaya.
- Mixing tundra (treeless plain with permafrost) and steppes (flat, treeless grasslands), or placing the Andes outside South America.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
