THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET 1

Chapter 8: **Understanding the World through Maps and Landforms** | Class 8 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** Mercator	Rhumb lines
2	**(d)** less oxygen and less fish food	Base of food chain
3	**(c)** encircles a continent	Antarctica
4	**(a)** trusting a Mercator map's size	Africa is about 14 times bigger
5	**(b)** it avoided going around Africa	Time saved
6	**(b)** Providing coal	Coal is land-based
7	**(d)** become cooler	Heat supply reduced
8	**(a)** Sahara	Typical life
9	**(a)** Both A and R are true and R is the correct explanation of A.	Exaggerated size at high latitudes causes the effect in A.
10	**(b)** Both A and R are true but R is not the correct explanation of A.	Both are true but R does not explain A.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Size distortion increases towards the poles (1); Africa is about 14 times larger in reality (1).	1+1
12	Cool the air above (1); Moisture condenses (1).	1+1
13	Fed by snow and glaciers (1); Flow throughout the year (1).	1+1
14	Ocean currents (1); Altitude or distance from sea (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Mercator (1); Polar enlargement (1); Use equal-area map for sizes (1).	1+1+1
16	Both fold mountains (1); Himalaya larger and younger (1); Different climates (1).	1+1+1
17	Plateau high and flat (1); Plain low and flat (1); Mountain steep and high (1).	1+1+1
	OR: Currents carry nutrients (1); Fish move (1); Plankton changes (1).	1+1+1
18	Fisheries decline (1); Tourism loss (1); Less coastal protection (1).	1+1+1
	OR: Subduction (1); Deep depressions (1); Earthquakes nearby (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) About 71 per cent (1). (ii) Challenger Deep in the Mariana Trench (1). (iii) They produce much of the oxygen we breathe (1). (iv) Organisms there obtain energy from chemicals in the water instead of from sunlight (2).	1+1+1+2
20	Plankton (1); Currents (1); Climate regulation (1); Fisheries (1); Threats (1).	1+1+1+1+1
	OR: Overproduction (1); Dumping (1); Atacama (1); Impact (1); Solutions (1).	1+1+1+1+1

Mistakes to avoid:

- Saying the Mercator map shows true sizes; it preserves direction and shape but distorts size near the poles.
- Mixing the oceans: the Pacific is largest and deepest, the Arctic is smallest and shallowest, and the Southern Ocean encircles Antarctica (the fifth ocean).
- Calling the Gobi a hot desert; it is a cold desert. The Sahara is the largest hot desert.
- Writing that the Urals divide Asia and Africa; they separate Europe and Asia.
- Forgetting that the Tibetan Plateau was formed by the collision of the Indo-Australian and Eurasian plates, which also raised the Himalaya.
- Mixing tundra (treeless plain with permafrost) and steppes (flat, treeless grasslands), or placing the Andes outside South America.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

THE MASTERMIND COACHING CLASSES
CBSE / RBSE • NURSERY – CLASS XII • JAIPUR
Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET 2

Chapter 8: **Understanding the World through Maps and Landforms** | Class 8 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** reintroducing the wolf, the top predator	Yellowstone
2	**(a)** Gobi	Mongolia
3	**(d)** sensitivity of reefs to temperature	Climate indicator
4	**(a)** waste management and consumption	Environmental ethics
5	**(d)** water availability	Nile civilisation
6	**(d)** Pacific	Mariana Trench
7	**(d)** Amazon rainforest	Tropical rainforest
8	**(c)** its large stock of ice	Frozen fresh water
9	**(c)** A is true but R is false.	A is true. R is false: the Gobi is a cold desert.
10	**(d)** A is false but R is true.	A is false: the Urals separate Europe and Asia. R is true.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Trade passes through (1); Strategic security (1).	1+1
12	Overproduction (1); Waste dumping (1).	1+1
13	Rising sea temperature (1); Stress on marine life (1).	1+1
14	Control herbivores (1); Prevent overgrazing (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Rivers originate there (1); Glacier melt (1); Monsoon influence (1).	1+1+1
16	Shortens routes (1); Saves fuel (1); Risk if blocked (1).	1+1+1
17	Water scarcity (1); Heat (1); Limited land use (1).	1+1+1
	OR: Minerals and solar potential (1); Unique ecosystems (1); Cultural heritage (1).	1+1+1
18	Habitat loss (1); Poaching (1); Tourism income (1).	1+1+1
	OR: Herding (1); Felt tents (yurts) (1); Winter clothing (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) Tibetan Plateau (1). (ii) Indo-Australian and Eurasian plates (1). (iii) Mongolia and northern China (1). (iv) It is the highest and largest plateau, with an average height above 4,000 m (2).	1+1+1+2
20	Collision (1); Uplift (1); Monsoon (1); Rivers (1); People (1).	1+1+1+1+1
	OR: Distortion (1); Examples (1); Purpose (1); Scale and key (1); Critical reading (1).	1+1+1+1+1

Mistakes to avoid:

- Saying the Mercator map shows true sizes; it preserves direction and shape but distorts size near the poles.
- Mixing the oceans: the Pacific is largest and deepest, the Arctic is smallest and shallowest, and the Southern Ocean encircles Antarctica (the fifth ocean).
- Calling the Gobi a hot desert; it is a cold desert. The Sahara is the largest hot desert.
- Writing that the Urals divide Asia and Africa; they separate Europe and Asia.
- Forgetting that the Tibetan Plateau was formed by the collision of the Indo-Australian and Eurasian plates, which also raised the Himalaya.
- Mixing tundra (treeless plain with permafrost) and steppes (flat, treeless grasslands), or placing the Andes outside South America.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 8: **Understanding the World through Maps and Landforms** | Class 8 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** it is fragile and valuable for science	Global commons
2	**(d)** tundra	Permafrost
3	**(a)** Sizes near the poles are exaggerated	Distortion pattern
4	**(d)** more carbon dioxide and climate change	Carbon sink loss
5	**(b)** steppe	Eurasian Steppes
6	**(a)** Fold mountains like the Himalaya	Tectonic
7	**(b)** Himalaya and Tibetan Plateau	Indo-Australian and Eurasian
8	**(b)** Fertile land and navigable rivers	Agriculture and trade
9	**(a)** Both A and R are true and R is the correct explanation of A.	Rich biodiversity explains the name.
10	**(b)** Both A and R are true but R is not the correct explanation of A.	Both are true but unrelated.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Evaporation (1); Rain returns water (1).	1+1
12	Releases methane and carbon dioxide (1); Positive feedback (1).	1+1
13	Nutrients are in the plants (1); Heavy rain washes soil (1).	1+1
14	Scientific importance (1); Fragile environment (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Reduce consumption (1); Recycle and resell (1); Regulate exports (1).	1+1+1
16	Carbon uptake (1); Oxygen release (1); Climate regulation (1).	1+1+1
17	Fertile silt (1); Water supply (1); Transport (1).	1+1+1
	OR: Wolves control elk (1); Plants regrow (1); Habitats improve (1).	1+1+1
18	Mercator (1); Straight bearing lines (1); Limitations of size (1).	1+1+1
	OR: Pollution (1); Invasive species (1); Regulation (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) Sailors for navigation (1). (ii) Nearly spherical but bulging at the middle and flattened at the poles (1). (iii) Size is greatly distorted near the poles (1). (iv) Areas at high latitudes are enlarged, so sizes appear wrong (2).	1+1+1+2
20	Problem (1); Cause (1); Solution (1); Result (1); Lessons (1).	1+1+1+1+1
	OR: Warming seas (1); Melting ice (1); Permafrost (1); Coral (1); Impacts on people (1).	1+1+1+1+1

Mistakes to avoid:

- Saying the Mercator map shows true sizes; it preserves direction and shape but distorts size near the poles.
- Mixing the oceans: the Pacific is largest and deepest, the Arctic is smallest and shallowest, and the Southern Ocean encircles Antarctica (the fifth ocean).
- Calling the Gobi a hot desert; it is a cold desert. The Sahara is the largest hot desert.
- Writing that the Urals divide Asia and Africa; they separate Europe and Asia.
- Forgetting that the Tibetan Plateau was formed by the collision of the Indo-Australian and Eurasian plates, which also raised the Himalaya.
- Mixing tundra (treeless plain with permafrost) and steppes (flat, treeless grasslands), or placing the Andes outside South America.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
