THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 8 — SOCIAL SCIENCE · HARD LEVEL CHAPTER TEST SET 1

Chapter 8: **Understanding the World through Maps and Landforms** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A ship's captain wants a map on which a straight line gives a constant compass bearing. The best projection is 1

(a) Robinson **(b)** Mercator **(c)** relief map **(d)** globe only

2. Plankton decline would affect humans because 1

(a) no waves **(b)** more tides

(c) no sand **(d)** less oxygen and less fish food

3. The Southern Ocean is unique as it 1

(a) is landlocked **(b)** lies between Asia and Africa

(c) encircles a continent **(d)** is warm

4. A student says Greenland is as large as Africa. Her mistake is 1

(a) trusting a Mercator map's size **(b)** reading a globe

(c) reading the key **(d)** measuring distance

5. Sailors preferred the Suez route because 1

(a) it was frozen **(b)** it avoided going around Africa

(c) it was in the Pacific **(d)** it was longer

6. Which of these is NOT an ecosystem service of oceans? 1

(a) Regulating climate **(b)** Providing coal

(c) Producing oxygen **(d)** Providing food

7. If a warm current moves away from a coast, the coast's climate will probably 1

(a) become a desert **(b)** have no change **(c)** become hotter **(d)** become cooler

8. A desert with nomads, camels and oases is probably the 1

(a) Sahara **(b)** Amazon **(c)** Alps **(d)** Great Lakes

9. **Assertion (A):** In the Mercator projection Greenland looks as large as Africa. 1

Reason (R): The Mercator projection greatly distorts size near the poles.

Choose the correct option:

(a) Both A and R are true and R is the correct explanation of A.

(b) Both A and R are true but R is not the correct explanation of A.

(c) A is true but R is false.

(d) A is false but R is true.

10. **Assertion (A):** The Pacific is the largest and deepest ocean. 1
Reason (R): The Arctic is the smallest and shallowest ocean.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. Why does Greenland look as large as Africa on a Mercator map? 2

12. Why do cold currents bring fog? 2

13. Why are highland rivers perennial? 2

14. Two cities at the same latitude differ in climate. Give one reason. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Case: A map shows Africa and Greenland of similar size. Identify the projection and explain the problem. 3

16. Compare the Alps and the Himalaya. 3

17. Explain how a plateau differs from a plain and a mountain. 3

OR

Case: A fishing community notices fewer fish after a warm current shifts. Explain possible links. 3

18. Analyse why coral bleaching threatens coastal people. 3

OR

Examine how ocean trenches are linked to plate boundaries. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. **Case study.** Rohan reads that oceans cover about 71 per cent of the Earth's surface and hold about 97 per cent of its water. The deepest part, the Challenger Deep in the Mariana Trench, is over 10,000 m deep, where no sunlight reaches, yet life survives using chemicals in the water. Plankton produce much of the oxygen we breathe. 5
(i) What share of Earth's surface do oceans cover?
(ii) Name the deepest known part of the oceans.
(iii) Why are plankton important?
(iv) How can life exist in the deepest trench without sunlight?

20. Analyse how oceans, currents and plankton together support life and climate. 5

OR

Discuss the environmental costs of fast fashion with the Atacama example and suggest action. 5

END OF QUESTION PAPER — Total: 40 Marks
