ANSWER KEY & MARKING SCHEME SET 1

Chapter 13: **Dynamics of Population** | Class 8 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** the size, structure and changes of human population	Statistics of people
2	**(c)** 943	Females per 1,000 males
3	**(d)** the economic benefit from a large working-age population	Possible if people have skills and jobs
4	**(b)** census	Done at regular intervals
5	**(b)** 1.21 billion	A rise from 361 million in 1951
6	**(c)** migration	Temporary or permanent
7	**(c)** 10 years	Decennial census
8	**(b)** the average number of years a newborn is expected to live	A health indicator
9	**(d)** better jobs in cities	Attracts people to a place
10	**(d)** India	It overtook China

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Study of the size, structure and change of population (1); Uses census data (1).	1+1
12	Females per 1,000 males (1); India's figure in 2011 was 943 (1).	1+1
13	Economic growth from many working-age people (1); Needs jobs and skills (1).	1+1
14	Official count of people (1); Held every ten years in India (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	To plan schools and hospitals (1); To plan jobs and housing (1); To allocate resources (1).	1+1+1
16	Family planning campaigns (1); Girls' education (1); Women's work (1).	1+1+1
17	Width shows numbers (1); Base shows children (1); Top shows elderly (1).	1+1+1
	OR: About 2.5 billion in 1950 (1); Over 8 billion now (1); Growth slowing (1).	1+1+1
18	Higher literacy, lower fertility (1); More awareness (1); Later marriage (1).	1+1+1
	OR: Large share of young people (1); Seen in Stage 2 (1); Gives potential workers (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Planning schools (1); Health services (1); Jobs and housing (1); Business markets (1); Resource allocation (1).	1+1+1+1+1
	OR: Meaning (1); India's data (1); Reasons for imbalance (1); Effects (1); Measures (1).	1+1+1+1+1
20	Growth after 1950 (1); Reasons (1); Present (1); Projected peak (1); Regional differences (1).	1+1+1+1+1
	OR: Meaning (1); Push factors (1); Pull factors (1); Effects on cities (1); Effects on villages (1).	1+1+1+1+1

Mistakes to avoid:

- Forgetting that birth rate and death rate are per **1,000** people per year, and that sex ratio is **females per 1,000 males** (943 in 2011, not 94.3 or 1.06).
- Mixing fertility rate (children per woman, replacement level about 2.1) with birth rate (births per 1,000 population).
- Reversing demographic transition stages: Stage 1 both rates high; Stage 2 death rate falls, birth rate high (rapid growth).
- Reading a wide-based pyramid as an ageing population; a wide base means young, a wide top means ageing.
- Confusing push factors (lack of jobs at home) with pull factors (better jobs in cities).
- Saying a large young population automatically gives a demographic dividend; it needs skills and jobs. Population density is per square kilometre, and the census is every 10 years.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 13: **Dynamics of Population** | Class 8 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** 5 years per 1,000 live births	A child-health indicator
2	**(a)** lack of jobs at home	Forces people to leave
3	**(c)** live births per 1,000 people in a year	A yearly measure
4	**(b)** fall in death rates through better medicine and sanitation	Health advances
5	**(a)** birth and death rates are both high	Slow growth
6	**(c)** deaths per 1,000 people in a year	A yearly measure
7	**(a)** 1979	To slow population growth
8	**(a)** death rate falls while birth rate stays high	Rapid growth
9	**(c)** fertility rate	Often written TFR
10	**(d)** India's family planning campaign	Promoted small families

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Average years a newborn will live (1); Shows health conditions (1).	1+1
12	Introduced in 1979 (1); To control population growth (1).	1+1
13	Birth rate: births per 1,000 population (1); Fertility rate: children per woman (1).	1+1
14	Moving to live in another place (1); Jobs or education (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Vaccines and antibiotics (1); Better sanitation (1); Falling death rate (1).	1+1+1
16	Life expectancy rose (1); Child mortality fell (1); Health services improved (1).	1+1+1
17	Health costs (1); Fewer workers (1); Need for pensions (1).	1+1+1
	OR: 361 million in 1951 (1); 1,210 million in 2011 (1); Increase of about 849 million (1).	1+1+1
18	Push: poverty, disaster (1); Pull: jobs, schooling (1); Cities attract many (1).	1+1+1
	OR: India is younger (1); Japan is older (1); Different needs (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Birth rate (1); Death rate (1); Fertility rate (1); Replacement level (1); Relation (1).	1+1+1+1+1
	OR: Meaning (1); Wide base (1); Narrow base (1); Change over time (1); Use (1).	1+1+1+1+1
20	Campaigns (1); Girls' education (1); Women's work (1); Urbanisation (1); Health care (1).	1+1+1+1+1
	OR: Meaning (1); Youth bulge (1); Jobs (1); Education (1); Risks (1).	1+1+1+1+1

Mistakes to avoid:

- Forgetting that birth rate and death rate are per **1,000** people per year, and that sex ratio is **females per 1,000 males** (943 in 2011, not 94.3 or 1.06).
- Mixing fertility rate (children per woman, replacement level about 2.1) with birth rate (births per 1,000 population).
- Reversing demographic transition stages: Stage 1 both rates high; Stage 2 death rate falls, birth rate high (rapid growth).
- Reading a wide-based pyramid as an ageing population; a wide base means young, a wide top means ageing.
- Confusing push factors (lack of jobs at home) with pull factors (better jobs in cities).
- Saying a large young population automatically gives a demographic dividend; it needs skills and jobs. Population density is per square kilometre, and the census is every 10 years.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 13: **Dynamics of Population** | Class 8 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** age that divides the population into two equal halves	Used to describe age structure
2	**(b)** 2.1 children per woman	Just enough to replace parents
3	**(b)** education of girls and women's employment	Evidence from many states
4	**(b)** people per square kilometre	Area-based measure
5	**(d)** eventually shrink	Fewer births than needed
6	**(d)** a young population with high birth rate	Many in lower age groups
7	**(c)** health care and pension services	Planning from census data
8	**(c)** females per 1,000 males	Used in the census
9	**(c)** an ageing population	Japan is an example
10	**(b)** soil colour	Three main components

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Education of girls (1); Women's employment (1).	1+1
12	2.1 children per woman (1); Keeps population stable (1).	1+1
13	Graph of population by age and sex (1); Shows age structure (1).	1+1
14	People per square kilometre (1); Shows crowding (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Births (1); Deaths (1); Migration (1).	1+1+1
16	Stage 1: high births and deaths (1); Stage 2: deaths fall (1); Stage 3: births also fall (1).	1+1+1
17	40 x 25 = 1,000 (1); Births = 1,000 (1); State the units (1).	1+1+1
	OR: Introduced 1979 (1); Fertility fell (1); Ageing and fewer workers later (1).	1+1+1
18	Shows gender balance (1); Reflects social attitudes (1); Guides policy (1).	1+1+1
	OR: 50,000 / 200 (1); = 250 (1); 250 persons per sq km (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	China's policy (1); Effects (1); India's campaigns (1); Outcome (1); Comparison (1).	1+1+1+1+1
	OR: Median age (1); Health costs (1); Fewer workers (1); Pensions (1); Policies (1).	1+1+1+1+1
20	Stage 1 (1); Stage 2 (1); Stage 3 (1); India's stages (1); Future (1).	1+1+1+1+1
	OR: Health (1); Vaccines (1); Education (1); Women (1); Results (1).	1+1+1+1+1

Mistakes to avoid:

- Forgetting that birth rate and death rate are per **1,000** people per year, and that sex ratio is **females per 1,000 males** (943 in 2011, not 94.3 or 1.06).
- Mixing fertility rate (children per woman, replacement level about 2.1) with birth rate (births per 1,000 population).
- Reversing demographic transition stages: Stage 1 both rates high; Stage 2 death rate falls, birth rate high (rapid growth).
- Reading a wide-based pyramid as an ageing population; a wide base means young, a wide top means ageing.
- Confusing push factors (lack of jobs at home) with pull factors (better jobs in cities).
- Saying a large young population automatically gives a demographic dividend; it needs skills and jobs. Population density is per square kilometre, and the census is every 10 years.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
