CLASS 8 — SOCIAL SCIENCE · MEDIUM LEVEL CHAPTER TEST SET 2

Chapter 13: **Dynamics of Population** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Medium level: multi-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A flood forcing farmers to leave their village is an example of a 1

(a) push factor **(b)** pull factor
(c) change in the sex ratio **(d)** fall in the birth rate

2. Which factor can increase population of a region without births? 1

(a) disease **(b)** in-migration **(c)** war **(d)** death

3. If deaths per year are 800 in a population of 100,000, the death rate is 1

(a) 8 per 1,000 **(b)** 800 per 1,000 **(c)** 80 per 1,000 **(d)** 0.8 per 1,000

4. Better wages in a city act as a 1

(a) pull factor **(b)** fall in the death rate
(c) rise in the median age **(d)** push factor

5. If a village loses young adults to cities, its population will 1

(a) stay same **(b)** age and the workforce shrinks
(c) increase **(d)** become younger

6. A population increased from 361 million to 1,210 million. The increase was 1

(a) 359 million **(b)** 861 million **(c)** 1,571 million **(d)** 849 million

7. The replacement level of 2.1 is slightly above 2 because 1

(a) it is random
(b) some children do not survive to adulthood
(c) all survive
(d) fertility varies

8. Why does density differ across states? 1

(a) all states have the same area
(b) land, resources and employment differ
(c) every state has the same rainfall
(d) all states have the same number of cities

9. Why did the death rate fall faster than the birth rate after 1950? 1

(a) food reduced
(b) doctors left
(c) people had more children
(d) health care improved quickly while social habits changed slowly

10. A country with a median age of 50 is likely to 1

(a) be very young **(b)** have a high birth rate

(c) have an ageing population **(d)** have high child mortality

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. How does female literacy affect fertility? 2

12. Why do cities attract migrants? 2

13. A state has 4,000,000 males and a sex ratio of 940. Find the females. 2

14. Why is an ageing population a challenge? 2

SECTION — C (Short Answer Type) 4 × 3 = 12

Answer in about 40–60 words each.

15. Describe how census data helps planning. 3

16. Explain how urbanisation affects family size. 3

17. A district has 1,200 sq km and density 450 per sq km. Find the population. 3

OR

Explain the relation between life expectancy and health care. 3

18. Describe how sex ratio can be improved. 3

OR

Explain the difference between emigration and immigration. 3

SECTION — D (Long Answer Type) 2 × 5 = 10

Answer in about 100–150 words each.

19. Analyse the relationship between fertility and women's literacy in Indian states. 5

OR

Explain the importance of the sex ratio and measures to improve it. 5

20. Explain what a population pyramid shows and compare India's pyramid in 1950 and now. 5

OR

Explain how health and education influence population trends. 5

END OF QUESTION PAPER Total: 40 Marks
