CLASS 8 — SOCIAL SCIENCE · HARD LEVEL CHAPTER TEST SET 1

Chapter 13: **Dynamics of Population** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A region has birth rate 18 and death rate 6 per 1,000. Its natural growth rate per 1,000 is 1

(a) 24 **(b)** 3 **(c)** 108 **(d)** 12

2. If the fertility rate falls below replacement and migration is zero, then in the long run 1

(a) the population shrinks **(b)** doubles
(c) grows **(d)** stays equal

3. Which combination describes Stage 2? 1

(a) low birth, low death **(b)** low birth, high death
(c) high birth, high death **(d)** high birth, falling death

4. If a district's density is 250 per sq km and its area is 800 sq km, its population is 1

(a) 20,000 **(b)** 2,000,000 **(c)** 3,200 **(d)** 200,000

5. India's demographic dividend will fail if 1

(a) youth lack education and jobs **(b)** there are jobs
(c) wages rise **(d)** there are schools

6. A tribal district has low density mainly because 1

(a) many cities
(b) high literacy
(c) many factories
(d) hilly forest terrain limits farming and settlement

7. A town of 1,50,000 has 1,500 deaths in a year. The death rate per 1,000 is 1

(a) 100 **(b)** 1 **(c)** 15 **(d)** 10

8. A district records density rising from 300 to 330 in 10 years. The percentage increase is 1

(a) 33% **(b)** 3% **(c)** 30% **(d)** 10%

9. **Assertion (A):** If fertility stays below the replacement level for a long time, a population will eventually shrink. 1

Reason (R): The replacement level of about 2.1 children per woman is just enough for parents to be replaced.

Choose the correct option:

(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

10. **Assertion (A):** India's sex ratio in the 2011 census was 943. 1
Reason (R): The sex ratio is the number of females per 1,000 males.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. Why is the sex ratio not just a numeric ratio? 2

12. Why do India and China differ in population policy methods? 2

13. What is the difference between natural increase and total increase? 2

14. A district has 100,000 people and 3,200 births. Find the birth rate. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Evaluate the claim that a large population is always a burden. 3

16. Discuss why migration is important for economies. 3

17. Examine why age structure matters more than the total population for planning. 3

OR

Analyse why Kerala has lower fertility than Bihar. 3

18. Compare Stage 2 and Stage 3 of demographic transition. 3

OR

Compare ageing in Japan and India's future. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. **Case study.** In a year, a town of 5,000 people recorded 150 births and 50 deaths. The town's birth rate is high compared with its death rate, a pattern typical of the second stage of the demographic transition. 5
(i) Calculate the birth rate per 1,000.
(ii) Calculate the death rate per 1,000.
(iii) At which stage of the transition is this town?
(iv) Find the natural increase per 1,000 and give one cause of the falling death rate.

20. Analyse how population structure influences a country's economy and services, with examples of India and Japan. 5

OR

Interpret the shape of three pyramids: wide base, bell shape, inverted base. What do they imply for planning? 5

END OF QUESTION PAPER — Total: 40 Marks
