THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 6 — MATHS · MEDIUM LEVEL CHAPTER TEST SET 2

Chapter 2: **Lines and Angles** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Medium level: multi-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. The hour hand of a clock turns through 210°. How many hours have passed? 1

(a) 7 **(b)** 9 **(c)** 6 **(d)** 8

2. A reflex angle is 240°. The angle needed to complete a full turn is: 1

(a) 210 **(b)** 120 **(c)** 110 **(d)** 130

3. A ray OB bisects $\angle AOC = 76^\circ$. Then $\angle AOB$ is: 1

(a) 38 **(b)** 48 **(c)** 33 **(d)** 43

4. 5 points lie on a line. The number of rays that start at one of the points and pass through another point is: 1

(a) 20 **(b)** 21 **(c)** 19 **(d)** 25

5. Which angle type is the smaller angle between the hands of a clock at 6:00? 1

(a) obtuse **(b)** acute **(c)** straight **(d)** right

6. Two angles of 55° and 35° are placed adjacent to each other. The angle left to complete a straight angle is: 1

(a) 95 **(b)** 100 **(c)** 90 **(d)** 80

7. What is the smaller angle between the hands of a clock at 7:40? 1

(a) 10 **(b)** 20 **(c)** 5 **(d)** 15

8. The minute hand starts at 12 and stops at 8. The angle it turns through (clockwise) is: 1

(a) 240 **(b)** 210 **(c)** 246 **(d)** 270

9. The hour hand of a clock turns through 270°. How many hours have passed? 1

(a) 10 **(b)** 11 **(c)** 9 **(d)** 8

10. A reflex angle is 285°. The angle needed to complete a full turn is: 1

(a) 85 **(b)** 75 **(c)** 65 **(d)** 165

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. OB bisects $\angle AOC$ and $\angle AOB = 47^\circ$. Find $\angle AOC$ and its type. 2

12. How much does the hour hand turn from 2:00 to 7:00? How much does the minute hand turn in that time? 2

13. Find the smaller angle between the clock hands at 8:20. 2

14. OB bisects $\angle AOC$ and $\angle AOB = 65^\circ$. Find $\angle AOC$ and its type. 2

SECTION — C (Short Answer Type) 4 × 3 = 12

Answer in about 40–60 words each.

15. At what angle are the hands of a clock inclined at 4:50? Is the angle acute, obtuse or reflex (looking at the larger angle too)? 3

16. A ray OA is turned about O: first 90° anticlockwise, then 120° anticlockwise, then 30° clockwise. Find the net angle of turn from the original position. 3

17. There are 7 points on a line. How many line segments can be named? How many of them do not include the end point A? 3

OR

At what angle are the hands of a clock inclined at 6:30? Is the angle acute, obtuse or reflex (looking at the larger angle too)? 3

18. A ray OA is turned about O: first 35° anticlockwise, then 75° anticlockwise, then 50° clockwise. Find the net angle of turn from the original position. 3

OR

There are 8 points on a line. How many line segments can be named? How many of them do not include the end point A? 3

SECTION — D (Long Answer Type) 2 × 5 = 10

Answer in about 100–150 words each.

19. A clock shows 7:00. Through how many degrees must the minute hand turn to make the time 7:50? Through how many degrees has the hour hand turned? Find the angle between the hands then. 5

OR

Four rays OA, OB, OC, OD are drawn from O such that $\angle AOB = 35^\circ$, $\angle BOC = 90^\circ$ and $\angle COD = 120^\circ$, measured one after the other. Find $\angle AOD$ and the angle needed to complete a full turn. 5

20. A clock shows 9:00. Through how many degrees must the minute hand turn to make the time 9:40? Through how many degrees has the hour hand turned? Find the angle between the hands then. 5

OR

Four rays OA, OB, OC, OD are drawn from O such that $\angle AOB = 75^\circ$, $\angle BOC = 80^\circ$ and $\angle COD = 95^\circ$, measured one after the other. Find $\angle AOD$ and the angle needed to complete a full turn. 5

END OF QUESTION PAPER Total: 40 Marks
