THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 8 — SOCIAL SCIENCE · HARD LEVEL CHAPTER TEST SET 1

Chapter 1: **Natural Resources and Their Use** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A bore well gives less water each year while nearby farmers grow only paddy. The best explanation is 1

(a) more glaciers **(b)** cheaper water
(c) extraction exceeds recharge **(d)** rain increasing

2. A cement plant is built beside farms; dust coats leaves. The likely impact on crops is 1

(a) no effect **(b)** lower photosynthesis and yield
(c) more yield **(d)** more rain

3. Why is value addition a form of stewardship? 1

(a) It uses more raw material **(b)** It prevents trade
(c) It ends industry **(d)** It earns more from the same resource

4. A mine is legal and affordable but the local tribe holds the hill sacred. This is a clash of 1

(a) economic feasibility with cultural acceptability
(b) no conditions
(c) two renewable resources
(d) technology with rainfall

5. A village revives its old pond and the wells nearby rise in level. This shows 1

(a) wells are useless **(b)** harvesting recharges groundwater
(c) ponds consume water **(d)** the water table is fixed

6. A district with plentiful coal but few schools and factories illustrates 1

(a) regeneration **(b)** stewardship
(c) the resource curse risk **(d)** ecosystem services

7. A country exports raw iron ore and imports finished steel at a much higher price. This best illustrates 1

(a) missing value addition **(b)** stewardship
(c) restoration **(d)** regeneration

8. Why might premium organic produce raise a state's income? 1

(a) Buyers pay more for certified, chemical-free food
(b) There are no buyers
(c) It is cheaper
(d) It costs nothing

9. If all villages harvest rain water, the likely effect on the district is 1

(a) higher groundwater and less flooding **(b)** more drought
(c) less rain **(d)** no change

10. A farmer replaced chemicals with compost and mixed cropping; yields dipped for two years then rose. The most likely reason is 1

(a) chemicals worked better **(b)** soil life and fertility recovered
(c) rain increased **(d)** pests vanished

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. A mine is profitable but the hill is sacred to a tribe. Which condition fails? Why? 2

12. How is value addition an answer to the resource curse? 2

13. State one limit of the claim that all resources are 'gifts of Nature'. 2

14. Why is the ISA a good example of cooperation? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Source: 'The wells in Punjab are going deeper each year; paddy needs many irrigations.' Identify the problem and two causes. 3

16. Case: A farmer in Sikkim goes organic. List three costs and benefits. 3

17. A student says 'Recycling is useless'. Present three counter-arguments. 3

OR

Case: A village bans fishing in the breeding months and catches rise after three years. Explain the result. 3

18. Argue why the 50-year estimate for coal should influence planning. 3

OR

Case: A solar park is planned on grazing land. Discuss two issues. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Source: 'Punjab's farmers grow paddy and wheat with free electricity; 80% of the area is over-exploited.' Analyse the situation and propose a ten-year plan. 5

OR

Design a school-level campaign for stewardship of natural resources with five activities and expected impact. 5

20. Evaluate the three conditions (technology, economy, culture) using the examples of deep-sea oil, a sacred hill and a costly mine. 5

OR

Analyse the role of international cooperation, using the ISA and the tuna example. 5

END OF QUESTION PAPER — Total: 40 Marks
