CLASS 8 — SOCIAL SCIENCE · HARD LEVEL CHAPTER TEST SET 3

Chapter 1: **Natural Resources and Their Use** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Monoculture followed by heavy pesticides is risky because 1

(a) yields never change **(b)** pests adapt and soil becomes poor
(c) it makes compost **(d)** it saves water

2. If upstream states build many dams, downstream states may 1

(a) become rich **(b)** get more water **(c)** have no disputes **(d)** face less water

3. A government subsidises solar pumps for farmers. Which concern might remain? 1

(a) Water becomes salty at once
(b) Free energy can still encourage over-pumping
(c) Sun disappears
(d) Pumps cause rain

4. Which of the following is the MOST complete example of an ecosystem service chain? 1

(a) Rain falls
(b) Forest has trees
(c) Forest filters water, so city gets clean drinking water
(d) Sun shines

5. A tuna fishing ban succeeds only when 1

(a) no one checks **(b)** all countries agree to follow it
(c) one country follows it **(d)** fishing increases

6. Which one of the following is an example of a trade-off? 1

(a) Rivers flow **(b)** Rain falls
(c) Cement gives housing but pollutes air **(d)** Trees give oxygen

7. A person says, 'Resources are free gifts, so no limits.' The best reply is 1

(a) Only water is limited **(b)** Correct
(c) Resources are made by humans **(d)** Many are limited and need careful use

8. Which policy would best address both Punjab's water and farmers' income? 1

(a) Ban on farming **(b)** Assured purchase of less thirsty crops
(c) Free power for more pumping **(d)** Importing water

9. Sacred groves often have rich biodiversity because 1

(a) they are fenced by army **(b)** they have no trees
(c) they are artificial **(d)** community protection prevented cutting

10. Which indicator would show that a resource is being over-exploited? 1

(a) More rain
(b) Falling stocks and falling catch per effort
(c) Rising stocks
(d) Constant stocks

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. How might dust from cement affect farmers' income? 2

12. A forest regrows at 2% a year but is cut at 5%. What will happen? Why? 2

13. Why should students not take solar energy as an excuse for waste? 2

14. Why are sacred groves rich in biodiversity? 2

SECTION — C (Short Answer Type) 4 × 3 = 12

Answer in about 40–60 words each.

15. Source: 'Glaciers melt faster than snowfall replaces them.' What follows for rivers in the short and long run? 3

16. Analyse why two states might both claim the same river's water. 3

17. Describe how Vrikshayurveda's ideas can be used in a school garden. 3

OR

Case: A factory pollutes a stream. Suggest three corrective steps. 3

18. Compare the traditional pond and the modern bore well as water sources. 3

OR

Assess whether the glacier example proves renewables can run out. 3

SECTION — D (Long Answer Type) 2 × 5 = 10

Answer in about 100–150 words each.

19. A region rich in minerals remains poor. Analyse the reasons and policies that can reverse this. 5

OR

Assess the statement: 'Development and conservation cannot go together.' Use cement, solar parks and organic farming. 5

20. Source-based: 'Fine dust from cement plants coats leaves and harms lungs.' Discuss responsibilities of industry, government and citizens. 5

OR

Explain how the lokasangraha ideal can help resolve disputes such as the Kaveri conflict. 5

END OF QUESTION PAPER Total: 40 Marks
