THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 10 — SCIENCE · NCERT-TYPE CHAPTER TEST SET 1

Chapter 6: **Control and Coordination** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. NCERT-type: questions in the style of the textbook examples and exercises.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. A part of the neuron where information is acquired is the: 1

(a) dendrite **(b)** axon end **(c)** axon **(d)** cell body

2. The movement of a shoot towards light is called: 1

(a) phototropism **(b)** geotropism **(c)** hydrotropism **(d)** chemotropism

3. The hormone responsible for the fight or flight response is: 1

(a) adrenaline **(b)** growth hormone **(c)** thyroxine **(d)** insulin

4. The gap between two neurons is called: 1

(a) axon **(b)** synapse **(c)** myelin **(d)** dendrite

5. The roots of a plant grow downward in response to: 1

(a) gravity **(b)** light **(c)** water only **(d)** air

6. The master gland of the body is the: 1

(a) thyroid **(b)** pancreas **(c)** pituitary **(d)** adrenal

7. Which of the following is not a plant hormone? 1

(a) gibberellin **(b)** cytokinin **(c)** insulin **(d)** auxin

8. Tendrils coil around a support due to: 1

(a) geotropism **(b)** thigmotropism **(c)** phototropism **(d)** chemotropism

9. Dwarfism is caused by a deficiency of: 1

(a) growth hormone **(b)** thyroxine **(c)** adrenaline **(d)** insulin

10. The hormone which helps in the growth of the shoot tip towards light is: 1

(a) abscisic acid **(b)** cytokinin **(c)** auxin **(d)** gibberellin

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. What is the difference between a reflex action and walking? 2

12. What is the role of the brain in reflex action? 2

13. Why is the use of iodised salt advisable? 2

14. What happens at the synapse between two neurons? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Draw/describe the reflex arc for touching a hot object. 3

16. Name three animal hormones, the glands and the functions. 3

17. State the functions of the cerebrum, cerebellum and medulla. 3

OR

Why is the reflex arc important? Give an example. 3

18. How does the sensitive plant respond to touch? 3

OR

Why do we feel hungry? Which part of the brain controls this? 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Describe the structure of a neuron, with the path of a nerve impulse, and the synapse. 5

OR

Explain how auxin brings about phototropic bending of a shoot. 5

20. Explain reflex arc with a labelled description and give three differences between reflex action and voluntary action. 5

OR

Explain the feedback mechanism with insulin and the role of the pancreas. 5

END OF QUESTION PAPER — Total: 40 Marks
