THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 10 — SCIENCE · MEDIUM LEVEL CHAPTER TEST SET 2

Chapter 6: **Control and Coordination** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Medium level: multi-step questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. The hormone that is present in greater concentration in fruits and seeds is: 1

(a) gibberellin **(b)** cytokinin **(c)** auxin **(d)** ABA

2. Fight or flight response: Heart rate increases because of: 1

(a) insulin **(b)** thyroxine **(c)** adrenaline **(d)** oestrogen

3. At the synapse, the signal is transmitted by: 1

(a) chemicals **(b)** sound **(c)** light **(d)** hormones

4. Movement of the sensitive plant leaves is a: 1

(a) hormonal growth **(b)** tropic movement **(c)** nastic movement **(d)** growth movement

5. The hormone that regulates carbohydrate, protein and fat metabolism is: 1

(a) adrenaline **(b)** insulin **(c)** auxin **(d)** thyroxine

6. A person is unable to walk straight after an accident. Which part is likely damaged? 1

(a) medulla **(b)** pons **(c)** cerebrum **(d)** cerebellum

7. In Mimosa, leaf movement is caused by: 1

(a) loss of water from cells **(b)** gain of water

(c) photosynthesis **(d)** cell division

8. A hormone secreted in the time of danger also causes: 1

(a) increase in digestion rate **(b)** sleepiness

(c) increase in breathing rate **(d)** decrease in heart rate

9. A person loses the sense of hunger. Which area is likely affected? 1

(a) hindbrain **(b)** forebrain **(c)** medulla **(d)** spinal cord

10. Difference between tropic and nastic movement: tropic is: 1

(a) directional **(b)** non-directional **(c)** only for roots **(d)** always fast

SECTION — B (Very Short Answer Type) 4 × 2 = 8

Answer in about 20–30 words each.

11. Why does the plant shoot bend towards light? 2

12. Why does an injection of insulin help diabetics? 2

13. Why do we need relay neurons in the spinal cord? 2

14. Differentiate between tropic movement and nastic movement. 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Compare electrical and chemical communication in animals. 3

16. How does the plant hormone gibberellin differ from auxin in effect? 3

17. Explain how a seedling responds to light and gravity at the same time. 3

OR

Explain the experiment showing role of tip of shoot in phototropism. 3

18. Why does a plant need abscisic acid? 3

OR

Explain why the sensitive plant responds faster than a growing shoot. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. Explain how auxin brings about phototropism and geotropism. 5

OR

Explain the importance of iodine, with disease, hormone and its function. 5

20. Explain the role of five hormones in humans with one deficiency effect each. 5

OR

Describe what happens to the body in a stress situation involving adrenaline and the role of the nervous system. 5

END OF QUESTION PAPER — Total: 40 Marks
