Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET 1

Chapter 1: **The Problem of Choice (Economics)** | Class 9 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** household	Origin of economics
2	**(b)** production possibility curve	PPC
3	**(d)** sloping downward	Trade-off between goods
4	**(d)** resources are limited compared with wants	Basic problem
5	**(a)** 1991	Liberalisation year
6	**(d)** needs	Essentials of life
7	**(a)** labour-intensive	Technique of production
8	**(b)** Planned economy	Government decisions
9	**(b)** market	Definition
10	**(b)** barley	Opportunity cost

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Roads (1); Parks (1).	1+1
12	What and how to produce (1); For whom to produce (1).	1+1
13	An economy where a central authority decides production (1); The government owns most resources (1).	1+1
14	Value of the next best alternative given up (1); Example: giving up wheat to grow barley (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Value of best alternative given up (1); Spending an evening watching TV (1); Gives up time for homework or play (1).	1+1+1
16	Cost of capital (1); Cost of labour (1); Level of technology (1).	1+1+1
17	Advise on policy and taxation (1); Consult businesses (1); Research and teach (1).	1+1+1
	OR: Less regulation (1); More private enterprise (1); Opening to global trade (1).	1+1+1
18	Private and public sectors coexist (1); Government regulates private firms (1); Welfare programmes exist (1).	1+1+1
	OR: Individual: saving or spending pocket money (1); Firm: more workers or more machines (1); Government: highways or hospitals (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Central planning authority decides (1); Government owns land, factories, banks (1); Prices and output fixed by government (1); Few private firms and little competition (1); Examples: Cuba and North Korea (1).	1+1+1+1+1
	OR: Private firms and public sector both exist (1); Government regulates markets (1); It provides public goods and welfare (1); State-led approach before 1991 (1); Market-friendly reforms after 1991 (1).	1+1+1+1+1
20	What to produce and how much (1); How to produce, with labour or capital (1); For whom to produce (1); Each answer involves choices (1); They arise because of scarcity (1).	1+1+1+1+1
	OR: Who decides: government versus market (1); Ownership: government versus private (1); Prices: fixed versus demand-supply (1); Competition: limited versus high (1); Examples: Cuba versus USA (1).	1+1+1+1+1

Mistakes to avoid:

- Opportunity cost is **not** the money spent or every alternative given up; it is the value of the **next best** alternative given up.
- Do not confuse *needs* and *wants*: food, water and shelter are needs; a designer watch or holiday trip is a want. Wants keep changing and growing.
- A PPC slopes **downward**. A point inside it means resources are under-used; a point outside it is not attainable with the given resources.
- Scarcity means limited resources compared with unlimited wants. It does not mean poverty, and it affects governments and firms as well as households.
- Match systems correctly: Cuba and North Korea are planned economies, the USA is a market economy, and India is a **mixed** economy.

- Do not mix up labour-intensive (handicrafts, traditional farming) with capital-intensive (steel, automobiles), or the three questions: what, how and for whom to produce.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 1: **The Problem of Choice (Economics)** | Class 9 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** Building highways or hospitals with limited funds	Governments choose among uses of funds
2	**(c)** demand and supply	Free markets
3	**(c)** capital-intensive	Technique of production
4	**(c)** needs and limited resources	Allocation of resources
5	**(b)** planned economy	State control
6	**(d)** A holiday trip	Not essential for life
7	**(b)** factors of production	Inputs of production
8	**(a)** a choice	Choice among alternatives
9	**(b)** enforces the rules of the market	Fair play
10	**(b)** savings	Planning of income

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Factors used to produce goods and services (1); They may be natural or human-made (1).	1+1
12	Prices and output set by demand and supply (1); Resources mostly privately owned (1).	1+1
13	An essential for life or work (1); Food and shelter (1).	1+1
14	Private firms and the government both take part (1); India is an example (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Wheat falls from 100 to 70 (1); Wheat given up is 30 kg (1); This is the opportunity cost (1).	1+1+1
16	State-led approach (1); Licences and permits (1); Public sector dominated key industries (1).	1+1+1
17	More machinery and fewer workers (1); Steel industry (1); Automobile industry (1).	1+1+1
	OR: Available to all without exclusion (1); Roads (1); Parks and street lights (1).	1+1+1
18	Resources are limited (1); Wants are unlimited (1); Resources have alternative uses (1).	1+1+1
	OR: Annual review of the economy (1); Prepared by the Ministry of Finance (1); Presented before the Budget (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Individual: pocket money on snack or saving (1); Family: income on essentials and savings (1); Government: tax revenue on roads or hospitals (1); Resources are limited (1); Each choice has a cost (1).	1+1+1+1+1
	OR: Available to all without exclusion (1); Examples: parks, roads, street lights (1); Private firms avoid them as they give little profit (1); Needed for welfare and development (1); Funded by taxes (1).	1+1+1+1+1
20	Farmer has limited land, water and labour (1); Combinations A to E are shown in a table (1); Barley on x-axis, wheat on y-axis gives downward slope (1); More barley means less wheat (1); Wheat given up is the opportunity cost (1).	1+1+1+1+1
	OR: What and how much to produce (1); How to produce (1); For whom to produce (1); They arise from scarcity (1); Economic systems answer them differently (1).	1+1+1+1+1

Mistakes to avoid:

- Opportunity cost is **not** the money spent or every alternative given up; it is the value of the **next best** alternative given up.
- Do not confuse *needs* and *wants*: food, water and shelter are needs; a designer watch or holiday trip is a want. Wants keep changing and growing.
- A PPC slopes **downward**. A point inside it means resources are under-used; a point outside it is not attainable with the given resources.
- Scarcity means limited resources compared with unlimited wants. It does not mean poverty, and it affects governments and firms as well as households.
- Match systems correctly: Cuba and North Korea are planned economies, the USA is a market economy, and India is a **mixed** economy.

- Do not mix up labour-intensive (handicrafts, traditional farming) with capital-intensive (steel, automobiles), or the three questions: what, how and for whom to produce.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 1: **The Problem of Choice (Economics)** | Class 9 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(c)** wants keep changing	Wants grow
2	**(b)** mixed economy	Public and private sectors both exist
3	**(d)** choices made with limited resources	Core idea of economics
4	**(a)** need	Essential for life
5	**(c)** market economy	Private enterprise dominates
6	**(c)** Street light	Used by all
7	**(c)** the next best alternative given up	Forgone benefit
8	**(c)** mixed	Complete the list
9	**(c)** public good	Public goods
10	**(c)** Ministry of Finance	Annual review of economy

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Something we desire for comfort or pleasure (1); Holiday trip and gadgets (1).	1+1
12	Limited resources compared to unlimited wants (1); It forces choices (1).	1+1
13	Land and labour (1); Capital and technology (1).	1+1
14	A curve showing combinations of two goods that can be produced with all resources (1); It slopes downward (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	More workers and less machinery (1); Handicrafts (1); Agriculture (1).	1+1+1
16	From Greek oikonomia (1); Household management (1); Now used for managing a nation's resources (1).	1+1+1
17	It makes and enforces rules (1); It keeps the game fair (1); It does not take sides (1).	1+1+1
	OR: Needs are essential, wants are not (1); Needs are limited, wants unlimited (1); Wants change over time (1).	1+1+1
18	A central authority decides (1); Government owns most resources (1); Prices are fixed by government (1).	1+1+1
	OR: Prices set by demand and supply (1); Private ownership (1); Competition (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Demand and supply decide prices (1); Private individuals own resources (1); Competition improves quality (1); Government acts like a referee (1); Examples: USA and Japan (1).	1+1+1+1+1
	OR: Private and public sectors both work (1); Government regulates markets (1); Welfare and public goods needed (1); State-led approach after Independence (1); Reforms in 1991 added market orientation (1).	1+1+1+1+1
20	Needs are essentials such as food, water and shelter (1); Wants are desires such as gadgets and holidays (1); Wants are unlimited and keep changing (1); Resources are limited (1); So scarcity forces us to choose (1).	1+1+1+1+1
	OR: Read the barley and wheat of each combination (1); Subtract wheat to find loss (1); A to B: 10 kg (1); B to C: 20 kg (1); C to D: 30 kg (1).	1+1+1+1+1

Mistakes to avoid:

- Opportunity cost is **not** the money spent or every alternative given up; it is the value of the **next best** alternative given up.
- Do not confuse *needs* and *wants*: food, water and shelter are needs; a designer watch or holiday trip is a want. Wants keep changing and growing.
- A PPC slopes **downward**. A point inside it means resources are under-used; a point outside it is not attainable with the given resources.
- Scarcity means limited resources compared with unlimited wants. It does not mean poverty, and it affects governments and firms as well as households.
- Match systems correctly: Cuba and North Korea are planned economies, the USA is a market economy, and India is a **mixed** economy.

- Do not mix up labour-intensive (handicrafts, traditional farming) with capital-intensive (steel, automobiles), or the three questions: what, how and for whom to produce.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
