THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

CLASS 9 — SOCIAL SCIENCE · HARD LEVEL CHAPTER TEST SET 1

Chapter 3: **Shaping the Earth's Surface (Geography)** | RBSE Pattern | Session 2026–27

Time: 1 Hour 30 Minutes Name: _____ Roll No.: _____ **Maximum Marks: 40**

General Instructions:

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

SECTION — A (Objective Type Questions) 10 × 1 = 10

Choose the correct option and write it in your answer book.

1. Which of the following sequences from coast is correct? 1

(a) Cave - arch - stack **(b)** Stack - arch - cave
(c) Stack - cave - arch **(d)** Arch - stack - cave

2. Which of these is a likely reason why the Gujarat earthquake of 2001 caused heavy loss of life? 1

(a) Heavy snowfall in Kachchh **(b)** A strong cyclone the same day
(c) Dense population and weak buildings **(d)** No plate boundary near India

3. The plan to monitor glacial lakes is a 1

(a) landslide **(b)** mitigation measure
(c) dune **(d)** cause of GLOF

4. Assertion (A): Himalaya are fold mountains. Reason (R): They were formed by collision of two continental plates. 1

(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

5. A village near Gangotri uses a stream dammed by moraines for irrigation. Its main risk is a 1

(a) dust storm **(b)** storm surge
(c) GLOF **(d)** sinkhole collapse

6. A city on a coast has high sea cliffs and scattered rock pillars offshore. This shows 1

(a) wave erosion **(b)** wind deposition **(c)** river delta **(d)** glacier melt

7. Which feature is formed by wind deposition in a desert? 1

(a) Cirque **(b)** Stack **(c)** Fjord **(d)** Sand dune

8. Assertion (A): Dunes are formed by wind deposition. Reason (R): Barchan dunes form where sand is limited and wind blows from one direction. 1

(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

9. **Assertion (A):** The Himalaya are fold mountains. 1
Reason (R): They were formed by the collision of two continental plates at a convergent boundary.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

10. **Assertion (A):** The Mid-Atlantic Ridge is a divergent boundary. 1
Reason (R): The Himalaya were formed at a convergent boundary.
Choose the correct option:
(a) Both A and R are true and R is the correct explanation of A.
(b) Both A and R are true but R is not the correct explanation of A.
(c) A is true but R is false.
(d) A is false but R is true.

SECTION — B (Very Short Answer Type) — 4 × 2 = 8

Answer in about 20–30 words each.

11. How did Sindhu-Sarasvati communities show an understanding of soil conservation? 2

12. Why are terraced fields common in hilly regions? 2

13. How does mining raise disaster risk? 2

14. Why are dunes shaped differently in different places? 2

SECTION — C (Short Answer Type) — 4 × 3 = 12

Answer in about 40–60 words each.

15. Explain why beaches are fragile. 3

16. Evaluate whether physical or chemical weathering dominates in a hot desert and a humid forest. 3

17. What measures can a state take to reduce dust storms? 3

OR

Explain the role of convection currents using a simple picture. 3

18. Explain how glaciers act as natural reservoirs. 3

OR

A river has a steep gradient and rapids near the source and a broad floodplain near the sea. Explain how the work of the river changes. 3

SECTION — D (Long Answer Type) — 2 × 5 = 10

Answer in about 100–150 words each.

19. **Case study.** A seismologist explains to students that the Earth's crust is broken into tectonic plates that move a few centimetres a year over the partly molten asthenosphere, driven by convection currents in the mantle. Most volcanoes and earthquakes occur around the Pacific Ocean. The Gujarat earthquake took place in 2001. 5
(i) What is the zone around the Pacific with most volcanoes and earthquakes called?
(ii) What drives the movement of plates?
(iii) Which type of boundary forms when plates move towards each other?
(iv) Explain how the Himalaya were formed.

20. Evaluate traditional and modern soil conservation methods. 5

OR

Analyse the combined effect of rainfall, slope and human activity on a hill disaster. 5

END OF QUESTION PAPER — Total: 40 Marks
