ANSWER KEY & MARKING SCHEME SET 1

Chapter 9: **Oceans and Life (Geography)** | Class 9 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning

9	**(a)** a rich fishing ground	Nutrient mix
10	**(c)** submarine relief	Ocean relief

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Deepest part of the ocean (1); Mariana Trench is deepest (1).	1+1

13	Ships pass without threat to peace (1); Right in territorial waters (1).	1+1
14	Sustainable use of ocean resources (1); Growth with healthy ecosystems (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Continental shelf: shallow and rich in fish (1); Abyssal plain: flat and deep (1); Trench: deepest parts (1).	1+1+1
16	Seamount: underwater volcano (1); Guyot: flat-topped seamount (1); Shows past sea level (1).	1+1+1
17	Seismic detection (1); OBPR confirmation (1); Alerts by satellite (1).	1+1+1
	OR: Fish, oil and gas (1); Not full ownership (1); Others may pass peacefully (1).	1+1+1
18	Beyond EEZ (1); Equal rights (1); Flag state laws (1).	1+1+1
	OR: Folklore recognised warning signs (1); People moved inland (1); Traditional knowledge saved lives (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Continental shelf and slope (1); Abyssal plain (1); Mid-Ocean Ridge (1); Trench (1); Seamount and guyot (1).	1+1+1+1+1
	OR: Causes (1); Coriolis force (1); Warm and cold currents (1); Gulf Stream and Labrador (1); Fishing grounds (1).	1+1+1+1+1
20	Territorial waters (1); Contiguous zone (1); EEZ (1); High seas (1); Nautical mile (1).	1+1+1+1+1
	OR: Wave terms (1); Erosional features (1); Depositional beaches (1); Crack-cave-arch-stack-stump (1); Tsunamis (1).	1+1+1+1+1

Mistakes to avoid:

- Spring tides occur on new moon and full moon days, **not** in the spring season; high tides recur roughly every 12 hours 25 minutes.
- Waves are caused mainly by wind, whereas tsunamis are caused mainly by undersea earthquakes; do not interchange them.
- Ocean floor features: continental shelf, slope, abyssal plain, trench, mid-ocean ridge, seamount and guyot (flat-topped). The Mariana Trench is the deepest place; the Mid-Ocean Ridge is the longest range.
- The EEZ extends up to 200 nm and gives rights over resources, not full ownership of the sea; the high seas beyond are global commons.
- The Gulf Stream is a **warm** current; where warm and cold currents meet, mixing of nutrients makes rich fishing grounds.
- Sea cliffs, caves, arches and stacks are erosional landforms formed in the order cave, arch, stack, while a beach is a depositional feature.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
