THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET 1

Chapter 9: **Oceans and Life (Geography)** | Class 9 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(b)** INCOIS	SSEWS
2	**(a)** High tide gives extra depth for their deep draft	Deep draft
3	**(c)** EEZ	UNCLOS
4	**(c)** Labrador Current	Cold current
5	**(a)** Contiguous zone	Up to 24 nm
6	**(d)** beyond the continental shelf	Deeper water
7	**(d)** sea	About 90%
8	**(a)** Sustainable ocean-based growth	Balance
9	**(d)** Shallower water compresses the wave	Run-up
10	**(c)** the roof of a sea arch collapses	Wave action

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Fish come near shore at high tide (1); Catch improves (1).	1+1
12	Shallow, sunlit waters (1); Nutrients from land and currents (1).	1+1
13	Beyond national control (1); Shared global commons (1).	1+1
14	Deflects them right in north (1); Left in south (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Shallow waters rich in fish (1); Oil and gas reserves (1); Close to coast (1).	1+1+1
16	Plastic harms creatures (1); Oil spills (1); Chemicals disturb ecosystems (1).	1+1+1
17	Moon phase (1); Alignment (1); Tidal range (1).	1+1+1
	OR: Seismic detection (1); OBPR confirmation (1); Tide gauges, alerts by SMS (1).	1+1+1
18	Fish and coral (1); Oil, gas, minerals (1); Tidal and wave energy (1).	1+1+1
	OR: Warm currents raise temperature (1); Cold currents lower it (1); Examples Gulf Stream and Labrador (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Waves by wind (1); Tides by Moon and Sun (1); Currents by wind and Coriolis (1); Coastal landforms (1); Climate and navigation (1).	1+1+1+1+1
	OR: Fish and energy (1); Trade (1); Tourism (1); Culture (1); Blue Economy (1).	1+1+1+1+1
20	Ports (1); Fishing (1); Energy (1); Climate (1); Safety (1).	1+1+1+1+1
	OR: Overfishing (1); Pollution (1); Climate (1); Regulation (1); Skills (1).	1+1+1+1+1

Mistakes to avoid:

- Spring tides occur on new moon and full moon days, **not** in the spring season; high tides recur roughly every 12 hours 25 minutes.
- Waves are caused mainly by wind, whereas tsunamis are caused mainly by undersea earthquakes; do not interchange them.
- Ocean floor features: continental shelf, slope, abyssal plain, trench, mid-ocean ridge, seamount and guyot (flat-topped). The Mariana Trench is the deepest place; the Mid-Ocean Ridge is the longest range.
- The EEZ extends up to 200 nm and gives rights over resources, not full ownership of the sea; the high seas beyond are global commons.
- The Gulf Stream is a **warm** current; where warm and cold currents meet, mixing of nutrients makes rich fishing grounds.
- Sea cliffs, caves, arches and stacks are erosional landforms formed in the order cave, arch, stack, while a beach is a depositional feature.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 9: **Oceans and Life (Geography)** | Class 9 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** communication and awareness	Identification
2	**(c)** Gulf Stream	Warm current
3	**(b)** seismic stations	Detection
4	**(c)** Overfishing	Over-exploitation
5	**(b)** rich fishing area	Nutrient mixing
6	**(a)** spring tide	Large range
7	**(a)** Sea cave	Waves erode
8	**(b)** they shelter marine life and protect coasts from waves	Reef function
9	**(d)** They cushion storm surges and reduce erosion	Natural barrier
10	**(b)** 11,099 km	Coastline

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Detect passing waves (1); Confirm threat (1).	1+1
12	Hydraulic action opens cracks (1); Cave cut through headland (1).	1+1
13	Shelter marine life (1); Buffer against storms (1).	1+1
14	Sustainable use (1); Protect life below water (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Ships use high tide (1); Fish move closer (1); Boats time trips (1).	1+1+1
16	List of 169 names (1); From 13 countries (1); Biparjoy and Remal examples (1).	1+1+1
17	Time their trips (1); Use alerts (1); Use traditional knowledge (1).	1+1+1
	OR: Navigation (1); Fishing (1); Overflight and cables (1).	1+1+1
18	Delay in alerts (1); People unprepared (1); Higher casualties (1).	1+1+1
	OR: Samudra sacred (1); Conch and cowrie (1); Dwarka temple at low tide (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	Shelf (1); Slope (1); Abyssal plain (1); Ridge and trench (1); Fishing and resources (1).	1+1+1+1+1
	OR: Scale (1); Warning gaps (1); Local knowledge (1); Shelters (1); Drills (1).	1+1+1+1+1
20	Fishing (1); Oil and gas (1); Security (1); Customs (1); Shipping (1).	1+1+1+1+1
	OR: Baseline (1); 12, 24, 200 nm (1); Rights and passage (1); High seas (1); UNCLOS (1).	1+1+1+1+1

Mistakes to avoid:

- Spring tides occur on new moon and full moon days, **not** in the spring season; high tides recur roughly every 12 hours 25 minutes.
- Waves are caused mainly by wind, whereas tsunamis are caused mainly by undersea earthquakes; do not interchange them.
- Ocean floor features: continental shelf, slope, abyssal plain, trench, mid-ocean ridge, seamount and guyot (flat-topped). The Mariana Trench is the deepest place; the Mid-Ocean Ridge is the longest range.
- The EEZ extends up to 200 nm and gives rights over resources, not full ownership of the sea; the high seas beyond are global commons.
- The Gulf Stream is a **warm** current; where warm and cold currents meet, mixing of nutrients makes rich fishing grounds.
- Sea cliffs, caves, arches and stacks are erosional landforms formed in the order cave, arch, stack, while a beach is a depositional feature.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

Road No. 5, VKIA, Jaipur — 9887258679

ANSWER KEY & MARKING SCHEME SET 3

Chapter 9: **Oceans and Life (Geography)** | Class 9 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** Beach	Waves deposit sand
2	**(b)** Its height	Taller waves carry more energy
3	**(c)** tide tables	Navigation
4	**(b)** Gulf of Khambhat	12 m
5	**(c)** wave deposition	Waves deposit
6	**(d)** GEMINI	GAGAN-enabled handheld
7	**(d)** innocent passage	Maritime law
8	**(a)** conch and cowrie	Cultural link
9	**(c)** cyclone shelters and warning systems	Risk mitigation
10	**(b)** tides	Depth

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	People recognised signs (1); Moved inland in time (1).	1+1
12	Warm Gulf Stream (1); Heat carried to coast (1).	1+1
13	Others may pass peacefully (1); Rights only over resources (1).	1+1
14	Depth varies (1); Avoid grounding (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	1,852 m (1); One minute of latitude (1); Used for sea distances (1).	1+1+1
16	Cave, arch, stack (1); Stump (1); Beach (1).	1+1+1
17	Beaches and diving (1); Guides and hotels (1); Needs sustainability (1).	1+1+1
	OR: EEZ up to 200 nm (1); Contiguous up to 24 nm (1); Rights differ (1).	1+1+1
18	Tide gauges detect change (1); Radar tracks (1); Alert issued (1).	1+1+1
	OR: Handheld device for fishermen (1); Bluetooth to phone app (1); Alerts in nine languages (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	ITEWC (1); INCOIS (1); NCRMP (1); GEMINI (1); Community awareness (1).	1+1+1+1+1
	OR: Fishing rules (1); PMMSY (1); Mangroves (1); Coastal zone care (1); Awareness (1).	1+1+1+1+1
20	Simeulue (1); Fishermen signs (1); Folklore (1); Technology (1); Combined approach (1).	1+1+1+1+1
	OR: Wave: wind (1); Tide: Moon (1); Tsunami: quake (1); Height and run-up (1); Warnings (1).	1+1+1+1+1

Mistakes to avoid:

- Spring tides occur on new moon and full moon days, **not** in the spring season; high tides recur roughly every 12 hours 25 minutes.
- Waves are caused mainly by wind, whereas tsunamis are caused mainly by undersea earthquakes; do not interchange them.
- Ocean floor features: continental shelf, slope, abyssal plain, trench, mid-ocean ridge, seamount and guyot (flat-topped). The Mariana Trench is the deepest place; the Mid-Ocean Ridge is the longest range.
- The EEZ extends up to 200 nm and gives rights over resources, not full ownership of the sea; the high seas beyond are global commons.
- The Gulf Stream is a **warm** current; where warm and cold currents meet, mixing of nutrients makes rich fishing grounds.
- Sea cliffs, caves, arches and stacks are erosional landforms formed in the order cave, arch, stack, while a beach is a depositional feature.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
