ANSWER KEY & MARKING SCHEME SET 1

Chapter 9: **Oceans and Life (Geography)** | Class 9 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** Both A and R are true and R is the correct explanation of A.	Past sea level
2	**(d)** A is false but R is true.	A false
3	**(c)** New crust forms there	Divergent boundary
4	**(b)** one nautical mile	1 nm
5	**(b)** traditional knowledge can save lives	Simeulue
6	**(a)** Storm surge	Flooding
7	**(a)** stack	Wave erosion
8	**(d)** A is false but R is true.	A false
9	**(a)** Both A and R are true and R is the correct explanation of A.	As depth falls near the shore, the wave slows and its height increases.
10	**(b)** Both A and R are true but R is not the correct explanation of A.	Both are true but unrelated.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Moving water turns turbines (1); Predictable (1).	1+1
12	Bleaching (1); Loss of habitat (1).	1+1
13	Drills (1); Shelters (1).	1+1
14	Large energy (1); Deep water speeds (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Stock decline (1); Livelihood loss (1); Need regulation (1).	1+1+1
16	Long coastline (1); Gulf of Kutch and Khambhat (1); Renewable (1).	1+1+1
17	Common measure (1); Sets zones (1); Fair claims (1).	1+1+1
	OR: Funnel shape (1); Narrowing coast raises height (1); Tidal energy potential (1).	1+1+1
18	Water depth lower at low tide (1); Keel may ground (1); Timing matters (1).	1+1+1
	OR: Rights near coast (1); Freedom beyond (1); UNCLOS (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) Spring tides (1). (ii) About 12 m (1). (iii) High tide gives extra water depth for their deep draft (1). (iv) Around 10:25 pm, because high tides occur roughly every 12 hours 25 minutes (2).	1+1+1+2
20	Shared resource (1); Overfishing (1); Pollution (1); International law (1); Enforcement (1).	1+1+1+1+1
	OR: Nutrient mixing (1); Fog and ice risk (1); Route choice (1); Fishing grounds (1); Examples (1).	1+1+1+1+1

Mistakes to avoid:

- Spring tides occur on new moon and full moon days, **not** in the spring season; high tides recur roughly every 12 hours 25 minutes.
- Waves are caused mainly by wind, whereas tsunamis are caused mainly by undersea earthquakes; do not interchange them.
- Ocean floor features: continental shelf, slope, abyssal plain, trench, mid-ocean ridge, seamount and guyot (flat-topped). The Mariana Trench is the deepest place; the Mid-Ocean Ridge is the longest range.
- The EEZ extends up to 200 nm and gives rights over resources, not full ownership of the sea; the high seas beyond are global commons.
- The Gulf Stream is a **warm** current; where warm and cold currents meet, mixing of nutrients makes rich fishing grounds.
- Sea cliffs, caves, arches and stacks are erosional landforms formed in the order cave, arch, stack, while a beach is a depositional feature.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 2

Chapter 9: **Oceans and Life (Geography)** | Class 9 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(d)** crack, cave, arch, stack, stump	Order
2	**(b)** technology can reach fishers at sea	PMMSY
3	**(c)** A is true but R is false.	A false: Moon and Sun
4	**(a)** contiguous zone	Between 12 and 24 nm
5	**(c)** record sea level changes	Tracking
6	**(b)** They are flat-topped submerged volcanic mountains	Submerged
7	**(d)** EEZ	UNCLOS
8	**(c)** around 10:25 pm	About 12 h 25 m
9	**(c)** A is true but R is false.	Ordinary waves are caused by wind; tsunamis arise from undersea earthquakes, so R is false.
10	**(d)** A is false but R is true.	No country owns the high seas, so A is false; R is true.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Small height there (1); Long wavelength (1).	1+1
12	New crust forms (1); Volcanic activity (1).	1+1
13	Easy communication (1); Avoid confusion (1).	1+1
14	Cultural reverence (1); Life support (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Warming (1); Sea-level rise (1); Coral bleaching (1).	1+1+1
16	Plastic ingestion (1); Toxic build-up (1); Human health (1).	1+1+1
17	Allows recovery (1); Short-term loss (1); Long-term benefit (1).	1+1+1
	OR: Animal behaviour (1); Sea retreat (1); Folklore (1).	1+1+1
18	Alerts (1); Tracking cyclones (1); Communication (1).	1+1+1
	OR: Absorb wave energy (1); Shelter fish (1); Reduce erosion (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) Undersea earthquakes (1). (ii) Indian Tsunami Early Warning Centre (1). (iii) Local folklore taught people the warning signs (1). (iv) In shallow water near the coast the wave is compressed and slows, so its height increases (2).	1+1+1+2
20	Fisheries and energy (1); Ports and tourism (1); Overfishing and pollution (1); Policies (1); SDG 14 (1).	1+1+1+1+1
	OR: Territorial waters (1); Contiguous zone (1); EEZ (1); High seas (1); Disputes (1).	1+1+1+1+1

Mistakes to avoid:

- Spring tides occur on new moon and full moon days, **not** in the spring season; high tides recur roughly every 12 hours 25 minutes.
- Waves are caused mainly by wind, whereas tsunamis are caused mainly by undersea earthquakes; do not interchange them.
- Ocean floor features: continental shelf, slope, abyssal plain, trench, mid-ocean ridge, seamount and guyot (flat-topped). The Mariana Trench is the deepest place; the Mid-Ocean Ridge is the longest range.
- The EEZ extends up to 200 nm and gives rights over resources, not full ownership of the sea; the high seas beyond are global commons.
- The Gulf Stream is a **warm** current; where warm and cold currents meet, mixing of nutrients makes rich fishing grounds.
- Sea cliffs, caves, arches and stacks are erosional landforms formed in the order cave, arch, stack, while a beach is a depositional feature.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.

ANSWER KEY & MARKING SCHEME SET 3

Chapter 9: **Oceans and Life (Geography)** | Class 9 Social Science | Maximum Marks: 40

SECTION — A (Objective Type) — Answers — 10 × 1 = 10

Q.	Correct Option	Brief Reasoning
1	**(a)** EEZ	Up to 200 nm
2	**(a)** Both A and R are true and R is the correct explanation of A.	Preparedness
3	**(d)** Natural gas	Non-living
4	**(a)** Both A and R are true and R is the correct explanation of A.	Nutrients
5	**(d)** A is false but R is true.	A false, R true
6	**(d)** high seas	Beyond 200 nm
7	**(c)** 100 m	Horizontal distance
8	**(a)** ship movements timed with the tide	Tidal range
9	**(a)** Both A and R are true and R is the correct explanation of A.	Advance alerts allow evacuation before the waves reach the coast.
10	**(b)** Both A and R are true but R is not the correct explanation of A.	Both are true but one is a landform and the other a development goal.

SECTION — B (Very Short Answer) — Answers — 4 × 2 = 8

Q.	Expected Answer / Value Points	Marks
11	Overlapping claims (1); Resource value (1).	1+1
12	Speed and fuel (1); Safe passage (1).	1+1
13	Close to land (1); Runoff (1).	1+1
14	Shared resource (1); Overfishing risk (1).	1+1

SECTION — C (Short Answer) — Answers — 4 × 3 = 12

Q.	Expected Answer / Value Points	Marks
15	Move plastics (1); Spread oil (1); Affect distant coasts (1).	1+1+1
16	Time to evacuate (1); Lives saved (1); Need for fast comms (1).	1+1+1
17	Land lost (1); Salt intrusion (1); Migration (1).	1+1+1
	OR: GEMINI and ITEWC (1); Folklore (1); Joint approach (1).	1+1+1
18	Moon versus quake (1); Regular versus sudden (1); Mild versus devastating (1).	1+1+1
	OR: Shelf shallow, fishing (1); Slope steep (1); Abyssal plain deep and flat (1).	1+1+1

SECTION — D (Long Answer) — Answers — 2 × 5 = 10

Q.	Expected Answer / Value Points	Marks
19	(i) Exclusive Economic Zone (1). (ii) High seas (1). (iii) SDG 14 (1). (iv) The right of innocent passage (1); sustainable use lets us use ocean resources without exhausting them, so that future generations can also use them (1).	1+1+1+2
20	Currents and climate (1); Fisheries and trade (1); Energy (1); Culture (1); Sustainability (1).	1+1+1+1+1
	OR: Simeulue (1); GEMINI and ITEWC (1); Awareness (1); Limits (1); Combined strategy (1).	1+1+1+1+1

Mistakes to avoid:

- Spring tides occur on new moon and full moon days, **not** in the spring season; high tides recur roughly every 12 hours 25 minutes.
- Waves are caused mainly by wind, whereas tsunamis are caused mainly by undersea earthquakes; do not interchange them.
- Ocean floor features: continental shelf, slope, abyssal plain, trench, mid-ocean ridge, seamount and guyot (flat-topped). The Mariana Trench is the deepest place; the Mid-Ocean Ridge is the longest range.
- The EEZ extends up to 200 nm and gives rights over resources, not full ownership of the sea; the high seas beyond are global commons.
- The Gulf Stream is a **warm** current; where warm and cold currents meet, mixing of nutrients makes rich fishing grounds.
- Sea cliffs, caves, arches and stacks are erosional landforms formed in the order cave, arch, stack, while a beach is a depositional feature.

Evaluator's note: Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
