# THE MASTERMIND COACHING CLASSES

CBSE / RBSE • NURSERY – CLASS XII • JAIPUR

Road No. 5, VKIA, Jaipur — 9887258679

## CLASS 9 — SOCIAL SCIENCE · HARD LEVEL CHAPTER TEST SET 1

Chapter 9: **Oceans and Life (Geography)** | RBSE Pattern | Session 2026–27

**Time: 1 Hour 30 Minutes** Name: _____ Roll No.: _____ **Maximum Marks: 40**

**General Instructions:**

1. All questions are compulsory.
2. Q. 1–10 are Objective Type (1 mark each).
3. Q. 11–14 are Very Short Answer Type (2 marks each).
4. Q. 15–18 are Short Answer Type (3 marks each).
5. Q. 19–20 are Long Answer Type (5 marks each).
6. Internal choice is given in Q. 17 to 20.
7. Write the question number before each answer.
8. Hard level: application and higher-order questions.

## SECTION — A (Objective Type Questions) 10 × 1 = 10

*Choose the correct option and write it in your answer book.*

**1.** Assertion (A): A guyot is a flat-topped seamount. Reason (R): Its summit was flattened by waves before it submerged. 1

**(a)** Both A and R are true and R is the correct explanation of A.
**(b)** Both A and R are true but R is not the correct explanation of A.
**(c)** A is true but R is false.
**(d)** A is false but R is true.

**2.** Assertion (A): Spring tides occur only in spring season. Reason (R): They occur at new and full moon. 1

**(a)** Both A and R are true and R is the correct explanation of A.
**(b)** Both A and R are true but R is not the correct explanation of A.
**(c)** A is true but R is false.
**(d)** A is false but R is true.

**3.** How does a mid-ocean ridge relate to plate movement? 1

**(a)** Plates stop **(b)** Plates slide
**(c)** New crust forms there **(d)** Plates collide

**4.** If a 1,852 m distance is travelled, that is 1

**(a)** one mile **(b)** one nautical mile
**(c)** one km **(d)** one league

**5.** A coast hit by a tsunami avoids heavy loss because local folklore taught people to move inland at the first warning signs. This shows that 1

**(a)** early warning is never needed **(b)** traditional knowledge can save lives
**(c)** folklore always replaces warning systems **(d)** tides protect coasts from tsunamis

**6.** Which of the following can cause cyclone damage on coasts? 1

**(a)** Storm surge **(b)** Delta **(c)** Glacier **(d)** Neap tide

**7.** A sea arch collapses to leave a 1

**(a)** stack **(b)** cave **(c)** beach **(d)** cliff

**8.** Assertion (A): The Blue Economy supports unlimited fishing. Reason (R): It promotes sustainable use of ocean resources. 1

**(a)** Both A and R are true and R is the correct explanation of A.
**(b)** Both A and R are true but R is not the correct explanation of A.
**(c)** A is true but R is false.
**(d)** A is false but R is true.

**9.** **Assertion (A):** Tsunami waves grow taller as they approach the coast. 1
**Reason (R):** Shallow water compresses the wave energy into a smaller depth.
Choose the correct option:
**(a)** Both A and R are true and R is the correct explanation of A.
**(b)** Both A and R are true but R is not the correct explanation of A.
**(c)** A is true but R is false.
**(d)** A is false but R is true.

**10.** **Assertion (A):** Spring tides occur on full moon and new moon days. 1
**Reason (R):** Tidal energy is a renewable source of energy.
Choose the correct option:
**(a)** Both A and R are true and R is the correct explanation of A.
**(b)** Both A and R are true but R is not the correct explanation of A.
**(c)** A is true but R is false.
**(d)** A is false but R is true.

## SECTION — B (Very Short Answer Type) — 4 × 2 = 8

*Answer in about 20–30 words each.*

**11.** How do tides help generate renewable energy? 2

**12.** Why are coral reefs vulnerable to warming? 2

**13.** How can coastal communities reduce disaster risk? 2

**14.** Why do tsunamis travel across oceans? 2

## SECTION — C (Short Answer Type) — 4 × 3 = 12

*Answer in about 40–60 words each.*

**15.** Assess why overfishing in the EEZ is a concern. 3

**16.** Why is tidal energy attractive for India? 3

**17.** Explain why baseline and nautical miles are used in maritime law. 3

OR

Why does the Gulf of Khambhat have a high tidal range? 3

**18.** A ship leaves harbour at low tide and gets stuck. Explain why tides matter. 3

OR

Explain how maritime zones balance coastal rights and global freedom. 3

## SECTION — D (Long Answer Type) — 2 × 5 = 10

*Answer in about 100–150 words each.*

**19.** **Case study.** A very large crude carrier (VLCC) waits outside a harbour until the water level rises. The Gulf of Khambhat has a tidal range of about 12 m. On new moon and full moon days the tides are higher than usual. A tide table shows a high tide at 10 am today. 5
(i) Name the tides that occur on full moon and new moon days.
(ii) What is the tidal range of the Gulf of Khambhat?
(iii) Why do large tankers time their entry to ports with the tides?
(iv) Around what time will the next high tide occur, and why?

**20.** Discuss global cooperation needed for the high seas. 5

OR

Explain how cold and warm currents affect fishing zones and trade routes. 5

## END OF QUESTION PAPER — Total: 40 Marks
