- **Revenue** is money received from sales; **profit** = revenue - expenses. A loss occurs when expenses exceed revenue. Do not treat revenue as profit.
- Fixed costs (rent) do not change with output; variable costs (raw materials, packaging) rise with output. Total cost = fixed + variable cost.
- Break-even is where revenue equals total cost; units = fixed cost / (price - variable cost per unit).
- A business plan is not fixed once written; it is a dynamic roadmap revised when conditions change.
- A mortgage is a loan taken against property, a chawl is a multi-storey tenement of single-room units, and a unicorn is a startup valued above 1 billion dollars.
- Success needs finance, human resources, operations and marketing, not just a great idea; match names with facts (Lijjat 1959, Oberoi - hotels, Chettiars - Tamil Nadu).

**Evaluator's note:** Award step marks as shown; accept any correct alternative method. In internal-choice questions, evaluate only the option attempted. Deduct up to ½ mark for missing units or figures where required.
